MANIKESWARI TEMPLE

The presiding deity of Kalahandi, Manikeswari, is also the family deity of Naga rulers of this ex-state. The temple is situated within the premises of palace of ex-ruler. However, the temple is open for outsiders for worship without any restriction.

The place of origin of Goddess Manikeswari is considered to be Jugsai Patna in Thuamul Rampur from where the river Indravati is originated. From the historical records it was evident that the Goddess was worshipped at this place during 1324-25. Some of the historians opined that the Naga rulers transferred Manikeshwari to her present temple during 1796-97 when Purushottam Dev was king at Puri. Annual *Chhatra Yatra* of Goddess is solemnized during *Dussehra* in memory of her transfer with pomp and gaiety. During this *Chhatra Yatra* animals are sacrificed on the road side and a procession is taken out. On the midnight of *Mahastami* a buffalo is sacrificed to the Goddess.

Annexures

Annexure I - Number of villages under each Gram Panchyat 1024

Annexure II - Fertility and Mortality, 1991 Census 1030

Annexure III - Various measures of fertility and mean age at marriage, 1991 Census 1030

Annexure IV - Percentage Distribution of Migrants by place of birth/place of last residence, 2001 Census 1032

Annexure V - Brief account of main religions in the district/tahsil as per 2001 Census 1033

Annexure VI - Marital status of population as per 2001 Census 1034

Annexure VII - Age, Sex and Education in the district, 2001 Census 1035

Annexure VIII - Distribution of different mother tongues returned in 2001 Census 1038

Foreword

The District Census Handbook (DCHB) published by Census Organisation since 1951 Census, is one of the important publications in the context of planning and development at grass-root level. The publication, which is brought out for each district, contains several demographic and socio-economic characteristics village-wise and town-wise of the district alongwith the status of availability of civic amenities, infrastructural facilities, etc.

2. The scope of the DCHB was initially confined to a few Census Tables and Primary Census Abstract (PCA) of each village and town within the district. Thereafter, at successive censuses, its scope and coverage has been enlarged. The DCHB published at the 1961 Census provided a descriptive account of the district, administrative statistics, census tables and a village and town directory including PCA. The 1971 Census-DCHB series was in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 Census DCHB was in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahasil/town levels. New features alongwith restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given. Information on new items such as adult literacy centers, primary health sub-centres and community health workers in the village were provided so as to meet the requirements of some of the Revised Minimum Needs Programme. Information on approach to the village was provided for the first time in the Village Directory so as to give the details on number of inaccessible village in each district. In the Town Directory, a statement (IV-A) on slums was introduced to provide the details on civic and other amenities in the notified slums of Class I and Class II towns.

3. The 1991 Census DCHB, by and large, followed the pattern of presentation of 1981 Census, except the format of PCA was restructured. Nine-fold industrial classification presented in the 1981 Census. In addition, sex-wise population on 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD Block) level presentation of village directory and PCA data instead of the traditional tahasil/taluk/PS level presentation. It was expected that the presentation of village directory and PCA data at CD Block level will help the planners in formulation of micro level development plans, CD Block being lowest administrative unit.

4. The present series of 2001 Census DCHBs have been made more informative and exhaustive in terms of coverage and content. The Village Directory has been enlarged in scope by including a number of other facilities like banking, recreational and cultural facilities, newspapers and magazines and 'most important commodity' manufactured in village. Income and expenditure of gram panchayat, wherever possible, has been provided. Apart from these, more details on distance(s) at which basic amenities are available (if not available in the village), are given. This includes educational facilities (namely primary and middle schools and college), medical facilities (viz. Allopathic Hospital, Maternity & Child Welfare Centre and Primary Health Centre), drinking water, post & telegraph (post office and phone), communication, bank, credit societies and recreational facilities. In Town Directory, the statement on Slums has been modified and its coverage enlarged by including

details on all slums instead of 'notified slums". The information is given in case of all statutory towns irrespective of their class, against only Class I and Class II towns in the 1981 and 1991 Censuses. The basic amenities available in the villages and towns are analysed in depth with the help of a number of cross-classified inset tables and statements. Two other significant additions in the publication are inclusion of 'motif' highlighting significant characteristic of the district and analytical notes as annexures. The analytical notes on (i) fertility and mortality and (ii) various measures of fertility and mean age at marriage are prepared based on 1991 Census. Whereas, in the notes relating to (i) percentage distribution of migrants by place of birth/place of last residence, (ii) main religions, (iii) marital status of population, (iv) age, sex and education, and (v) distribution of spectrum of mother tongue, nature and extent of changes occurred in the district in its basic socio demographic features during the decade 1991-2001 are analysed. The eight digits permanent location code (PLCN) to all the villages and towns have been assigned keeping in view the future needs.

5. The village and town level amenity data have been collected, compiled and computerized in prescribed record structure under the supervision of Shri Manoranjan Saran, Director of Census Operations, Orissa. Thereafter, effort have been made to ensure comparability of the information with that of 1991 Census data and the information brought out by the respective state governments in their annual reports and statistical handbooks for various years after 1991. The task of planning, designing and coordination of this publication was carried out by Shri R.G.Mitra, Deputy Registrar General (C & T) and Dr. I.C. Agrawal, Senior Research Officer of Social Studies Division. Dr. R.P. Singh, Deputy Registrar General (Map) provided the technical guidance in the preparation of maps. Whereas, Shri Anil Kumar Arora, Deputy Director of Data Processing Division who worked under the overall supervision of Shri Himakar, Addl. Director (EDP) helped in preparation of record structure for computerisation of village and town directory data and the programme for the generation of Village Directory and Town Directory statements including analytical inset tables. The draft DCHB manuscripts received from the Census Directorates have been scrutinized in the Social Studies Division under the guidance of Shri S.L.Jain, Deputy Director and Shri R.K.Mehta, Assistant Director. I am thankful to all of them and others who have contributed to make this publication possible.

Registrar General &
Census Commissioner, India

Preface

The District Census Handbook (DCHB) brought out by the Census Organisation after each Census is one of the most valuable and important publications providing grass root level data in order to cater to the needs and aspiration of the people at large. The publication is compiled and prepared for each district of the state by the Census Organization on behalf of the State Government. It not only contains the numeric figures relating to the people in villages and towns but also gives a clear picture on the quality of their life. These publications are widely used by the State Government functionaries at the district level as well as other levels for planning, development and administrative purposes in addition to a large cross-section of data users, academicians, scholars, researchers and other non-governmental agencies who derive maximum utility of these publications. The Registrar General & Census Commissioner, India in his foreword has highlighted the improvements in the publication brought out from time to time since its inception.

As per 2001 Census publication programme, it has been proposed to publish the District Census Handbook in two parts i.e. Part A – Village and Town Directory and Part B – Village and Town Primary Census Abstract. Part A of the publication contains information on basic amenities available to the villagers and land use data supported by a number of tables and its analysis on non-census data for villages and towns. Part B of the publication on the other hand contains details census data for villages and towns in the form of Primary Census Abstract. The contents and coverage of the publication have been designed in a uniform manner by the Registrar General & Census Commissioner, India. By and large, the manner of presentation of DCHBs of the 2001 Census is similar to the 1991 Census. However, the publications have been made more informative and exhaustive keeping at par with the changes in socio-economic scenario of the nation and the requirement of the data users. It is hoped that the publication would be helpful to the planners, administrators in formulating micro level developmental planning.

The collection and compilation of such a huge data was indeed a formidable task requiring crusader's zeal on the part of different functionaries. Information on amenities and land use data for Village Directory has been collected from the Tahsildars while the Chief Executive Officers of the Municipal Corporations and Executive Officers of the Municipalities and Notified Area Councils have provided the information for towns. Data collected as such have been cross-checked with the help of the official data collected from various Departments/Organisations like Reserve Bank of India, Department of Post, Government of India, Directorate of Health Services and Directorate of Indian System of Medicine & Homeopathy, Directorate of Higher Education etc, Government of Orissa. Though all types of efforts have been taken for removal of discrepancies in the figures, yet the possibility of some error still creeping into them cannot be altogether ruled out.

Till 1991 Census, The Director of Census Operations had the responsibility for providing data whereas its publication was the responsibility of the State Government. However, this time the publication is being brought out by the Govt. of India. The publication will also be made available for the first time in electronic format to the numerous data users.

I express my deep gratitude to Shri J.K. Banthia, IAS, Registrar General & Census Commissioner, India, Shri R.G. Mitra, Deputy Registrar General (C & T) and Dr. I.C.Agrawal, Sr. Research Officer of Social Studies Division and other officers of the Registrar General's office for their valuable guidance in preparing this volume.

I am grateful to the departments of the Govt. of Orissa, Heads of Departments, Collectors and other district officers, Tahasildars, Block Develoment Officers, Chief Executive Officers and Executive Officers of the towns who have extended their cooperation and help for collecting such voluminous and useful data. I am also grateful to the authorities of Reserve Bank of India and Postal Department for providing requisite data.

I would be failing in my duty, unless I acknowledge the important role played by my colleagues, who have been associated with the project one way or the other, for their sincere efforts to bring out this publication.

Manoranjan Saran
Director of Census Operations,

ANALYTICAL NOTE

Analytical Note

(i) History and Scope of the District Census Handbook

The Census of India has all along endeavoured to maintain its tradition of feeding the people with reliable statistical information through its various publications. The District Census Handbook is one of such publications which in real sense, is the mirror of Census reflecting the demographic features and infrastructural development of the villages and towns of the districts and thereby facilitating the formulation of realistic plan in order to cater to the needs and aspirations of the people at large. The genesis of this publication being after the conduct of the 8th decennial Census in 1951 and the first in the post independence era, its contents and coverage have undergone tremendous changes over the period keeping at par with the changes in socio-economic scenario of the nation and the requirement of the planners, scholars, data users, administrators and others. The publication is a veritable mines of information providing a clear picture of population in both quantitative and qualitative terms up to the grass-root levels i.e. about the villagers and town dwellers.

This document was brought out for the first time as an auxiliary to 1951 Census as a joint venture between the Government of India and the State Government. The initial arrangement of supply of data by the Census Organisation of the Government of India and converting them into published documents by the State Government was continuing till 1991 Census. In 2001 Census the publication of this document is carried out by the Census Organisation. Apart from giving the rural statistical information, it readily gives a complete list of villages contained within a police station and district in an exhaustive manner and becomes very resourceful for the users. In order to make the data component more illustrative, maps of the district, tahasils, C.D. Blocks and police stations are also inserted in the publication.

As per the 1951 publication programme, the DCH was published in one volume and did not contain information given in the Village and Town Directory. Apart from this the brief introduction of the district, general features, density map, prescribed tables for general population, economic tables, social and cultural tables and village statistics were provided in the DCH. The Primary Census Abstract was given under the heading "Village Statistics". However, the information on village-wise list of displaced persons and information on Small Scale Industries were presented in the 1951 DCH volume.

The District Census Handbook – 1961 was also in one single volume just like 1951 publication. However, it contained some modifications i.e. this volume was divided into three parts – i) the first part contained the introduction of the district, ii) second part contained the census tables and iii) the official statistics were given in the 3rd part. The village wise Primary Census Abstract (PCA) under the heading of "Village Directory" was included in the second part. Additional information on village wise list of industries and tables on fairs and festivals were presented in 1961 DCH.

The District Census Handbooks of 1971 Census were published in three volumes: i) Part-A containing the data on amenities; ii) Part-B incorporating the Primary Census Abstract (PCA) and iii) Part-C giving administrative statistics and Census tables. The first two volumes of the DCH i.e. Part A and Part B for the 1971 Census could be published within the time schedule and catered to the needs of the data users. However, difficulties were experienced in collecting administrative statistics from various offices for the preparation of the 3rd volume of the DCH i.e. Part C and its printing. This volume could be published ultimately after much delay. The idea of bringing out the publication of the 3rd volume of the District Census Handbook containing information on administrative statistics etc was dispensed with effect from the subsequent Censuses.

The District Census Handbook for 1981 Census was published in two parts i.e. Part A – included Village and Town Directory and Part B - presented the Primary Census Abstract (PCA) including Scheduled Castes and Scheduled Tribes Primary Census Abstract up to police station/town levels. By and large, the contents of the Village and Town Directory of 1981 Census were almost similar to those adopted during 1971 Census, barring a few changes necessitated by the requirements of the planners and data users.

The District Census Handbook of 1991 Census was of the same pattern of 1981 Census. Part-A of the DCH contained statistics of Village and Town Directory and Part-B included data on Village and Town wise Primary Census Abstract including Scheduled Castes/Schedule Tribes Primary Census Abstract. However, the DCH publication of 1991 Census exhibited the following novel ideas so far as the presentation of data of these publications were concerned.

i) Village Directory data and Primary Census Abstract were presented C.D Block wise having separate identity of constituent police stations within a block. The villages coming under different police stations but within the same C.D.Block were shown separately so as to facilitate comparison with that of previous publications.

ii) Both manual and computerized location codes of various villages were shown separately for 1981 and 1991 Censuses in alphabetical order for the convenience of the data users.

iii) In case of both the village and town directories, the objectives of the various columns and the connotation of various observations used therein were explained in the relevant sections.

iv) Nine fold industrial classification of main workers were presented instead of four fold industrial classification presented in the 1981 Census publications.

v) The sex-wise population under the age group 0-6 was included in Primary Census Abstract for the first time in order to enable the data users to compute more realistic literacy rate as all children below 7 years were treated as illiterate.

vi) Tahasil and Police Station maps in the publication showing the village and town boundaries also depicted the C.D. Block boundary for the convenience of the readers and data users etc.

The Census of India 2001 follows the same pattern of 1991 Census in publishing the District Census Handbook volumes for each district. The DCHB publications are of 2 parts, i.e.; Part 'A' containing statistics on village and town directory and Part 'B' containing data on village and town-wise Primary Census Abstract including Scheduled Castes/ Scheduled Tribes Primary Census Abstract. Like 1991 Census, the village level information for both parts of District Census Handbook volumes have been presented C.D. Block-wise.

The Census of India 2001 has introduced the eight digited permanent location code (PLC) for each and every village, which has run continuously for the entire state starting from the 1st village of the 1st police station of the 1st district of the state to the last village of last police station of the last district. The last two digits of the PLC are kept as 00 and reserved for future treatment, if any. In order to facilitate the comparability of data by the data users, the Permanent Location codes of villages during Census of India 2001 and their corresponding location codes during 1991 Census have been shown alongwith village names under the C.D. Block-wise alphabetical list of villages.

(ii) Brief History of the District

According to a popular belief, a powerful man of Rajputana named Kalahambir came to this part and ruled it for many years. After his name, this was called Kalahambir, which in course of time corrupted into Kalahandi. The name Kalahandi as stated may literally mean, "Black pot" or it may mean "Pot of arts". According to another interpretation, the name has possibly been derived from "Gudahandi" a hill located close to Kokasara Police Station of the district, in the caves of which are painted pre-historic paintings in red and black colours. These interpretation

concerning the origin of the name of Kalahandi are, however conjectural.

(iii) Administrative set up :

The present district of Kalahandi comprising sub-divisions Kalahandi and Dharamgarh came into existence vide Government of Orissa Notification No. 14218 – DRC – 44/93 dated 27.03.1993 being carved out from erstwhile undivided Kalahandi district along with Nuapada district. The undivided district Kalahandi was formed on 1st January 1948 with headquarters at Balangir. The district had three constituent Sub-divisions namely Kalahandi, Dharamgarh and Nuapada. The first two Sub-divisions were part of the ex-state areas of Kalahandi, which merged with Orissa on the Ist January 1948. The Ex-state after integration with the ex-states of Patana and Sonapur formed the district of Kalahandi with Headquarters at Balangir. On 1st November 1949, Patana and Sonapur Ex-state areas were separated to form district of Balangirpatna (later Balangir) and the Ex-state of Kalahandi together with Nuapada Sub-division which formed a part of Sambalpur district since 1st April 1936, was reconstituted a separate district Kalahandi with headquarters at Bhawanipatana.

The entire area comprising Kashipur Police Station had no direct communication with the district headquarters Bhawanipatna which posed administrative problems. To overcome such difficulties, Kashipur P.S. was transferred from Kalahandi district and tagged to Rayagada Sub-division of erstwhile Koraput district on 1st August 1962.

After division of erstwhile Kalahandi district into Kalahandi and Nuapada districts the former is constituted taking two Sub-divisions namely Kalahandi and Dharamgarh accommodating seven tahasils viz. Dharamgarh, Jayapatna in Dharamagarh subdivision and Kalahandi, Kesinga, Lanjigarh, Thuamal Rampur, Madanpur Rampur in Kalahandi sub-division. Kesinga and Madanpur Rampur are two new tahasils after 1991 Census. The district has further been divided in to 11 Police Stations, which accommodates 2,236 villages and 4 towns.

Of the four towns of the district, Bhawanipatna Municipality is the district headquarters as against two Notified area councils namely Junagarh and Kesinga and one census town Mukhiguda.

Jurisdictional changes between 1991-2001 in the administrative units of the district of Kalahandi

During 2001 Census the district accommodates seven tahasils having 11 Police Stations and 4 towns. In the1991 Census there were five tahasils namely Kalahandi, Lanjigarh, Thuamul Rampur, Dharamgarh and Jayapatna. In 2001 Census Kalahandi tahasil was bifurcated to Kalahandi and Kesinga and Lanjigarh tahasil to Lanjigarh and Madanpur Rampur Tahasils.

Location and size :

The district of Kalahandi is located in south-west region of the state of Orissa. As regards geographical region, the district is situated between $19^0 3'$N and $20^0 18'$N latitude and $82^0 20'$E and $83^0 47'$E longitudes. The district headquarter town Bhawanipatna is situated at a distance of 418 kms from state capital Bhubaneswar. The district is bounded on the north by Nuapada and Balangir districts, on the east by Kandhamal and Rayagada, on the south by Nabarangapur and Koraput districts, on the west by Raipur (Chhatisgarh) and Nabarangapur districts. Total geographical area of this district as supplied by the Surveyor General of India is 7,920 sq kms. The district ranked seven in this state of Orissa in comparison to other districts in terms of area.

(iv) Physical Feature :

The district is broadly divided into two distinct natural divisions viz. the hill tracts and the plain. The former chiefly comprises the ranges of hills, which run from the north-east to south-west of the district. The later constitutes the river valleys of the Tel along with its tributaries. About eight kilometers south-east of Bhawanipatna commences the mountain tracts called the Dongarla, which cover a vast area of about 3,665 sq. kms on the eastern side of the district, and extends southwards to the Rayagada and Koraput border. These tracts rise in a series of precipitous hill ranges from the plains.

The principal plateau lands are Karlapat, Thuamul-Rampur Ranges and the Baphlimali hill on the district border and these parts have an elevation above sea level of 1,220 metres and above.

Drainage :

The Tel, Indravati and Jonk, which form tributaries of large rivers like the Mahanadi and Godavari, are principal rivers of the district. Most of the hill streams of the district are perennial. The river in the open country seldom carries a large flow of water in the hot weather. The Tel, Sagada, Hatti, Ret and Utei are almost reduced to tiny streams in their lower reaches from February to June. The rivers are scarcely navigable as they dry up in the plain country during the summer. Flow direction of streams and rivers are towards the east.

The principal hill ranges belong to the Eastern Ghats. The main peaks in these ranges are Tangridongar (1,229 M), Kattighara (953 M) and Kalarapat (1,213 M). The highest peak Tangridongar, is situated in Thuamul Rampur Police Station. A few years ago the district had the reputation of being the home of man-eating tigers due to vast tract of jungle areas.

Soil :

The district has mainly three types of soil i.e. red laterite, black soil and sandy loam. The red laterite soil is found all over the district. It is deficient in phosphorus and nitrogen. The Black soil is found mostly in Bhawanipatna, Kesinga and Dharamgarh tahasils. It is reach in potassium and magnesium but poor in nitrogen and phosphorus, and is best suited for cultivation of paddy, cotton, chilly, tobacco and Rabi crops like pulses and wheat. Sandy loam soil is found in Lanjigarh and Bhawanipatna tahasils and is suitable for cultivation of oil seeds and root crops. The river side areas have alluvial sandy and sandy loam soils. The best cultivable soils are found in the plains of Dharamgarh and Jayapatna tahasils.

Climate :

The climate of this district, which is in the northeastern corner of the Deccan Plateau, is in many respects similar to that of the main Deccan plateau. Of the four seasons in a year the hot one from March to May is followed by the south-west monsoon, the rainy season from June to September. October and November constitute the post-monsoon season. The cold season is from December to February. The mean daily maximum temperature is 41^0C during month of May and minimum temperature is 28^0C. December is the coldest month with the mean daily maximum temperature of 28^0C and mean daily minimum temperature is 13^0C. Short spell of cold weather occurs in winter often. The relative humidity is high in the southwest monsoon and post monsoon months. The winds are generally light to moderate with some increase in force during the summer and monsoon seasons. Direction of the wind is between south-west and north-west in monsoon season as against between west and north-west in post-monsoon and cold season. In the summer months the winds are variable in direction.

The average annual rainfall of the district is 1,210 mm. Irregular and unusual rainfall is often responsible for drought conditions in the rainy season from June to September.

Flora :

The geology, topography, climate and the soil all have a close bearing on the nature of vegetation. Above all, man's influence on the flora is no less important. The one time densely wooded trades on the high hills of Kalahandi is reduced to mere bamboo and dry mixed scrub in no time through denudation brought about by shifting cultivation.

The flora of ravines and valleys is evergreen and where the few small patches of reserve forests occur, the crop inside is that of pure Sal (shorea robusta) or plateau sal, whereas the adjacent hill sides are covered with grass and mixed forest with no trace of Sal.

Sal tends to occur in isolated patches due to the influence of man and as such it is only a relic in the areas wherever it is found. It extends a short distance towards south. There are many excellent groves close to villages, predominated by mango trees (Mangifera Indica) and occasionally by tamarind trees recently grown.

Fauna :

The forests of the district of Kalahandi were reputed for the abundance of wild fauna both

herbivora and carnivora. Extension of cultivation, laxity in the enforcement of game laws and liberal use of fire arms by villagers and Shikaris have all contributed towards fast disappearance of herbivore population during the early days. This has precariously upset the equilibrium in nature compelling the carnivora like tigers to take to man-eating on a menacing scale.

The Indian bison usually called "Gayal" occurs in the denser and remoter forests and was said to be numerous in the high hill of Kalahandi. It lives in small herbs. The sambar, a forest loving animal generally frequents the high and thick inaccessible hills. The largest among the Indian deer, which is nocturnal in habit, grazes chiefly at night. It returns to the hill tops during the day to choose a shady corner to escape from the heat.

The black buck antelope found in the district is declared as a protected species as their number is rapidly dwindling.

The spotted deer known as "Chital" is very common. Gregarious in habit, it is less nocturnal than the sambar. Preferring low lying lands close to water sources it is careless of the neighbourhood of man and therefore falls an easy prey to "Shikaris" aiming from a water hole.

The Indian mouse deer, the smallest of its tribe, is met with, but owing to its diminutive size is seldom seen. It stands 25 to 30 centimetres at the withers and its colour is brown with white or buff spots and longitudinal stripes. In Kalahandi it is generally known as "Kebri". The Indian hare is the only hare found though uncommon. It prefers bushy jungles to thick forests. Its flesh is fairly delicious except in the hot and rainy seasons when they are more or less infected by the grub of a species of Bot fly.

The tiger was fairly numerous and was greatly destructive to human life. The great majority are game killers, some cattle killers and others are man-eaters. Due to steep decline in its number, it has been declared as protected species.

The panther or leopard Chita found in the district is varied in size. It is bolder and more sneaking than a tiger. To add to this, its climbing habit makes it a greater menace. It lifts cattle and other domesticated animal freely from villages and attacks men in "manchan" watching their fields. The leopard is killed by wild dogs. The wild dog is numerous and is extremely destructive.

The jackal avoids heavy forest and chiefly inhabits the scrub-jungle near villages. The fox is common in the open areas as it avoids heavy woods. It is known to become tame in captivity. The sloth bear is found all over the forests generally in caves and in the plain areas of the valley in greater number. It lives on the mahua flowers, berries and white ants but now and again develops carnivorous tendencies. They seldom attack people except when taken by surprise.

Cropping pattern :

Food grains constitute the predominant crop of the district. Paddy is the most important crop and is extensively grown in the district. During 1998-99 it covered an area of 226,628 hectares and 2,445,949 quintals of rice were produced. The average yield being 10.79 quintals (in terms of paddy) per hectare.

There are three regular rice crops, namely, autumn, winter and summer. Early varieties of paddy of 60 to 90 days duration are grown in maximum areas of the uplands. The high land rice is sown at the commencement of the rains i.e. in June and July and harvested towards the last part of September. The autumn rice is sown in June and harvested in October. The winter rice, grown on low lands, is sown or transplanted in July/August, and harvested in November and December. In some hilly areas in the southern part of the district the stream beds are cultivated with summer paddy to a very limited extent. A traditional variety of paddy called 'Baya' was generally cultivated. It was also called "Amdhan" as its period of cultivation corresponds with season of mango crop. The stream beds were converted into terraced fields when the flow of water went down and the plants were transplanted towards the end of May. At present its cultivation has been discontinued and the variety has been replaced by short duration high yielding varieties like P.T.B.– 1.

The plains of Dharamgarh and Jayapatna Tahasil are agriculturally most prosperous and considered as the granary of the district. These are the chief rice growing areas and are inhabited by a number of

progressive farmers. Although high yielding varieties of improved paddy have been introduced in the district, their scope is now limited due to lack of assured irrigation facilities. It has not yet been popular with the tribal farmers of the district who cultivated only traditional crops of local varieties. During 1998-99, high yielding varieties were grown in only 226,628-hectare areas in kharif season and in 3396 hectares as summer rice.

Other cereals and millets normally grown in the district include wheat, maize, jower, bajra, minor millets etc. Pulses like arhar, mung (green gram), biri (black gram), kulthi, field pea, etc. are also extensively grown. Oil seeds include groundnut, til, mustard. Other commercial crops like sugarcane, sweet potato, potato, onion, garlic, chili, vegetable, tobacco, jute and mesta are grown moderately due to lack of irrigation facilities.

Irrigation :

Irrigation facilities are highly deficient in the district. Although its economy is largely dependant on agriculture, no regular or systematic irrigation facilities have been developed so far. The district has a satisfactory rainfall, but it is frequently affected by droughts due to untimely rain and its uneven distribution. Possibilities of irrigation expansion are rendered meagre on account of the undulating terrain and the absence of suitable locations for the storage of rainwater. As hard rocks are found below 9 to 12 meters of the ground surface in the most part of the region, tube wells for lift irrigation are neither feasible nor economical. Tanks and wells are the important sources of irrigation. Most of the tanks, however, are in derelict condition and need repair and renovation as the water available therein does not last beyond December. Wells which irrigate only small plots of land somewhat on a regular basis suffer from paucity of supply and become dry in summer, reducing the extent of their utility.

Forestry :

Kalahandi district is noted for its rich forests, which cover nearly 11.62 percent of its rural geographical area.

The most important forest produce is firewood, timber, bamboos and kendu leaf. Bamboos of excellent quality are the predominant products in the forest tracts in Lanjigarh and Bhawanipatna tahasils. Teak, Sal, Piasal, Sisu, Sahaj, Bija, Jamun, Mohua, etc. are the main timber species found in the district with Sal predominating. There was a time when teak was abundant. The method of exploitation of large timber was being carried out by contract system and the contractors were given the monopoly to fell trees above a certain girth. The forests being worked by the contractors in this way for years and unworthy people being recruited to the Estate forest staff, the bulk of it now contains a few or no large timber of value. Teak was also found in many village lands and in the forest areas in the valley of the Tel River.

Firewood, timber and bamboos are exported in large quantities to outside the district. Kendu leaves possess a good market both inside the country and abroad.

Other forest products are myrobalans, broom-grass, lac, Mahua flowers and seeds Antia bark, sabai grass, cotachu, tamarind, arrowroot, honey hide, horn, etc.

Minerals and mining :

The district is comparatively poor so far as minerals and mining are concerned. However, there are a few number of Graphite, Quartzite and Gem stone mines that are presently in working in the district.

Compared to some other district of Orissa, Kalahandi is rather poorly endowed with mineral resources. Graphite, gemstone, quartz, manganese, bauxite, lithomarge clay, cobalt and galena are the important minerals found locally. But the deposits are either small or of low grade. Bauxite found in the district is low in silicon and high in iron. Graphite deposits are found in Bhawanipatna.

Land and Land use Pattern :

As per District Statistical Handbook 1999 – Kalahandi district land use pattern is given as follows:

Total Geographical Area –8364 sq. km

Forest Area-64, 793 hectares

a) Misc. Groves-2, 246 hectares
b) Permanent pasture-21,702 hectares

c) Cultural waste-26,509 hectares
d) Land put to non-agrl. use-41,372 hectares
e) Barren/uncultivated land-56,961 hectares
f) Current fallow –58,156 hectares
g) Other fallows –26,659 hectares
h) Net area sown: -259,165 hectares

Animal husbandry :

Livestock development in the district is almost neglected. In a largely agrarian society like that of the district, people can supplement their income by rearing livestock and developing dairy farming. But very rarely this has been undertaken by the people as a commercial proposition. Cattle rearing is prevalent among the local people, but only on a domestic scale. Dairy farms have not developed mostly due to the lack of marketing. Domestic poultry farming is prevalent widely among the scheduled castes and the tribal communities. Birds and eggs are sold by the local people in weekly markets. Due to lack of market and transport difficulties, poultry farming is not developing on a commercial basis. Piggery is also widely prevalent mainly among the scheduled castes and the scheduled tribes. Pig meat is a favourite food of the local tribal and scheduled caste people. Goats and sheep are reared for eatable purpose.

The pastures and grazing grounds available in the district are not sufficient for all categories of animals to graze for the whole year. There are extensive areas of forests and wastelands and plenty of green grass for the cattle to graze during the rains. Every village has its own pasture (gochar). Acute shortage of green grass is felt after the rains and the animals remain underfed during the summer months depending mostly on paddy straw.

Agriculture by-products like rice bran, wheat bran, edible oil cakes and pulses like biri and kulthi are also used as cattle feed. Premixed cattle and poultry feeds are marketed by the Orissa Agro Industries Corporation, a state government undertaking.

There were 239,819 milch cows and 125,945 buffaloes in this district according to 1995 Live-stock Census. Milk yield of the local cows is very meagre and they remain dry for most part of the year. Generally the cows are neglected and preference is given to bullocks because of their utility in agriculture. Till recently no systematic attention was given by the local people for improved breeds.

There is a livestock breeding-cum-dairy farm at Bhawanipatna started in 1968. The farm was previously stationed at Balangir due to lack of accommodation in the district. It was shifted to Bhawanipatna in 1974. The cattle belong to Haryana breed. They are being upgraded with Jarsey breed.

Being a drought-prone area, the district is suitable for the development of livestock and dairy, which will help the poor cultivators economically. During recent years steps are being taken by the Government through various development projects to develop dairy farming at commercial basis. Milk Producers Co-operative Societies have been registered in the Community Development Block areas of Bhawanipatna and Kesinga. There is ample prospect of this industry in future when it will be possible to supply milk to bigger markets in an organized manner. Besides, cows have been supplied to the small and marginal farmers of the district for the production of milk for profit. Both the schemes of the single-cow unit and the milk union are subsidized by the Government.

The local breed of cattle are generally poor in quality. Bullocks and buffaloes are employed in ploughing and pulling carts. Cows and she-buffaloes are maintained for milk purpose.

This district is the habitat of a local type of milch breed known as the Khariar cattle, popularly called 'Tarbod' after the village of the same name in the Nuapada district. It is a small statured breed with defined medium type character of milch productivity, milk yield being about 2 liters per day. Generally it is reddish gray in colour with a white star or blaze on the forehead. If properly maintained, a cow of this breed is capable of yielding 4 to 5 liters of milk per day. This breed was selected for research by the Indian Council of Agricultural Research.

The goats, sheep and pigs are reared only for meat. The climatic condition of the district is not congenial to the woolly breed of sheep. The local breed of goat yield very little milk, barely sufficient for their kids.

Poultry keeping is widely prevalent among the scheduled tribes and the scheduled castes people of the district. The local breed is extremely hardy and requires no special care for rearing. Besides, these birds collect their own food. These small statured birds are mainly used for eatable purpose. The people in some areas of the district have got duck rearing practice.

Cattle shows are organized regularly by the Animal Husbandry Department to encourage people to possess exotic breeds. Each year, during the observation of the Gosambardhana week cattle shows are organised at different centres of the district.

Fishery :

The district has a number of hill streams and important rivers which are the natural sources of fish supply in the district. Besides these streams and rivers, water area is available from tanks under different Grama Panchayats. The Irrigation projects of the district have also created a water area. Although the district has immense potentialities for the development of inland fishery, it has not yet become an important source of subsidiary income to the local people. Pisciculture has been taken up in some Gram Panchayat tanks. In addition, some private persons have taken up pisciculture in their own tanks.

The inland fish produced annually in the district is consumed internally. In addition to this, marine fish (both fresh and dried) is imported from the Ganjam district of Orissa and from Waltair and Vizianagram of Andhra Pradesh.

The Fisheries Department of the state Government has started fry supply centers in different parts of the district located at Bhawanipatna, Bhatrajore, Baldiamal and Kokasara. Fish breeding is conducted at Bhawanipatna, Bhatrajore and Kokasara. In each subdivision a Fisheries Extension officer has been posted to render technical advice to the pisciculturists.

There are a number of fisherman families in the district who fish from rivers, tanks and swamps and sell them in local markets. Fishery is an important source of livelihood of a number of people living on the banks of the rivers Tel and Indravati in Dharamagarh, and Jayapatna tahasils. The population of fishermen is quite negligible in the district.

Industries :

Manufacturing industry was conspicuous by its absence in the Kalahandi ex-state area. Among cottage industries mention may be made of lac processing, weaving of cotton cloth, pottery, bamboo basket making, mat weaving, construction of plough and solid wheeled carts, making brass ornaments and blacksmithy. All these manufacture were to meet the simple requirement of the villages. In the past, melting of iron ore in charcoal furnaces was widely practised by the "Lohars", but in course of time the cheap factory-made iron almost completely replaced the local products, though the practice is being still adhered to by villagers living close to the basing hills and some parts of the plateau region.

Kalahandi district is industrially one of the most backward districts of Orissa. According to the 1991 Census, only 1.28 per cent of the workers of the district were engaged in manufacturing other than household industry as against 3.51 per cent in the state. Household industry engaged 2.71 per cent of the workers, which, however, was less than the state average of 3.13 per cent.

The district is quite rich in agriculture and forest resources. Moreover, a few mineral resources are also there in the district. In spite of having all those resources the district is industrially very backward.

The slow growth of industries in the district is mainly due to the absence of coal and other sources of power, small extent of mineral resources available, and low production of agricultural raw materials excepting paddy, inadequate infrastructure facilities, lack of skilled workers, shortage of capital and entrepreneurial talent and large percentage of backward people in the district.

For the first time in 1925, a diesel powerhouse was installed in Bhawanipatna. It mainly supplied electricity to the palace and a few other government institutions. After the merger of the ex-state, powerhouse was taken over by the state Government and it introduced a number of modifications in the supply and distribution system. In course of time the diesel powerhouses were closed and electricity was supplied to the district from the state Electricity Grid fed by the Hirakud-Hydro-electric Project.

All the three towns, namely, Bhawanipatna, Kesinga and Junagarh have been electrified including the sub divisional headquarters of Dharamgarh.

There is no large-scale or medium size industry in the district. Whatever other industrial units exist are either in the small-scale or in the household sector. Of the small scale industries most of the units are of conventional type like rice mills, saw mills, etc. Processing units predominate the industrial set up of the district.

Trade and commerce :

The items exported from the district mainly include rice, pulses, oil seeds, cotton and forest produce including lac and hide. The imports to the district include garment, petroleum and kerosene oil, spare parts and building materials etc. The transaction are made in more than 140 regulated or unregulated markets known as hats functioning in the district either daily or weekly or bi-weekly where the sale and purchase are transacted, in addition to daily markets in towns. The Regional Co-operative Marketing Societies with its branches spreading over the sub-divisions take up the distribution of agricultural implements, fertilizer, and pesticide etc. through the Primary Co-operative Society, Service Co-operative and LAMPS. They also take up the procurement of paddy in the district and offer fair price to the cultivators. Some private millers have also participated in procurement operations to procure rice on behalf of State Government. Orissa State Warehousing Corporation has godowns in the district like the Regional Marketing Co-operative Societies. These godowns are utilised for storage of food grains, cement, fertilizers etc. The godowns of private millers are also utilised for storage of Government rice. The Food Corporation of India has got their godowns in the district to store bumper stock of rice, wheat and sugar.

The broad gauge rail of southeastern railway line passes through the district and serves as famine relief measure. The length of railway route in the district is 38 kms. having five railway stations.

Transport :

The district does not fall on the alignment of any National Highways. One of the major district road maintains connection with two of the National Highways (No.6 & 42), which run from Kolkata to Mumbai and Cuttack to Sambalpur respectively. Three state high ways passes through the district and they maintain direct communication with all the adjoining districts. During 1998-99 length of different categories of roads in the district in kilometers for state highway is 176 as against major district road 79, other district road 267, Forest roads 309, Gram Panchayat road 9954, classified village roads 282, Police Station roads 517, village roads 834 and approximately 308 urban roads.

During 1998-99 motor cycles, scooters and mopeds registered in the district numbered 13,709 as against 46 three wheelers and auto rickshaws, 969 jeeps and station wagons, 413 private cars, 138 taxies, 66 contract carriages, 1,053 trucks and lorries, 2,348 tractors and trolleys and 255 miscellaneous vehicles.

Electricity and Power :

All the urban areas of the district have been electrified after independence. But even during the year 1998-99 as many as 1,179 villages have been electrified. Consumption of electricity in the district in million units for domestic in urban areas is 8,696 and in rural areas is 6,748 as against commercial category 2,838 in urban areas and 1,007 in rural areas. The category of consumers consuming electricity for Kutir Jyoti is 2,729 million units as against 1.574 for commercial over 10 KW, 2705 for small scale industries, 1.455 for medium industries, 1.579 for irrigation OLIC, 1.095 for irrigation (Private), 0.274 for public lighting, 0.381 public water works below 100 KW, 0.464 for public institution below 100 KW, 0.825 for large industries below 132 KV, 2.389 for general purpose and negligible million units for other category of consumers.

Panchayati Raj System :

The three- tier Panchayati Raj system was introduced in the state with the enforcement of the Orissa Panchayat Samiti and Zilla Parishad Act, 1959, w.e.f. 26th January, 1961 which was further strengthened with the implementation of Orissa Zilla Parishad Act, 1991 w.e.f. 1st November, 1993. The major objective of the Panchayati Raj System is to entrust the people with the management of local

affairs and develop their capacity for self-governance. In the three tier system of Panchayati Raj, the Panchayat Samiti functions as the inter-mediary between Zilla Parishad at district level and the Gram Panchayat at village level and each of them functions within its own jurisdiction for the development of rural areas of the district for a normal tenure of five years.

Zilla Parishad, the apex body in the district is constituted of the following members. Each Panchayat Samiti in the district elects two members to the Zilla Parishad. Elected Members of Legislative Assembly and Members of Parliament from the district become the members of the Zilla Parishad. Chairmen of all Panchayat Samities of the district, Chairman of the Municipalities/ NACs and Co-operative banks of the district, the district officers of Health, Education, Public Health, Agriculture, Forest, Works and Cooperative development become the ex-officio members of Zilla Parishad. There is reservation of seats for SC and ST members on the basis of proportion of their population while 1/3rd of the seat is reserved for women members including SC and ST women. The members of the Zilla Parishad elect one amongst them as President and another as Vice President. The Collector of the district acts as the Chief Executive Officer. The Zilla Parishad, besides formulating policies for the key areas of rural development in the district, monitors and evaluates the various developmental programmes of the government, which are implemented by the Panchayat Samities in their respective areas of the district.

The Panchayat Samities, which act as the inter-mediary between Zilla Parishad and Gram Panchayats were established throughout the state in accordance with the provisions of the Orissa Panchayat Samiti Act, 1959 and its jurisdiction is coterminous with the area of the Community Development Block. The Block Development Officer is the Executive head of the Samiti. Other Block level officers are the official members. Sarpanchs of all Gram Panchayats within the C.D. Block become non-official members of the Panchayat Samiti. The elected members of the Panchayat Samiti elect one amongst them as the Chairman and another as Vice Chairman, of whom one must be a woman. Panchayat Samities are not only responsible for the planning, execution and supervision of all types of governmental development programmes in their areas but also look after the spread of primary education, management of trust and endowments etc. and all other developmental matters in their respective localities.

The Gram Panchayat at the primary level is constituted of a group of villages, which are divided into wards. The ward members are directly elected by the voters of each ward. The Sarpanch of the Panchayat is elected by the voters of all the wards under the Gram Panchayat and one Naib Sarpanch is elected from amongst the ward members to look after the work of the Panchayat.

This primary unit of democratic de-centralization is the main agency to mobilize the rural manpower. Functions of the Gram Panchayat include sanitation, supply of drinking water, maintenance of ferry ghats and wells, construction and maintenance of Panchayat roads, cattle pounds, providing streetlight and implementing different agricultural schemes in the villages under its jurisdiction.

The names of the Panchayat Samities, number of Gram Panchayats and number of villages under each Panchayat Samiti in the district are given below:

Sl. No.	Name of the Panchayat Samiti	No. of Gram Panchayts under Panchayat Samiti	No. of villages under the Panchayat Samiti
1	2	3	4
1	Golamunda	15	127
2	Dharamgarh	16	72
3	Junagarh	21	168
4	Kokasara	16	70
5	Jayapatna	14	91
6	Kalampur	7	54
7	Thuamul-Rampur	12	298
8	Lanjigarh	12	483
9	Bhawanipatna	23	283
10	Kesinga	19	106
11	Karlamunda	10	62
12	Madarnpur-Rampur	11	249
13	Narla	19	173
	TOTAL :	**195**	**2,236**

(v)Brief description of places of religious, historical or archaeological importance in villages and places of tourist interest of the district

Gudahandi :

Gudahandi is situated in Kokasara block at a distance of 88 kms. from Bhawanipatna on the border of Kalahandi and Nabarangapur district. It is one of the rarest spots of India where the man of the upper Paleolithic age started living. His characteristic mystery over stone flaking and proportionate carving is perceptibly depicted in the pre-historic caves of Gudahandi hills. These Pre-historic caves at a flat surface on the hill top about 250 meters above surrounded by dense vegetation. Paintings on the cave wall are silently eroding yet assert its antiquity. Visible paintings are more or less of geometrical impression of contemporary cottage. These paintings in red ochre of a hunting scene in the Gudahandi cave are characterized by liveliness, movement and perfection. These caves have stood with the Sun and rain since 2500 to 2000 B.C.

Another distinct part of the hill range pre-historic caves are characterized by specific residential motif. The three caves named as 'Raja Paghar', Rani Paghar', and Jogi Paghar carry a tribal lengend behind. The legend is touchy and specific with the fact of tribal dominance and speculation of mass consciousness. Raja (king) of the area averred by a Yogi (saint) antagonised the Kandhas (tribals) and the tribals retaliated by arresting the Raja, Rani and Yogi in the three respective caves known as Pagharas and later burnt all of them to death. Two other queens committed suicide and yet worshipped by the inhabiting tribals as Bada Dukri And Sana Dukri.

Gudahandi is endowed with pleasant surroundings. One km towards north-west Dukri Chan Chara, the luxuriant waterfall frolics through the polished clean plateau. The plateau is an exquisite piece of nature solely constituting of the quartzite stones and perennially moistened by the fall. Nature has fated the spring to fall continuously. Thus one can never resist the stimuli to roll and bathe.

Asurgarh :

It is a dilapidated fort in Lanjigarh Tahasil and 5 kms. away from Narala. The place is surrounded by deep Gadakhai (trenches) to prevent entry of enemies. There are four gates in four sides of the forest and four deities are being worshipped. It is said, it was the fort of Gosingha Daitya (Asur king). It was excavated and many items of historical importance were found.

Belkhandi :

Belkhandi is a picturesque place located near the confluence of river Tel and Utei. It is a famous pilgrim center in Lanjigarh Tahasil and about 67 kms. from Bhawanipatna. The ruins of Belkhandi are found reserved in a small museum adjacent to the temple premises. Among the sculptures that figures of Sapta Matrukas (Seven Mother Goddess) and Uma Maheswari are strikingly noteworthy. The temple dedicated to the Lord Siva draws a large crowd during Sivaratri festival. The temple is said to be of 12th century A.D. It is one of the archaeological treasures of Orissa.

Phularijharana :

It is a perennial waterfall about 15 kms. from Bhawanipatna on Bhawanipatana-Thuamul Rampur Road. The fall is of 60 ft. height and the place is surrounded by evergreen forest. Multi colours of rainbow are visible when the sunrays fall on the scattered water particles of the fall. It has got its special attraction for its scenic beauty. It is also a beautiful picnic spot.

Karlapat :

Karlapat is a small village in Thuamul Rampur Tahasil, 42 kms. from Bhawanipatna. The entire area is declared as wild life sanctuary by forest department. Different wild animals can be seen in bare eye only after sun set. There are two waterfalls named Kanaijhar and Udaya Sagar rushed from the Khandwal hill and Patshar hill.

Junagarh :

Junagarh (literally meaning old fort or old capital) was the seat of the Naga rulers at Kalahandi up to about 1850 A.D. In an Oriya inscription of 1718 A.D.

the place is called Kalahandinagar. Evidence of Junagarh's past glory consists of the remnants of an encircling moat, about a dozen of temples and a few festivities, what was once a deep moat, now either completely silted beyond the recognition or a shallow place breeding mosquitoes. None of the temples exceeding 50 ft. in height are devoid of ornamentations and sculptures. Importance of the local temples relates to the deities namely Lankeswari (the family Goddess of the Naga Rulers), Jagannath, Ramaswami, Balaji, Gopinath, Kanakdurga, Dadhibamana and Budharaja. Besides, there are a number of Siva shrines. There is no trace of the old place, which, it is said, occupied an extensive area. A large number of people from the surrounding country area congregate here to pay their devotion to Goddess Lankeswar on the occasion of 'Khandabase.'

(vi) Census Concepts

Building :

A 'Building' is generally a single structure on the ground. Sometimes it is made up of more than one component unit which are used or likely to be used as dwellings(residences) or establishments such as shops, business houses, offices, factories, workshops, worksheds, Schools, places of entertainment, places of worship, godowns, stores etc. It is also possible that building which have component units may be used for a combination of purposes such as shop-cum-residence,workshop-cum-residence,office-cum-residence,etc.

Usually a structure will have four walls and a roof. But in some areas the very nature of construction of houses is such that there may not be any wall. Such is the case of conical structures where entrance is also provided but they may not have any walls. Therefore, such of the conical structures are also treated as separate buildings.

Permanent houses :

Houses, the walls and roofs of which are made of permanent materials. The material of walls can be any one from the following, namely, galvanized iron sheets or other metal sheets, asbestos sheets, burnt bricks, stones or concrete. Roof may be made of from any one of the following materials, namely, tiles, slate, galvanized iron sheets, metal sheets, asbestos sheets, bricks, stones or concrete.

Semi-permanent houses :

Houses in which either the wall or the roof is made of permanent material and the other is made of temporary material.

Temporary houses :

Houses in which both walls and roofs are made of materials, which have to be replaced frequently. Walls may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, plastic, polythene, mud, unburnt bricks or wood. Roof may be made from any one of the following temporary materials, namely, grass, thatch, bamboo, wood, mud, plastic or polythene.

Dwelling Room :

A room is treated as a dwelling room if it has walls with a doorway and a roof and should be wide and long enough for a person to sleep in, i.e. it should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, bedroom, dining room, drawing room, study room, servant's room and other habitable rooms. Kitchen, bathroom, latrine, store room, passageway and verandah which are not normally usable for living are not considered as dwelling rooms. A room, used for multipurpose such as sleeping, sitting, dining, storing, cooking, etc., is regarded as a dwelling room. In a situation where a census houses is used as a shop or office., etc., and the household also stays in it then the room is not considered as a dwelling room. But if a garage or servant quarter is used by a servant and if she/ he also lives in it as a separate household then this has been considered as a dwelling room available to the servant's household. Tent or conical shaped hut if used for living by any household is also considered as dwelling room.

A dwelling room, which is shared by more than one household, has not been counted for any of them. If two households have a dwelling room each but in addition also share a common dwelling room, then the common room has not been counted for either of the households.

Census House :

A 'Census house' is a building or part of a building used or recognised as a separate unit because of having a separate main entrance from the road or common courtyard or staircase, etc. It may be occupied or vacant. It may be used for residential or non- residential purpose or both.

In certain peculiar situations, the manner in which buildings and census houses were identified for numbering in the field by the enumerators is described hereunder:

Sometimes a series of different buildings are found along a street which are joined with one another by common walls on either side looking like a continuous structure. These different units are practically independent of one another and are likely to have been built at different times and owned by different persons. In such cases, though the whole structure with all the adjoining units apparently appears to be one building, each portion was treated as a separate building and its constituent units as separate census houses.

On the other hand, one may come across cases, particularly in large cities of multi-storeyed ownership flats. In these cases while the structure looks like one building, different persons own the flats. In case of such multi-storeyed structures, having a number of flats owned by different persons, the entire structure was treated as one building and each flat as a separate census house.

If within a large enclosed area, there are separate buildings owned by different persons then each such building is treated as a separate building. There can be a situation where within an enclosed compound there are separate buildings owned by an undertaking or company or even government that are actually in occupation of different persons. For example, Indian Oil Corporation colony where the buildings are owned by the Corporation but these are in occupation of their employees. Each such building was treated as a separate building. But if in any one of these buildings there were flats in occupation of different households, each such flat was reckoned as a separate census house.

Sometimes it becomes difficult to apply the definition of Census house strictly in certain cases. For example, in an urban area, if a flat has five rooms, each room having direct entrance from the common staircase or courtyard. By definition, this has to be treated as five census houses. If all these five rooms are occupied by a single household it was not realistic to treat them as five census houses. In such a case,'singleness' of use of these rooms along with the main house should be considered and the entire flat was treated as one census house. On the other hand, if two independent households occupy these five rooms, the first household living in 3 rooms and the second household occupying 2 rooms, then considering the use, the first three rooms together were treated as one census house and the remaining rooms as another census house. But if each room was occupied by an independent household, then each such room was treated as a separate census house.

In case of hostels, hotels, etc., even if the door of each room in which an inmate lives opens to a common verandah, staircase, courtyard or a common room, as it happens almost invariably, the entire hostel/ Hotel building was treated as one census house. but if such hostels/ hotels have out- houses or other structures used for different purposes or the same purpose, then each such structure attached to the main hostel / hotel was treated as a separate census house.

In some parts of the country, in rural areas, the pattern of habitation is such that a group of huts, located in a compound, whether enclosed or unenclosed, is occupied by one household. While the main residence may be located in one hut, other huts may be used for sleeping, as a kitchen, bath room, baithak, etc. Though each of the huts was a separates structure, they form a single housing unit and therefore, have to be treated collectively as one building and one census house. If some of the huts are used by one household and the others by a second household as residence, then the two groups of huts were treated as separate census houses. However, if there were also other huts in the compound used for other purposes and not as part of the household's residence such as, cattle shed, workshed, etc., these were treated as separate census houses.

On the other hand, in urban areas, where more than one structure within an enclosed or open compound (premises) belonging to the same person, e.g., the main house, the servant's quarter, the garage,

etc., only one building number was given for this group and each of the constituent a separate census house number.

Only cases where a structure with roof and pillars has come up was treated as a building.

Rural-Urban area :

The data in tables on Houses, Household Amenities and Assets are presented separately for rural and urban areas. The unit of classification in this regard is 'town' for urban areas and 'village' for rural areas. In the Census of India 2001, the definition of urban area adopted is as follows:

a) All places with a municipality, corporation, cantonment board or notified town area committee, etc.

b) A place satisfying the following three criteria simultaneously:

   i) A minimum population of 5,000;

   ii) At least 75 per cent of male working population engaged in non-agricultural pursuits; and

   iii) A density of population of at least 400 per sq. km.(1,000 per sq.mile)

For identification of places which would qualify to be classified as 'urban' all villages, which, as per the 1991 Census had a population of 4,000 and above, a population density of 400 persons per sq. km. and having at least 75 per cent of male working population engaged in non-agricultural activity were considered. To work out the proportion of male working population referred to above against b) (ii), the data relating to main workers were taken into account.

Apart from these, the outgrowths(OGs) of cities and towns have also been treated as urban under 'Urban Agglomerations'. Examples of out-growths are railway colonies, university campuses, port areas, military camps, etc., that may have come up near a statutory town or city but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the demographic criteria laid down at (b) above to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the towns as a continuous urban spread. Thus, the town level data, wherever presented, also includes the data for outgrowths of such towns.

City :

Towns with population of 1,00,000 and above are called cities.

Urban Agglomeration :

An Urban Agglomeration is a continuous urban spread constituting a town and its adjoining urban outgrowths (OGs) or two or more physically contiguous towns together and any adjoining urban outgrowths of such towns. In some cases railway colonies, university campuses, port areas, etc., may come up near a city or statutory town outside its statutory limits but within the revenue limits of a village or villages contiguous to the town or city. Each such individual area by itself may not satisfy the minimum population limit to qualify it to be treated as an independent urban unit but may deserve to be clubbed with the town as a continuous urban spread. For the purpose of delineation of Urban Agglomerations during Census of India 2001, following criteria are taken as pre-requisites:(a) The core town or at least one of the constituent towns of an urban agglomeration should necessarily be a statutory town ; and (b) The total population of all the constituents (i.e., towns and outgrowths) of an Urban Agglomeration should not be less than 20,000 (as per the 1991 Census). With these two basic criteria having been met, the following are the possible different situations in which Urban Agglomerations would be constituted : i) a city or town with one or more contiguous outgrowths; ii) two or more adjoining towns with their outgrowths; and iii) a city and one or more adjoining towns with their outgrowths all of which form a continuous spread.

Household :

A 'household' is usually a group of persons who normally live together and take their meals from a common kitchen unless the exigencies of work prevent any of them from doing so. Persons in a household may be related or unrelated or a mix of both. However, if a group of unrelated persons live in a census house but do not take their meals from the common kitchen, then they are not constituent of a common household. Each such person was to be treated as a separate household. The important link

in finding out whether it was a household or not was a common kitchen. There may be one member household, two member households or multi-member households.

Institutional household :

A group of unrelated persons who live in an institution and take their meals from a common kitchen is called an Institutional Household. Examples of Institutional Households are boarding houses, messes, hostels, hotels, rescue homes, jails, ashrams, orphanages, etc. To make the definition more clearly perceptible to the enumerators at the Census 2001, it was specifically mentioned that this category or households would cover only those households where a group of unrelated persons live in an institution and share a common kitchen.

Houseless household :

Households who do not live in buildings or census houses but live in the open on roadside, pavements, in hume pipes, under fly-overs and staircases, or in the open in places of worship, mandaps, railway platforms, etc., are treated as Houseless Households.

Scheduled Castes and Scheduled Tribes :

Article 341 of the Constitution provides that the President may, with respect to any State or Union territory, specify the castes, races or tribes or parts of or groups within castes, races or tribes which shall for the purposes of the Constitution be deemed to be Scheduled Castes in relation to that State or Union territory. Article 342 similarly provides for specification of tribes or tribal communities or parts of or groups within tribes or tribal communities which are to be deemed for the purposes of the Constitution to be Scheduled Tribes in relation to the various States and Union territories. In pursuance of these provisions, the list of Scheduled Castes and / or Scheduled Tribes are notified for each State and Union territory and are valid only within the jurisdiction of that State or Union territory and not outside.

It is important to mention here that under the Constitution (Scheduled Castes) Order, 1950, no person who professed a religion different from Hinduism was deemed to be a member of a Scheduled Caste in addition to every member of the Ramdasi, Kabirpanthi, Majhabi or Sikligar caste resident in Punjab or Patiala and East Punjab States Union were in relation to that State whether they professed the Hindu or the Sikh religion. Subsequently, in September 1956, by an amendment, the Presidential Order of 1950 and in all subsequent Presidential Orders relating to Scheduled Castes, the Hindu and the Sikh religions were placed on the same footing with regard to the specification of Scheduled Castes. Later on, as per the amendment made in the Constitution (Scheduled Castes) Order 1990, the Hindu, the Sikh and the Buddhist were placed on the same footing with regard to the recognition of the Scheduled Castes.

The lists containing the names of the Scheduled Castes and the Scheduled Tribes applicable for the Census of India 2001 in the State are given below:

Scheduled Castes List for Orissa :

1. Adi Andhra
2. Amant, Amat
3. Audhelia
4. Badaik
5. Bagheti, Baghuti
6. Bajikar
7. Bari
8. Bariki
9. Basor, Burud
10. Bauri
11. Bauti
12. Bavuri
13. Bedia, Bejia
14. Beldar
15. Bhata
16. Bhoi
17. Chachati
18. Chakali
19. Chamar, Mochi, Muchi, Satnami
20. Chandala
21. Chandhai Maru
22. Cherua, Chhelia

23. Dandasi
24. Dewar
25. Dhanwar
26. Dhoba, Dhobi
27. Dom, Dombo, Duria Dom
28. Dosadha
29. Ganda
30. Ghantarghada, Ghantra
31. Ghasi,Ghasia
32. Ghogia
33. Ghusuria
34. Godagali
35. Godari
36. Godra
37. Gokha
38. Gorait, Korait
39. Haddi, Hadi, Hari
40. Irika
41. Jaggali
42. Kandra, Kandara
43. Karua
44. Katia
45. Kela
46. Khadala
47. Kodalo, Khodalo
48. Kori
49. Kummari
50. Kurunga
51. Laban
52. Laheri
53. Madari
54. Madiga
55. Mahuria
56. Mala,Jhala,Malo,Zala
57. Mang
58. Mangan
59. Mehra,Mahar
60. Mehtar, Bhangi
61. Mewar
62. Mundapotta
63. Musahar
64. Nagarchi

Language and Mother tongue :

As per the Census Concept, each language is a group of mother tongues. The Census questionnaire collects information on the mother tongue of each person and mother tongue is defined as the language spoken in childhood by the person's mother to the person. If the mother died in infancy, the language mainly spoken in the person's home in childhood will be the mother tongue. In the case of infants and deaf

mutes, the language usually spoken by the mother is considered as mother tongue. It is not necessary that the language spoken as mother tongue should have a script. The mother tongues returned by the respondents in census are classified and grouped under appropriate languages according to their linguistic characteristics.

Literate :

A person aged 7 years and above who can both read and write with understanding in any language is taken as literate. A person who can only read but cannot write is not literate. It is not necessary that to be considered as literate, a person should have received any formal education or passed any minimum educational standard. Literacy could also have been achieved through adult literacy classes or through any non-formal educational system. People who are blind and can read in Braille are treated as literates.

Literacy rate :

Literacy rate of the population is defined as the percentage of literates in the age group seven years and above. For different age groups the percentage of literates in that age group gives the literacy rate.

Educational level :

The highest level of education a person has completed

Work :

Work is defined as participation in any economically productive activity with or without compensation, wages or profit. Such participation may be physical and/or mental in nature. Work involves not only actual work but also includes effective supervision and direction of work. It even includes part time help or unpaid work on farm, family enterprise or in any other economic activity. All persons engaged in 'work' as defined above are workers. Persons who are engaged in cultivation or milk production even solely for domestic consumption are also treated as workers. Reference period for determining a person as worker and non-worker is one year preceding the date of enumeration.

Main worker :

A person who has worked for major part of the reference period (i.e. six months or more during the last one year preceding the date of enumeration) in any economically productive activity is termed as 'Main worker'.

Marginal worker :

A person who worked for less than six months of the reference period (i.e. in the last one year preceding the date of enumeration) in any economic activity is termed as 'Marginal worker'.

Non-worker :

A person who has not worked at all in any economically productive activity during the reference period (i.e. last one year preceding the date of enumeration) is termed as 'Non-worker'.

Cultivator :

For purposes of the Census a person is classified as cultivator if he or she is engaged in cultivation on land owned or held from government or held from private persons or institutions for payment in money, kind or share. Cultivation includes effective supervision or direction in cultivation. A person who has given out her/his land to another person or persons or institution(s) for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation in exchange of land, is not treated as cultivator. Similarly, a person working on another person's land for wages in cash or kind or a combination of both (agricultural labourer) is not treated as cultivator. Cultivation involves ploughing, sowing, harvesting and production of cereals and millet crops such as wheat, paddy, jowar, bajra, ragi, etc., and other crops such as sugarcane, tobacco, ground-nuts, tapioca, etc., and pulses, raw jute and kindred fiber crop, cotton, cinchona and other medicinal plants, fruit growing, vegetable growing or keeping orchards or groves, etc. Cultivation does not include the following plantation crops – tea, coffee, rubber, coconut and betel-nuts (areca).

Agricultural labourer :

A person who works on another person's land for wages in money or kind or share is regarded as an agricultural labourer. She/He has no risk in the cultivation, but merely works on another person's land for wages. An agricultural labourer has no right of lease or contract on land on which she/he works.

Household Industry worker :

Household industry is defined as an industry conducted by the head of the household herself/himself and or by the members of the household at home or within the village in rural areas and only within the precincts of the house where the household lives in urban areas. The larger proportion of workers in household industry should consist of members of the household including the head. The industry should not be run on the scale of a registered factory which would qualify or has to be registered under the Indian Factories Act and should be engaged in manufacturing, processing, servicing and repairs of goods. It does not include professions such as a pleader, Doctor, Musician, Dancer, Waterman, Astrologer, Dhobi, Barber, etc. or merely trade or business, even if such professions, trade or services are run at home by members of the household.

Other worker :

A person who has been engaged in some economic activity during the reference period but not as a cultivator or agricultural labourer or in Household Industry is termed as a 'Other Worker (OW)'. The type of workers that come under this category of 'OW' include all government servants, municipal employees, teachers, factory workers, plantation workers, those engaged in trade, commerce, business, transport, banking, mining, construction, political or social work, priests, entertainment artists, etc. In effect, all those workers other than cultivators or agricultural labourers or household industry workers, are 'Other Workers'.

Work participation rate :

Percentage of workers (main + marginal) to total population.

Population density :

Population density is the number of persons inhabited per square kilometre of the area.

Age :

Age is measured in terms of the completed number of years

Sex-ratio :

Number of females per 1,000 males in a population.

(vii) Non-Census Concepts

Improved drinking water :

If the household had access to drinking water supplied from a tap, hand pump, tube well or well (protected or covered) situated within or outside the premises, it is considered as having access to improved drinking water.

It may be mentioned that such uniform definition may not be valid across all States.

System of sewerage :

Generally, a sewerage system would mean a network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastage are called separate sewers; those that carry storm water from roofs, streets and other surfaces are known as storm water drains, while those carrying both sewage and storm water are called combined sewers. However, in some towns, which are not provided with such underground sewerage system, it is served by open surface drain, box drain, silk pattern drain, etc., in these towns.

Type of latrine and Method of disposal of night soil.

There are three prevalent systems of disposal of human wastes, viz. :

(i) underground sewerage,

(ii) sanitary water flush latrines with individual disposal systems, like septic tank, leaching cess pool and collecting well, and

(iii) dry type of latrines with manual scavenging.

The system of underground sewerage provides for the street sewerage with which are connected the sanitary latrines constructed in the houses having water closets and fitted with flushing cistern (or hand flushing). Through this sewer the fecal matter is transported without the need for scavenging. This system generally exists in cities and big towns.

Where the street sewer does not exist, these sanitary water flush latrines are connected to a local septic tank with a sub-soil dispersion system or a leaching pit. Here the liquid wastes from the water closet is disposed of locally in leaching pit, a septic

tank with a soil dispersion system is constructed. This dispersion requires an optimum travel through the pores of the soil, which renders the harmful liquid bacterially innocuous by the slow process of filtration through the soil traversed.

Where the soil is impermeable, collecting wells are constructed and the sanitary water flush latrines are connected with them. These wells are cleaned at periodic intervals by a suitable device. The dry type of latrines are of service type latrines from where human excreta is removed by scavengers from house to house, in most cases carrying it on their heads or shoulders or in baskets with handle or wheel barrows. These are then collected in bullock carts or trucks or tractors and trolleys for being carried to the dumping grounds.

Fertility :

In demography, the word fertility is used in relation to the actual production of children or occurrence of births specially live births. Fertility is a measure of rate at which population adds to itself by births and normally assessed by relating the number of births to a full or part of the population, such as number of married women or number of women of child-bearing age. The definitions of the terminology used in computing different fertility rates are mentioned below:

Crude birth rate (CBR) :

Ratio of the number of live births in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CBR} = \frac{\text{Number of live births during the year}}{\text{Mid–year Population}} \times 1{,}000$$

Crude death rate (CDR) :

Ratio of the number of deaths in a year to the mid year population, normally expressed per 1,000 population.

$$\text{CDR} = \frac{\text{Number of deaths during the year}}{\text{Mid-year Population}} \times 1{,}000$$

Natural growth rate :

Growth rate is obtained as the difference between crude birth rate and crude death rate in the absence of migration.

Age specific fertility rate (ASFR) :

Number of live births in a year to female population in any specified age-group normally expressed per 1,000 women.

$$\text{ASFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year female population of the same age-group}} \times 1{,}000$$

Age specific marital fertility rate (ASMFR) :

Number of live births in a year to married female population in any specified age-group normally expressed per 1,000 married women.

$$\text{ASMFR} = \frac{\text{Number of live births in a particular age-group}}{\text{Mid-year married female population of the same age-group}} \times 1{,}000$$

General fertility rate (GFR) :

Number of live births per 1,000 women in the reproductive age-group (15-49) years in a given year.

$$\text{GFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year female population in the age-group (15-49) years}} \times 1{,}000$$

General marital fertility rate (GMFR) :

Number of live births per 1,000 married women in reproductive age-group (15-49) years in a given year.

$$\text{GMFR} = \frac{\text{Number of live births in a year}}{\text{Mid-year married female population in the age-group (15-49) years}} \times 1{,}000$$

Total fertility rate (TFR) :

It is obtained as the total of the age specific fertility rates (number of children born per woman of the particular age) for the entire reproductive age span. It provides the average number of children that will be born to a woman under the fertility levels indicated by the age specific fertility rates assuming that there is no mortality of women till the completion of reproductive period.

$$TFR = \frac{5 \times \sum^{45-49} ASFR_{15-19}}{1{,}000}$$

Total marital fertility rate (TMFR) :

Average number of children that would be born to a married woman if she experiences the current fertility pattern throughout her reproductive span (15-49) years assuming that there is no mortality of women till the completion of reproductive period.

$$TMFR = \frac{5 \times \sum^{45-49} ASMFR_{15-19}}{1{,}000}$$

Age-specific mortality rate (ASMR) :

Number of deaths in a particular age and sex group per 1000 population of the same age-group.

$$ASMR = \frac{\text{Number of deaths in a particular age-group}}{\text{Mid-year population of the same age-group}} \times 1{,}000$$

q1 :

Probability of dying between birth and age 1. This can be used as approximate value of Infant Mortality Rate (IMR) which gives the ratio of number of deaths in a year of children aged less than one year to the number of births in that year.

q2 :

Probability of dying between birth and age 2.

q5 :

Probability of dying between birth and age 5. This indicator is also known as Under Five Mortality Rate (U5MR).

Infant mortality rate (IMR) :

Ratio of the number of infant deaths (deaths of children below one year) in a year to the number of live births in that year.

$$IMR = \frac{\text{Number of infant deaths during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Infant mortality rate comprises of two parts, viz., Neo-natal mortality rate and Post neo-natal mortality rate. The neo-natal mortality rate also comprises of two parts viz., Early neo-natal mortality rate and late neo-natal mortality rate. These are defined as:

Neo-natal mortality rate (NMR) :

Number of infants dying within the first month of life (28 days or under) in a year per 1,000 live births of the same year.

$$NMR = \frac{\text{Number of infant deaths aged 28 days or under during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

i) Early neo- natal mortality rate :

$$= \frac{\text{Number of infant deaths of less than 7 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

ii) Late neo-natal mortality rate :

$$= \frac{\text{Number of infant deaths of 7 days to less than 29 days during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Post neo-natal mortality rate (PNMR) :

$$= \frac{\text{Number of deaths of 29 days to less than One year during the year}}{\text{Number of live births during the year}} \times 1{,}000$$

Peri-natal mortality rate (PMR) :

Number of still births plus deaths within 1st week of delivery per 1000 births in a year.

$$PMR = \frac{\text{Number of still births and infant deaths of less than 7 days during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Still birth rate (SBR) :

$$= \frac{\text{Number of still births during the year}}{\text{Number of live births and still births during the year}} \times 1{,}000$$

Maternal mortality rate (MMR) :

Number of deaths of women in the age-group 15-49 while pregnant or within 42 days of termination of pregnancy from any cause related to pregnancy and child birth per 1,00,000 live births in a given year.

$$\text{MMR} = \frac{\text{Number of maternal deaths to women in the age group 15-49}}{\text{Number of live birth}} \times 1{,}00{,}000$$

Eligible couple (Couples per 1,000 population) :

Number of currently married females in the age-group 15-44 years per 1,000 persons of all ages.

Child woman ratio (0-4) :

1. Number of children in the age-group 0-4 years per 1,000 women in the age-group 15-49 years.

Child woman ratio (5-9) :

2. Number of children in the age-group 5-9 years per 1,000 women in the age-group 15-49 years.

Civic status of urban units :

Civic Status of a town/city is determined on the basis of Civic Administrative authority of the town e.g., Municipal Corporation/Corporation, Municipal Committee/Municipal council, Municipality etc.

Size class of UA/town :

Size-class of UA/Town is based on the population size of the UA/City/Town UAs/Towns with 100,000 and above population are classified as Class I UAs/ Towns. These Class I UAs./Towns are now further sub classified into seven sub classes namely M1 to M7 depending on the population size of UA/City/Town. These are :

M7 (5,000,000 and above);

M6 (2,000,000 to 4,999,999);

M5 (1,000,000-1,999,999);

M4 (500,000-999,999);

M3 (300,000-499,999);

M2 (200,000-299,999); and

M1 (100,000-199,999).

Towns with 50,000 to 99,999 population are classified as Class II towns, 20,000 to 49,999 population are Class III towns, population with 10,000-19,999 are Class IV towns, population with 5,000 and 9,999 are Class V towns and towns with less than 5,000 population are Class VI towns.

Slum area :

The Slum Areas (Improvement and Clearance) Act, 1956, which was enacted by the Central Government defined slums as a) Areas where buildings are in any respect unfit for human habitation; or b) are by reasons of dilapidation, overcrowding, fault arrangement and design of such buildings, narrowness or faulty arrangement of streets, lack of ventilation, light or sanitation facilities, or any combination of these factors, are detrimental to safety, health or morals.

Mega city :

The concept of 'Mega city' is a recent phenomenon in the Urban Sociology and is defined in term of metropolitan city in the form of large size, problem of management of civic amenities and capacity to absorb the relatively high growth of population. Indian Census in 1991 treated the population size of 5 million and above as the cut off point to identify a place as the mega city. Whereas, for the purpose of inclusion in Centrally Sponsored Scheme for Infrastructure Development in Mega cities the Ministry of Urban Affairs and employment, Department of Urban Development adopted the criteria of 4 million and above population as per 1991 Census for Mega Cities. In 2001 Census, cities with 10 millions and above population have been treated as Mega cities.

(viii) 2001 Census findings - Population, its distribution

(a) Distribution of population in rural-urban areas:

The distribution of population in Rural-Urban areas in the District shows that, majority of population live in rural areas. The total population of the district is 1,335,494 with 1,235,275 rural and 100,219 urban

population. The share of urban population in the district is 7.50 percent compared to the state urban population share of 14.99 percent. There are 2,236 villages, out of which 137 villages are uninhabited. The village area covers 92.5 percent of total population in the district.

(b) Size class and status of towns, population growth, density, sex ratio, work participation rate and literacy :

There are three statutory towns and one census town located in the district. The population of these towns are Bhawanipatna(M) 60,787, Kesinga (NAC) 16,917, Junagarh(NAC) 15,759 and Mukhiguda (CT) 6,756. So far as the size of the towns are concerned, Bhawanipatna(M) is categorised under class II towns which is in the range of 50,000 to 99,999 population. Kesinga (NAC) and Junagarh (NAC) belong to class IV category which is in the range of 20,000-49,999 population. Mukhiguda(CT) comes under class V category in the range of 5,000 to 9,999 population of towns.

While comparing the growth of population of four towns with 1991 Census, it is seen that, Mukhiguda(CT) has the highest growth rate of 42.05 percent and Bhawanipatna (M) has the lowest growth rate of 19.05 per cent. The density of population in the towns of the district is 2,102 while the density of urban population in the state is 1,975.

The urban sex ratio of the district is 930 whereas the rural sex ratio is 1,007 and district total sex ratio is 1,001.

The District literacy rate is 45.94 percent for total, 62.66 percent for males and 29.28 percent for females, which is less than the state average in the respective category. In the urban areas, the literacy percentage is higher than those of rural areas due to better educational facilities available in the town areas. In the urban areas, Mukhiguda (CT) has the highest literacy rate of 80.96 percent and Kesinga (NAC) has the lowest literacy rate of 64.21 percent. In the rural areas, Karlamunda and Narla CD Block have equal percentage of literacy rate with 55.1 per cent each and both tops the list in the district whereas Thuamul-Rampur CD Block is at the bottom with 28.1percent literacy.

The work participation rate in the district is 46.5 percent in comparison to the state average of 38.79 percent. Jayapatna police station has the highest work participation rate of 54 per cent and Sadar and Kesinga police station both at the bottom for work participation rate of 41.9 per cent each. In the rural areas, the work participation rate is 47.7 percent and in the urban areas, the work participation rate is 31.1 percent.

(ix) Analysis of Primary Census Abstract Data

The inset tables in the District Census Handbooks based on Primary Census Abstract data have been quite useful for the data users, planners and administrators etc. This is a novel feature of Census which aims at providing a brief analysis of Primary Census Abstract data and help the data users to get an insight into the gamut of Census in a nutshell. Each inset table reflects a separate feature on various demographic features of the district and its parts.

TABLE 1 : DECADAL CHANGE IN POPULATION OF POLICE STATIONS BY RESIDENCE, 1991-2001

Serial number	Police Station	Population						Percentage decadal variation 1991-2001			Percentage urban population	
		1991			2001						1991	2001
		Total	Rural	Urban	Total	Rural	Urban	Total	Rural	Urban		
1	2	3	4	5	6	7	8	9	10	11	12	13
1	Kokasara	116,741	116,741	0	137,739	137,739	0	18.0	18.0	0.0	0.0	0
2	Dharamgarh	102,292	102,292	0	118,965	118,965	0	16.3	16.3	0.0	0.0	0
3	Kegaon	74,635	74,635	0	83,307	83,307	0	11.6	11.6	0.0	0.0	0
4	Sadar	157,655	106,593	51,062	187,121	126,334	60,787	18.7	18.5	19.0	32.4	32.5
5	Kesinga	102,462	88,335	14,127	120,521	103,604	16,917	17.6	17.3	19.7	13.8	14
6	Narala	79,879	79,879	0	94,598	94,598	0	18.4	18.4	0.0	0.0	0
7	Madanpur Rampur	98,463	98,463	0	116,655	116,655	0	18.5	18.5	0.0	0.0	0
8	Lanjigarh	42,423	42,423	0	52,210	52,210	0	23.1	23.1	0.0	0.0	0
9	Thuamul Rampur	55,777	55,777	0	65,767	65,767	0	17.9	17.9	0.0	0.0	0
10	Junagarh	161,150	148,176	12,974	190,790	175,031	15,759	18.4	18.1	21.5	8.1	8.3
11	Jayapatna	139,426	139,426	0	167,821	161,065	6,756	20.4	15.5	100.0	0.0	4
	District Total:	**1,130,903**	**1,052,740**	**78,163**	**1,335,494**	**1,235,275**	**100,219**	**18.1**	**17.3**	**28.2**	**6.9**	**7.5**

Table- 1 presents the decadal change in population of police stations by residence during the year 1991-2001. The population of the district as recorded in 2001 Census stands at 1,335,494 as against 1,130,903 in 1991 indicating a net addition of 204,591 persons during the decade. The decadal growth rate of the district works out to 18.1 percent as compared to the state average of 16.25 percent. Within the district, the highest growth rate (23.1 %) is seen in Lanjigarh police station and lowest growth rate (11.6%) in Kegaon police station. The majority of population in the district lives in rural areas and only 7.50 per cent in urban areas as per 2001 Census, which is slightly higher than 6.91 per cent of urban population in 1991 Census. The growth rate of urban population is highest (21.5%) in Junagarh police station and lowest (19.0%) in Sadar police station. It is also evident from the table that out of the total 11 police stations in the district, the highest population 190,790 is found in Junagarh Police Station.

TABLE 2: NUMBER AND PERCENTAGE OF INHABITED VILLAGES IN SPECIFIED POPULATION SIZE RANGES WITH THE RELATED POPULATION , 2001

Serial number	District / C.D. block	Total number of inhabited villages	Total rural population			Number and percentage of villages	Population less than 200	
			Persons	Males	Females		Males	Females
1	2	3	4	5	6	7	8	9
1	Golamunda	124	107,377	53,587	53,790	23 (18.5)	1,385	1,451
2	Dharamgarh	71	116,599	58,664	57,935	0 (0.0)	0	0
3	Junagarh	162	147,832	73,785	74,047	33 (20.4)	1,699	1,698
4	Kokasara	69	104,234	51,759	52,475	1 (1.4)	16	19
5	Jayapatna	90	108,531	53,565	54,966	4 (4.4)	234	240
6	Kalampur	54	52,534	26,002	26,532	6 (11.1)	429	410
7	Thuamul-Rampur	278	65,767	32,483	33,284	157 (56.5)	7,786	8,150
8	Lanjigarh	429	75,145	37,077	38,068	313 (73.0)	13,066	13,838
9	Bhawanipatna	268	140,431	69,966	70,465	71 (26.5)	3,372	3,450
10	Kesinga	99	97,861	48,938	48,923	2 (2.0)	110	131

Table –2 gives CD Block wise distribution of inhabited villages by number and percentage as per the specified population size ranges varying between less than 200 to 10,000 and above. The maximum number of 769 (36.6 per cent) villages are covered under the population size range less than 200 followed by 502 (23.9 per cent) villages with population size range 200-499. Both the villages with these population size ranges constitute 60.5 per cent of the total 2,099 inhabited villages in the district.. So far as the villages having 5,000 population or more are concerned, there are only 5 villages in the district. No village in the district has more than 10,000 populations.

TABLE – 3 : NEW TOWNS, DENOTIFIED, DECLASSIFIED AND MERGED TOWNS IN 2001 CENSUS

Name of Town	
1	
(a) New	
(i) Statutory town	Nil
1	
2	
3	
(ii) Census town	
1	Mukhiguda(CT)
2	
3	
(b) Denotified	Nil
(c) Declassified	Nil
(d) Wholly merged with other town(s)	Nil

In 1991 Census, there were three Statutory Towns in the district namely Junagarh Town(NAC), Bhawanipatna Town (M) and Kesinga Town (NAC). In 2001 Census, one Census town i.e.Mukhiguda Town(CT) is added enhancing its number to four towns in the district. Earlier in the 1991 Census, the percentage of urban population was 6.91per cent, which increased marginally to 7.50 per cent in 2001 Census.

TABLE 4 : DISTRIBUTION OF VILLAGES BY POPULATION DENSITY, 2001

Range of population density (per square kilometer)	Total number of villages in each population density range	Percentage of villages in each population density range	Population	Percentage distribution of population
1	2	3	4	5
0-10	34	1.6	1,366	0.1
11-20	23	1.1	771	0.1
21-50	99	4.7	7,393	0.6
51-100	217	10.3	32,127	2.6
101-200	560	26.7	201,552	16.3
201-300	535	25.5	419,269	33.9
301-500	438	20.9	432,472	35.0
501 +	193	9.2	140,325	11.4
Not known	0	0.0	0	0.0
District Total:	**2,099**	**100.0**	**1,235,275**	**100.0**
Population Density (Rural) of the district:		**243.2**		

The grouping of villages on the basis of density of population (per square kilometer) is displayed in Table -4. The population density (rural) of the district is 243.2 and maximum population i.e 35.0 percent of the population live in the density range of 301-500. Taking the number of villages the highest percentage i.e. 26.7 per cent of villages are covered under the density range of 101-200 followed by 25.5 per cent villages under the density range 201-300 and 20.9 per cent of villages under the density range 301-500. A negligible percentage of villages i.e., 1.1 per cent are under the density range 11-20 and 1.6 per cent villages are under the density range 0-10.

TABLE 5 : SEX RATIO OF STATE AND DISTRICT, 1901-2001

Census Year	State			District		
	Total	Rural	Urban	Total	Rural	Urban
1	2	3	4	5	6	7
1901	1,037	1,039	967	1,004	1,005	892
1911	1,056	1,058	947	1,024	1,025	982
1921	1,086	1,089	963	1,031	1,031	984
1931	1,067	1,071	924	1,035	1,036	1,014
1941	1,053	1,058	914	1,035	1,035	1,028
1951	1,022	1,029	881	1,023	1,024	965
1961	1,001	1,015	807	1,020	1,022	943
1971	988	1,002	845	1,010	1,710	923
1981	981	999	859	1,009	1,015	924
1991	971	988	866	999	1,006	918
2001	972	987	895	1,001	1,007	930

Note : Sex ratio has been defined here as the number of females per 1,000 males

Table – 5 gives a comparative picture of sex ratio reported over the Censuses from 1901 to 2001 for both the state and the district. The sex ratio of the district is 1,001 in 2001 and it is higher compared to the state average of 972. The sex ratio of the district is found to be consistently lower than the state from 1901 to 1941 but from 1951 and onwards the district sex ratios lay above the state sex ratio till 2001. The decline of sex ratio in the state and district from 1901 to 2001 is 65 and 3 respectively. As regards the rural areas of the state and the district, the sex ratio has declined by 52 and increased by 2 respectively during the last 100 years. However, in urban areas, there is a fluctuating trend of increase and decrease between the Censuses in the state and in the district. The over all sex ratio for both the state and the district have shown a fluctuating trend during the Census periods since 1901.

TABLE 6 : SEX RATIO BY POLICE STATION, 2001

Serial number	Name of Tahasil	Sex ratio		
		Total	Rural	Urban
1	2	3	4	5
1	Kokasara	1,014	1,014	
2	Dharamgarh	982	982	
3	Kegaon	1,018	1,018	
4	Sadar	975	1,001	921
5	Kesinga	995	999	971
6	Narala	998	998	
7	Madanpur Rampur	995	995	
8	Lanjigarh	1,030	1,030	
9	Thuamul Rampur	1,025	1,025	
10	Junagarh	1,000	1,004	961
11	Jayapatna	1,016	1,024	846
	District Total:	**1,001**	**1,007**	**930**

Table- 6 shows sex ratio of population by police stations as per 2001 Census. In the district, there are 1,001 females per 1000 males. However there is a great variation between rural and urban sex ratio in the district, which is 1,007 in rural areas and 930 in urban areas. In rural areas, Lanjigarh police station has recorded the highest sex ratio of 1,030 and Dharamgarh police station has the lowest sex ratio of 982. Among the towns, Kesinga has got the highest sex ratio of 971 whereas Jayapatna has the lowest sex ratio of 846 in the district

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	'2	'3
1	Golamunda	1,004
2	Dharamgarh	988
3	Junagarh	1,004
4	Kokasara	1,014
5	Jayapatna	1,026
6	Kalampur	1,020
7	Thuamul-Rampur	1,025
8	Lanjigarh	1,027

TABLE 7 : SEX RATIO BY CD BLOCKS, 2001

Serial number	Name of C D block	Sex ratio
1	'2	'3
9	Bhawanipatna	1,007
10	Kesinga	1,000
11	Karlamunda	993
12	Madanpur-Rampur	996
13	Narala	994
	District (Rural) Total:	**1,007**

Table- 7 depicting the C.D. Block-wise sex ratio gives a little different figure as compared to police station level sex ratio. Lanjigarh C.D. Block has the highest sex ratio of 1,027 followed by Jayapatna (1,026), Thuamul-Rampur (1,025), Kalampur(1,020) and Kokasara (1,014) C.D. Blocks. Other eight CD Blocks have sex ratio either equal to or less than the district level (rural) sex ratio of 1,007.

TABLE 8 : SEX RATIO OF RURAL POPULATION BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage of villages in each range	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	40	1.9	4,128	0.3
700-749	16	0.8	2,487	0.2
750-799	32	1.5	4,675	0.4
800-849	58	2.8	7,895	0.6
850-899	104	5.0	39,365	3.2
900-949	190	9.1	123,147	10.0
950-999	398	19.0	369,024	29.9
1,000-1,099	790	37.6	573,323	46.4
1,100+	471	22.4	111,231	9.0
District Total:	**2,099**	**100.0**	**1,235,275**	**100.0**

Sex ratio (Rural) for District : 1007

Table-8 is giving the distribution of rural population as per sex ratio by ranges. It shows that the largest number 790 (37.6%) of villages in the district have sex ratio in the range of 1,000-1,099. 471 (22.4%) number of villages in the district fall in the sex ratio range of 1,100+ sex ratio and 398 villages in the district are in the sex ratio range of 950-999. It is therefore seen that sex ratio is 55.4 per cent in favour of females and 44.6 per cent in favour of males in the district.

TABLE 9 : SEX RATIO OF URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A./ Town	Urban status of town	Sex ratio
1	'2	3	4
1	Bhawanipatna	M	921
2	Junagarh	NAC	961
3	Kesinga	NAC	971
4	Mukhiguda	CT	846
	Sex ratio (Urban) for the district:		**930**

As per Table 9, the sex ratio (930) of urban area i.e, in towns/Urban Agglomerations is quite lower than the sex ratio in rural areas (1,007). The lowest sex ratio of (846) is seen in Mukhiguda (CT) and the highest sex ratio (971) is seen in Kesinga (NAC).

TABLE 10 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR POLICE STATIONS, 2001

	District Total:	**Total**	**217,889**	**109,807**	**108,082**	**984**
		Rural	**204,565**	**103,079**	**101,486**	**985**
		Urban	**13,324**	**6,728**	**6,596**	**980**

Table-10, displays the sex ratio of population in the age group 0-6 for police stations in the district. The sex ratio in 0-6 age group is found to vary between 967 to 1,035 among the police stations. The highest sex ratio of 1,035 is found in Thuamul-Rampur police station followed by Lanjigarh(1,032) and Kokasara (994). The sex ratio in rural areas (985) is higher than the sex ratio in urban areas (980) of the district. The district sex ratio in 0-6 age group is higher in total, rural and urban areas than that of the state sex ratio in the same age group.

TABLE 11 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 FOR C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population in 0-6 age group			Sex ratio for 0-6 age group
		Persons	Males	Females	
1	'2	3	4	5	6
1	Golamunda	17,216	8,695	8,521	980
2	Dharamgarh	18,863	9,543	9,320	977
3	Junagarh	23,767	12,103	11,664	964
4	Kokasara	16,552	8,316	8,236	990
5	Jayapatna	17,962	8,966	8,996	1,003
6	Kalampur	8,253	4,196	4,057	967
7	Thuamul-Rampur	14,061	6,908	7,153	1,035
8	Lanjigarh	15,318	7,588	7,730	1,019
9	Bhawanipatna	22,974	11,593	11,381	982
10	Kesinga	14,808	7,500	7,308	974
11	Karlamunda	7,963	4,059	3,904	962
12	Madanpur-Rampur	10,974	5,566	5,408	972
13	Narala	15,854	8,046	7,808	970
	District (Rural) Total:	**204,565**	**103,079**	**101,486**	**985**

As per Table-11, amongst thirteen CD Blocks of the district, the highest sex ratio is found in Thuamul-Rampur (1,035) and the lowest in Karlamunda (962) . Lower sex ratio than the district rural figure (985) is recorded in nine C.D Blocks. The remaining four C.D. Blocks have higher sex ratio than the district rural sex ratio in the age group 0-6.

TABLE 12 : SEX RATIO OF RURAL POPULATION IN THE AGE GROUP 0-6 BY RANGES, 2001

Range of sex ratio for villages	Number of inhabited villages	Percentage distribution of villages	Population 2001	Percentage distribution of population
1	2	3	4	5
Less than 700	277	13.2	7,746	3.8
700-749	73	3.5	5,658	2.8
750-799	105	5.0	10,277	5.0
800-849	144	6.9	14,695	7.2
850-899	170	8.1	23,126	11.3
900-949	143	6.8	23,010	11.2
950-999	122	5.8	23,132	11.3
1000-1099	373	17.8	48,219	23.6
1100+	692	33.0	48,702	23.8
District (Rural) Total	**2,099**	**100.0**	**204,565**	**100.0**

Sex ratio (Rural) for District : 985

Table-12 gives distribution of sex ratio of rural population in the age group 0-6 by ranges. The highest number of villages i.e., 692 (33 per cent) villages having 23.8 per cent of population is covered under the ranges 1,100+ sex ratio. But the irony of the fact is that 49.2 per cent of villages have a sex ratio of less than 1,000 in the age group 0-6 which comprises 52.6 per cent of population. There are 912 villages, where 0-6 age group sex ratio is less than 950 and 350 villages where it is less than 750, which visualizes the shortage of girl child in comparison to boy.

TABLE13 : SEX RATIO OF POPULATION IN THE AGE GROUP 0-6 OF URBAN AGGLOMERATIONS /TOWNS, 2001

Serial number	Name of UA / Town	Urban status of town	Total population in 0-6 age group			Sex ratio for 0-6 age group
			Persons	Males	Females	
1	2	3	4	5	6	7
1	Bhawanipatna	M	7,532	3,840	3,692	961
2	Junagarh	NAC	2,334	1,146	1,188	1,037
3	Kesinga	NAC	2,579	1,272	1,307	1,028
4	Mukhiguda	CT	879	470	409	870
	District(Urban) Total		**13,324**	**6,728**	**6,596**	**980**

Table-13 reveals that in the towns of the district, sex ratio among 0-6 age group population is less than that of the rural areas. The district urban sex ratio is 980 as compared to district rural sex ratio 985. Among the towns, the lowest sex ratio (870) is reported in Mukhiguda (CT) and the highest sex ratio (1,037) is reported in Junagarh (NAC).

Table-14 presents data on number and percentage of scheduled castes and scheduled tribes population in different police stations of the district as per 2001 Census. The percentage of scheduled castes and scheduled tribes population in the district constitutes 17.7 per cent and 28.6 per cent as against 16.5 per cent and 22.1 per cent respectively in the state. However, the rural-urban distribution of scheduled castes and scheduled tribes population in the district shows that 17.7 per cent and 17.1 per cent of total population are scheduled castes and 30.4 and 6.8 per cent are scheduled tribes. The table further reveals that there is the highest concentration of scheduled caste population (25.7%) in Thuamul-Rampur police station and lowest concentration (15.0%) in Madanpur-Rampur police station. In so far as scheduled tribes population is concerned, the highest concentration(57.6%) is recorded in Thuamul-Rampur police station and lowest concentration (17.4percent) is recorded in Dharamgarh police station.

Table-15 gives picture regarding distribution of scheduled castes and scheduled tribes population in different C.D.Blocks of the district as per 2001 Census. The highest concentration of scheduled castes population is recorded in Thuamul- Rampur (25.7%) C.D. Block followed by Lanjigarh (24.1%) C.D. Block. In contrast, Madanpur-Rampur C.D. Block lies at the bottom with only 13.9 per cent of scheduled caste population. As regards the percentage of scheduled tribes population to total population,

TABLE 15 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN C.D. BLOCKS, 2001

Serial number	Name of C.D. block	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Golamunda	107,377	18,339	27,545	17.1	25.7

13	Narala	102,309	18,844	27,381	18.4	26.8
District (Rural) Total:		**1,235,275**	**218,897**	**375,796**	**17.7**	**30.4**

Thuamul-Rampur C.D.Block tops the list with 57.6 percent of tribal population and Karlamunda C.D. Block is at the bottom with 15.2 percent of tribal population.

TABLE 16 : PROPORTION OF SCHEDULED CASTES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Castes population to total population	Number of villages	Percentage	Scheduled Castes Population	Percentage
1	2	3	4	5
Nil	471	22.4	0	0.0
Less than 5	125	6.0	1,839	0.8
5-10	311	14.8	21,091	9.6
11-20	552	26.3	78,255	35.7
21-30	319	15.2	63,828	29.2
31-40	138	6.6	23,674	10.8
41-50	78	3.7	15,269	7.0
51-75	63	3.0	10,309	4.7
76 and above	42	2.0	4,632	2.1
District Total	**2,099**	**100.0**	**218,897**	**100.0**

Table-16 shows proportion of scheduled castes population to total population of the villages. The percentage of scheduled caste population to total population of villages is divided into nine ranges starting from 'Nil to 76 and above'. The table reveals that out of 2,099 villages of the district, 471 (22.4%) villages have no scheduled caste population and 42(2.0%) villages have more than 75 per cent of

scheduled caste population. However, majority of villages in the district numbering 1320 (62.9%) have scheduled caste population ranging between 5 to 40 percent and they constitute 85.3 per cent of scheduled caste population of the district.

TABLE 17 : PROPORTION OF SCHEDULED TRIBES POPULATION TO TOTAL POPULATION IN VILLAGES, 2001

Percentage range of Scheduled Tribes population to total population	Number of villages	Percentage	Scheduled Tribes Population	Percentage
1	2	3	4	5
Nil	141	6.7	0	0.0
Less than 5	90	4.3	2,485	0.7
5-10	133	6.3	11,304	3.0
11-20	254	12.1	37,437	10.0
21-30	227	10.8	50,460	13.4
31-40	180	8.6	50,803	13.5
41-50	157	7.5	47,256	12.6
51-75	357	17.0	99,797	26.6
76 and above	560	26.7	76,254	20.3
District Total	**2,099**	**100.0**	**375,796**	**100.0**

Like the previous table, this Table distributes the villages of the district into different percentage ranges of scheduled tribes population to total population. Out of 2,099 inhabited villages of the district, 141 (6.7%) villages have no scheduled tribes population. It is found that the maximum percentage (26.6%) of total scheduled tribes population of the district live in 357 villages and the concentration of scheduled tribes population in these villages is in the range 51-75 percent of the total population of the village.

TABLE 18 : NUMBER AND PERCENTAGE OF SCHEDULED CASTES AND SCHEDULED TRIBES POPULATION IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of UA / Town	Total population	Total Scheduled Castes population	Total Scheduled Tribes population	Percentage of Scheduled Castes population to total population	Percentage of Scheduled Tribes population to total population
1	2	3	4	5	6	7
1	Bhawanipatna (M)	60,787	10,500	3,402	17.3	5.6
2	Junagarh (NAC)	15,759	2,572	648	16.3	4.1
3	Kesinga (NAC)	16,917	2,883	1,978	17.0	11.7
4	Mukhiguda (CT)	6,756	1,167	749	17.3	11.1
District(Urban) Total		**100,219**	**17,122**	**6,777**	**17.1**	**6.8**

Table-18 presents data on number and percentage of scheduled castes and scheduled tribes population in different towns of the district as per 2001 Census. The percentage of scheduled castes population and scheduled tribes population to the total population in the urban areas of the district constitute 17.1 per cent and 6.8 per cent respectively. Bhawanipatna (M) and Mukhiguda (CT) have the highest concentration (17.3%) of scheduled castes population in the district and Junagarh (NAC) has the lowest concentration (16.3%) of scheduled castes population. Likewise, Kesinga (NAC) has the highest concentration (11.7%) of scheduled tribes population and Junagarh (NAC) has the lowest cocentration (4.1%) of scheduled tribes population in the district.

TABLE 19 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN C. D. BLOCKS, 2001

Serial number	Name of C D block	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	'2	3	4
1	Golamunda	1,027	1,030
2	Dharamgarh	996	1,019
3	Junagarh	1,000	1,020
4	Kokasara	1,009	1,037
5	Jayapatna	1,047	1,043
6	Kalampur	1,031	1,042
7	Thuamul-Rampur	1,005	1,041
8	Lanjigarh	1,031	1,039
9	Bhawanipatna	990	1,032
10	Kesinga	1,000	1,018
11	Karlamunda	1,021	1,004
12	Madanpur-Rampur	997	1,000
13	Narala	1,021	1,017
	District (Rural) Total	**1,011**	**1,029**

Table-19 shows sex ratio among scheduled castes and scheduled tribes population in different C.D Blocks as per 2001 Census. For the rural areas of the district as a whole, the sex ratio of scheduled castes and scheduled tribes population are 1,011 and 1,029 respectively. In case of scheduled castes population, Jayapatna C.D. Block exhibits the highest sex ratio of 1,047 followed by Kalampur and Lanjigarh (1,031),Golamunda(1,027) and Karlamunda and Narala(1,021). Other seven C.D Blocks have recorded lower sex ratio than that of the sex ratio of the scheduled castes population recorded for the district.. As regards, the sex ratio of the scheduled tribes population, seven C.D. Blocks have recorded higher sex ratio and other six C.D Blocks have recorded lower sex ratio than the scheduled tribes sex ratio of the district. Among the CD Blocks Jayapatna has recorded the highest sex ratio of 1,043 and Madanpur-Rampur has the lowest sex ratio of 1,000 of the scheduled tribes population.

TABLE 20 : SEX RATIO AMONG SCHEDULED CASTES AND SCHEDULED TRIBES IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name of U.A./ Town	Scheduled Castes sex ratio	Scheduled Tribes sex ratio
1	'2	3	4
1	Bhawanipatna (M)	1,000	890
2	Junagarh (NAC)	1,152	1,306
3	Kesinga (NAC)	986	1,109
4	Mukhiguda (CT)	904	783
Sex ratio (Urban) for the district:		**1,012**	**971**

Like the previous table, Table-20 indicates sex ratio among scheduled castes and scheduled tribes population in towns of the district. The urban areas of the district have recorded sex ratio of 1,012 and 971 among scheduled castes and scheduled tribes population respectively. The highest scheduled castes sex ratio of (1,152) is recorded in Junagarh (NAC) and lowest sex ratio of (904) is in Mukhiguda(CT). The highest scheduled tribe sex ratio of 1,306 is recorded in Junagarh(NAC) and lowest sex ratio of 783 is in Mukhiguda(CT).

Table-21 presents Police Station level data giving the number of literates and illiterates along with percentage of literates as per 2001 Census. The literacy of the district is 45.9 per cent of the total population and it is 62.7 per cent and 29.3 per cent incase of males and females respectively. For the total rural population of the district, the literacy comes to 43.5 per cent and for the total urban population of the district it is at a higher level of 74.4 per cent. In all the police stations along with the district, the literacy rates in case of males are higher than the corresponding rates for the females. Kesinga Police Station records the highest literacy of 56.2 per cent followed by Sadar (54.7%), Madanpur-Rampur (53.8%) and Narala (52.4%). The other seven police stations have recorded lower literacy in comparison to the literacy of the district.

TABLE 22 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN C. D. BLOCKS, 2001

Literacy rate for District : 45.9

Table-23 distributes the total number of villages in the district as per different ranges of literacy rates of the villages. The table reveals that the maximum number of villages in the district i.e. 412 constituting 28.9 per cent of the total population in the rural areas of the district, have literacy rates in between 41-50 per cent. It further reveals that 389 number of villages have literacy rates in between 31-40 per cent and 323 villages have literacy rates in between 51-60 per cent. There is only one village in the district, which has achieved 100 per cent literacy, and six villages have achieved more than 80 percent of literacy. 699 villages in the district have recorded low literacy rates of 30 per cent or less and in 108 villages there is nil literacy.

TABLE 24 : NUMBER AND PERCENTAGE OF LITERATES AND ILLITERATES BY SEX IN URBAN AGGLOMERATIONS / TOWNS, 2001

Serial number	Name and urban status of UA/ Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females

Literacy rate for District (Rural) : 33.8

Distribution of villages by literacy rate range for scheduled tribes population, 2001 is depicted in Table-29. There are 1,958 number of inhabited villages in the district having scheduled tribes population. The majority of villages numbering 1,054 (53.8%) and constituting 69.1 per cent of the scheduled tribes population of the district have the literacy within the range 21-50 per cent. In 488 villages of the district, there is low literacy within the range 1-20 per cent. The table shows that there are 148 villages, where 'there is no literate person and in 6 villages of the district there is 100 per cent literacy.

TABLE 30 : NUMBER AND PERCENTAGE OF SCHEDULED TRIBES LITERATES AND ILLITERATES BY SEX IN TOWNS, 2001

Serial number	Name and urban status of Town	Number of literates and illiterates						Percentage of literates			Gap in male-female literacy rate
		Number of literates			Number of illiterates						
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females	
1	2	3	4	5	6	7	8	9	10	11	12
1	Bhawanipatna (M)	1,793	1,158	635	1,609	642	967	61.2	74.2	46.4	27.8
2	Kesinga (NAC)	702	461	241	1,276	477	799	42.6	59.3	27.7	31.5

Table-31 presents data on number and percentage of main workers, marginal workers and non-workers by sex in different police stations of the district as per 2001 Census. For the district as a whole, main workers, marginal workers and non-workers constitute 28.6 per cent, 17.9 per cent and 53.5 percent respectively of the total population. In case of males of the district, main workers are 47.0 per cent; marginal workers are 10.2 percent and non-workers are 42.9 percent and that of females it is 10.2 per cent, 25.6 per cent and 64.1 per cent respectively. Total workers i.e. a combination of main workers and marginal workers of the district is 46.5 percent of the total population and it lies above the corresponding figures of 38.79 per cent for the state. Jayapatna Police Station tops the list in percentage of total workers (54.0%) followed by Thuamul-Rampur (51.5%), Lanjigarh (50.6%), Kegaon (50.4%) and Kokasara (48.8%). Sadar and Kesinga police station lie at the bottom with each 41.9 per cent of total workers.

Table –32 presents data on number and percentage of main workers, marginal workers and non-workers by sex for the rural areas of the district i.e. in C.D. Blocks. Total workers in the rural areas of the district constitute 47.7 per cent of its total population, out of which 28.7 per cent are main workers and 19.0 per cent are marginal workers. The sex wise break-up of the district level data reveals that out of the total workers in the rural areas of the district, males constitute 57.8 per cent and females constitute 37.8 per cent. A look at the work participation rate in different C.D. Blocks reveals that Jayapatna C.D. Block has recorded the highest percentage (55.0%) of total workers of which main workers and marginal workers constitute 33.8 per cent and 21.2 per cent respectively. On the other hand, Karlamunda C.D. Block is at the bottom with 41.5 percent of total workers of which 24.2 per cent and 17.3 per cent are main workers and marginal workers respectively.

Table-33 presents data on number and percentage of main workers, marginal workers and non-workers by sex for the urban areas of the district as per 2001 Census. The total workers in the urban areas of the district constitute 31.1 per cent, out of which 27.5 per cent are main workers and 3.7 per cent are marginal workers. The sex-wise break-up of the district level data reveals that 49.7 per cent and 11.2 per cent of the total workers in the urban areas of the district are male workers and female workers respectively. It is note-worthy to mention that the percentage of marginal workers in the urban areas of the district is substantially less than the percentage of marginal workers in the rural areas of the district. It is only 3.7 per cent of the total urban population, out of which males and females contribute 3.8 per cent and 3.6 per cent respectively. In so far as work participation rate in individual towns is concerned, Mukhiguda (CT) stands at the top with 35.0 per cent of total workers and Bhawanipatna (M) is at the bottom with 29.6 per cent of total workers.

Note: Percentage of Workers to total workers are given in brackets.

Table-34 distributes total workers of different police stations and the district by sex into four categories of economic activities. The table reveals that out of the total workers in the district, 29.6 percent are cultivators, 50.3 per cent are agricultural labourers, 2.9 per cent are household industry workers and 17.2 per cent are other workers. The sex-wise break-up of the district level data shows that male participation rate is comparatively higher than the female participation rate in case of cultivators and

other workers and vice-versa in case of agricultural labourers and household industry workers. The Police Station-wise distribution of total workers indicates that in almost all police stations maximum number of workers are engaged as agricultural labourers except Thuamul Rampur police station where maximum workers are cultivators and Sadar police station where maximum workers are engaged in 'other activities' other than agriculture and household industry.

				(37.8)	**(15.9)**	**(73.0)**	**(3.4)**	**(7.7)**

Note: Percentage of workers to total workers are given in brackets.

Like previous table, Table-35 distributes workers of the district, C.D. Blocks wise, by sex into four categories of economic activities. The table shows that 47.7 per cent of the total population in the rural areas of the district are workers (main+marginal) and as per the category-wise break-up, 31.0 per cent, 52.5 percent, 2.9 per cent and 13.5 per cent of the total workers are cultivators, agricultural labourers, household industry workers and other workers respectively. The sex-wise break-up of district (rural) level data shows that the percentage of females engaged as agricultural labourers (73.0%) and household industry workers (3.4%) is comparatively higher than that of males. It is found that workers in majority of CD Blocks are engaged as agricultural labourers and cultivators.

Table-36 presents data on distribution of workers by sex into four categories of economic activities in the urban areas of the district as per 2001 Census. The table indicates that 31.1 per cent of the total population in the urban areas of the district are workers (main+marginal) and out of the total workers majority (85.9 %) are engaged in 'Other activities' other than agriculture and household industry while the engagement of urban workers as cultivators (3.4%), agricultural labourers (8.6%) and household industry workers (2.1%) is quite negligible. The same trend is found not only in case of male- female break-up of the district (urban) data but also in case of individual towns.

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well or well situated within or outside the premises it is considered as having access to `Improved drinking water source' in Orissa. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table-37 depicts the distribution of villages according to the availability of different amenities in different C.D. Blocks of the district. Out of the total 2,099 inhabited villages in the district, educational facility is available in 1,315 (62.6%) villages, medical facility in 224 (10.7%) villages, improved drinking water facility in 1,969 (93.8%) villages, post office in 302(14.4%) villages, telephone in 118(5.6%) villages, communication facility like bus service, rail facility and navigable waterways in 469(22.3%) villages,

banks in 58(2.8%) villages, agricultural credit societies in 57(2.7%) villages. As many as 828(39.4%) villages are approached by pucca road and 907 (43.2%) villages are having power supply facility. The district level data clearly indicate that although spectacular progress has been made on education and improved drinking water facility in the district, yet the areas like power supply, medical, post office, banks and agricultural credit societies require further development.

TABLE 38 : NUMBER AND PERCENTAGE OF RURAL POPULATION SERVED BY DIFFERENT AMENITIES, 2001

Note : - Percentages are given in brackets.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well or well situated within or outside the premises it is considered as having access to `Improved drinking water source' in Orissa. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Post office includes Post office, telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table-38 presents data on number and percentage of rural population served by different amenities in different C.D. Blocks of the district. It may be seen from the table that out of 1,235,275 rural inhabitants, 92.0 per cent persons are served with educational facility, 29.5 per cent by medical facility, 98.8 per cent by improved drinking water facility, 37.0 per cent by post and telegraph facility, 19.6 per cent by telephone facility, 40.3 per cent by transport and communication facility, 11.2 per cent by Bank facility, 11.1 per cent by agricultural co-operative societies, 59.4 per cent can approach their villages by pucca road and 71.7 per cent served by power supply facility. The rural areas of the district as a whole is quite advanced in providing education, improved drinking water and power supply whereas lagging behind in providing facility of banking and agricultural credit societies.

TABLE 39 : DISTRIBUTION OF VILLAGES NOT HAVING CERTAIN AMENITIES, ARRANGED BY DISTANCE RANGES FROM THE PLACES WHERE THESE ARE AVAILABLE, 2001

Village not having the amenity of	Distance range of place from the villages where the amenity is available			
	Less than 5 kilometres	5-10 kilometres	10+ kilometres	Total (Col. 2 - 4)
'1	2	3	4	5
1. Education :-				
(a) Primary School	545	175	64	784
(b) Middle School	1,008	457	233	1,698
(c) Degree College	252	429	1,398	2,079
2. Medical:-				
(a) Hospital	109	175	1,810	2,094
(b) PHC	371	534	1,145	2,050
3. Post Office	477	367	954	1,798
4. Telephone	316	337	1,328	1,981
5. Bus Service	760	468	422	1,650
6. Banks				
(a) Commercial Bank	442	552	1,047	2,041
(b) Cooperative Bank	207	320	1,565	2,092
7. Agricultural Credit Societies	461	465	1,117	2,043

Table-39 shows the distribution of villages not having certain amenities and arranged by distance ranges from the places where such facilities are available. It is seen from the table that out of 2,099 inhabited villages of the district, 784 villages do not have Primary School, 1,698 villages have no Middle School and 2,079 villages do not have any Degree College. There is no Hospital in 2094 villages of the district while Primary Health Centre is not available in 2,050 villages. Like wise, non-availability of Post Office in 1,798, Telephone in1,981, Bus Service in 1,650, Commercial Bank in 2041, Co-operative Bank in 2,092 and Agricultural Credit Societies in 2,043 villages are recorded in the district. It is evident from the table that maximum villages having no Primary School and Middle School are getting the said facilities at a distance of less than 5 kilometres. However, maximum number of villagers are required to cover a distance of 5-10 kilometres or even more than 10 kilometres in order to avail the facilities of Post Office, Bus Service, Public Health Centre, Hospital, Banks and Agricultural Credit Societies.

TABLE 40 : DISTRIBUTION OF VILLAGES ACCORDING TO THE DISTANCE FROM THE NEAREST STATUTORY TOWN AND AVAILABILITY OF DIFFERENT AMENITIES, 2001

Distance range from the nearest statutory town (in kilometres)	Number of inhabited villages in each range	Type of amenity available								
		Education	Medical	Post Office #	Telephone	Transport communica-tions $	Banks	Agricultural Credit Societies	Approach by pucca road
1	2	3	4	5	6	7	8	9	10
Less than 5	44	37	6	11	3	11	0	2	29
	(100.0)	(84.1)	(13.6)	(25.0)	(6.8)	(25.0)	(0.0)	(4.5)	(65.9)
5 -15	314	233	36	52	18	95	8	9	154
	(100.0)	(74.2)	(11.5)	(16.6)	(5.7)	(30.3)	(2.5)	(2.9)	(49.0)

	(100.0)	(71.3)	(12.3)	(15.9)	(7.0)	(24.2)	(3.5)	(3.8)	(43.9)
51+	735	329	59	79	27	120	15	8	204
	(100.0)	(44.8)	(8.0)	(10.7)	(3.7)	(16.3)	(2.0)	(1.1)	(27.8)
Unspecified	2	0	0	0	0	0	0	0	0
	(100.0)	(0.0)	(0.0)	(0.0)	(0.0)	(0.0)	(0.0)	(0.0)	(0.0)
District Total :	**2,099**	**1,315**	**224**	**302**	**118**	**469**	**58**	**57**	**828**
	(100.0)	**(62.6)**	**(10.7)**	**(14.4)**	**(5.6)**	**(22.3)**	**(2.8)**	**(2.7)**	**(39.4)**

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

Table-40 presents data on distribution of villages according to the distance from the nearest statutory town and availability of different amenities. From the table, it is seen that majority of villages in the district numbering 1,004 come under the distance range of 16-50 kilometres from the nearest statutory town while 44 villages are at less than 5 kilometres from the towns, 314 villages under the distance range 5-15 kilometres and 735 villages are at above 51 kilometres from the towns. It is clear from the table that the villages, which are far away from the statutory towns have fewer amenities in comparison to the villages nearer to the towns.

TABLE 41: DISTRIBUTION OF VILLAGES ACCORDING TO POPULATION RANGE AND AMENITIES AVAILABLE, 2001

Post office includes Post office, Telegraph office and Post and telegraph office.

$ Transport communication includes bus service, rail facility and navigable waterways.

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well or well situated within or outside the premises it is considered as having access to `Improved drinking water source' in Orissa. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Table-41 depicts data on distribution of villages according to population range and amenities available. It is observed from the table that maximum number 1,271 villages come under less than 500 population, 434 villages come under the range 500-999, 296 villages come under 1000-1999, 93 villages come under 2000-4999, 5 villages come under the range 5,000-9,999 and no village has the population above 10,000. It is evident from the table that the villages, which are coming under higher population ranges enjoy more facilities in comparison to the villages coming under lower population ranges.

TABLE 42: DISTRIBUTION OF VILLAGES ACCORDING TO LAND USE, 2001

Serial number	Name of C. D. Block	Number of inhabited villages	Total area	Percentage of cultivable area to total area	Percentage of irrigated area to total cultivable area
1	2	3	4	5	6
1	Golamunda	124	42,553	66.0	10.1
2	Dharamgarh	71	37,715	87.3	38.1
3	Junagarh	162	50,424	77.4	8.8
4	Kokasara	69	35,645	78.5	22.4
5	Jayapatna	90	40,197	73.5	16.6
6	Kalampur	54	15,595	73.1	33.9
7	Thuamul-Rampur	278	31,419	46.3	3.1
8	Lanjigarh	429	61,796	33.3	5.1
9	Bhawanipatna	268	61,768	66.0	7.0
10	Kesinga	99	37,189	77.9	8.4
11	Karlamunda	60	19,427	80.9	43.8
12	Madanpur-Rampur	229	30,444	61.4	8.6
13	Narala	166	43,816	72.8	11.9
	District Total :	**2,099**	**507,988**	**67.0**	**15.6**

Note : - Cultivable area = irrigated area + unirrigated area

Table-42 shows land use pattern of different C.D. Blocks in the district. It indicates that the percentage of cultivable area to the total area of the district is 67 percent and the rest 33 percent cover forest, culturable waste and the areas not available for cultivation. The table further reveals that the percentage of irrigated area to total cultivable area of the district is 15.6 percent. Taking the percentage of cultivable area to total area in different CD Blocks into account, Dharamgarh is at the top with 87.3 percent and Lanjigarh is at the bottom with 33.3 percent of cultivable area. Taking the percentage of irrigated area to total cultivable area, Karlamunda is at the top with 43.8 percent and Thuamul-Rampur is at the bottom with 3.1 percent of irrigated area.

TABLE 43 : PER CAPITA RECEIPT AND EXPENDITURE IN STATUTORY TOWNS

Serial number	Class, name & urban status of the Town	Per capita receipt			Per capita expenditure					
		Total	Through taxes	From all other sources	Total	General Administration	Public health and conveniences	Public works	Public institutions	Other(s)
1	2	3	4	5	6	7	8	9	10	11
1	II Bhawanipatna (M)	208	72	136	179	13	53	31	23	60
2	IV Junagarh (N.A.C.)	542	116	426	536	74	35	184	0	242
3	IV Kesinga (N.A.C.)	288	144	144	257	38	36	87	0	96
	District Total	279	93	186	253	28	47	67	15	97

Table-43 gives the detail account of per capita receipt and expenditure in statutory towns. In all of the towns, the per capita receipt is higher than the per capita expenditure. The share of revenue from all other sources in the per capita receipt is higher than the receipt from taxes. The higher percentage of expenditure goes to public works and others.

TABLE 44 : SCHOOLS/COLLEGES PER 10,000 POPULATION IN STATUTORY TOWNS, 2001

Serial number	Name and urban status of Town	Type of educational institution				
		Primary	Junior Secondary / Middle	Secondary / Matriculation	Senior Secondary	College
1	2	3	4	5	6	7
1	Bhawanipatna (M)	6.3	2.3	1.8	0.7	0.8
2	Junagarh (N.A.C.)	7.6	4.4	2.5	1.3	1.3
3	Kesinga (N.A.C.)	8.3	3.5	2.4	1.2	0.6
	District Total	**6.8**	**2.9**	**2.0**	**0.9**	**0.6**

Table-44 presents data on Schools and Colleges per 10,000 populations in the towns of the district. The table reveals that for every 10,000 urban population in the district, there are about seven Primary Schools, about three Middle Schools, about two Secondary Schools and one each of Senior Secondary School and College.

TABLE 45 : NUMBER OF BEDS IN MEDICAL INSTITUTIONS IN TOWNS, 2001

Serial number	Name and urban status of the Town	Number of beds in medical institutions per 10,000 population
1	'2	3
1	Bhawanipatna(M)	25
2	Junagarh(N.A.C.)	19
3	Kesinga(N.A.C.)	18
4	Mukhiguda(C.T.)	0
	Distrct Total	**21**

Table-45 presents number of beds in Medical Institutions per 10,000 populations pertaining to different towns in the district. It shows that 21 beds are available in medical institutions per 10,000 urban population of the district.

TABLE 46 : PROPORTION OF SLUM POPULATION IN TOWNS, 2001

Serial number	Name of the Town	Total population	Slum population	Percentage of slum population to total population
1	'2	3	4	5
1	Bhawanipatna (M)	60,787	15,310	25.2
	District Total	**60,787**	**15,310**	**25.2**

Table-46 presents data on proportion of slum population in the towns of the district. It is revealed from the table that there is one town in the district, Bhawanipatna (M), wherein slums are available. The slum population of the town constitutes 25.2 per cent of its total population.

TABLE 47 : MOST IMPORTANT COMMODITY EXPORTED OUT OF AND MANUFACTURED IN TOWNS, 2001

Serial number	Name and urban status of Town	Most important commodity	
		Manufactured	Exported
1	2	3	4
1	Bhawanipatna (M)	Rice	Paddy
		Milk Product	Groundnut
		Biscuit	Kandul
2	Junagarh (N.A.C.)	Steel Furniture	Rice
		Battery	Pulses
		Handloom Cloth	Rice Barn
3	Kesinga (N.A.C.)	Cycle tyre & tube	Vegetables
		Alluminium Products	Rice Barn
		Biscuits	Rice
4	Mukhiguda (C.T.)		Rice
			Rice Barn

Table-47 depicts the most important commodities manufactured in different towns and exported from the towns. The main items of manufacture to be mentioned in the district are Rice,Milk product,Biscuit, Steel furniture,Battery,Handloom clothes and Cycle tyres and tubes. The items exported mainly include Paddy,Groundnut,Kandul,Rice Barn and Vegetables.

(xi) Analysis based on houselist Data, Census 2001

In India, much emphasis has been laid on the mechanism of decentralized planning emerging from the grass root level which has given rise to the necessity of building adequate data base for formulation of future plans at the micro level.

With the commencement of five year plans lack of data on quality and quantity of housing stock has compelled the Census Organization to conduct uniform houselisting all over the country not only on housing but also on the quality of living of household.

Like the previous Censuses, the Census of India 2001 was conducted in two phases namely, (i) Houselisting operation and (ii) Population enumeration. The houselisting operations in Orissa was conducted in April-May, 2000, much ahead of the population enumeration.

The basic objective of this elementary exercise was to prepare a frame indispensable for smooth and

systematic conduct of the population enumeration during February, 2001. The housing census, thus in some way was a prelude to the actual population count of the census. In addition, information collected through houselisting provide comprehensive data base for assessing the conditions of the human settlements, housing deficit and for future housing requirements for formulation of housing policies.

This operation also provides a massive data on amenities available to the households essentially required by various departments of the union and state governments and many other non-government organizations for development and planning of different projects of housing sector.

TABLE 48 : HOUSEHOLDS BY TENURE STATUS AND NUMBER OF ROOMS OCCUPIED IN THE DISTRICT, 2001

Tenure status	Number of dwelling rooms	Number of households

Data Source: Census of India 2001, H- Series: "Tables on Houses, Household Amenities and Assets."

Table -48 presents distribution of households by different tenure status, namely owned, rented and others among total, scheduled caste and scheduled tribe households along with number of rooms occupied by each household in total, rural and urban areas of this district. The total number of households in the district is 324,771 of which 60,623 (18.67 %) are scheduled caste households and 96,710 (29.78 %) are scheduled tribe households. As shown in the table, 93.42 per cent households in total areas of the district live in their own houses as against 95.22 per cent in rural areas and 66.37 in the urban areas. Number of households living in rented houses constitutes 3.08 per cent in total areas of the district as against 1.53 per cent in rural and 26.43 per cent in urban areas.

Tenure status among scheduled caste and scheduled tribe households in total, rural and urban areas in the district manifests the same pattern as seen among the total households.

The households who live neither in their own houses nor in the rented houses are categorised as others in the table. They may live either in encroached land or in unregularised slums. Their percentage is also very low i.e., 3.50 in case of total households, 3.63 in case of scheduled caste and 2.88 in case of scheduled tribe households. Percentage of households in urban areas is a bit more than the rural area.

From the category 'Number of dwelling rooms' it is observed that more percentage of households are having two rooms followed by one room category in all the four types tenure status i.e., owned, rented and others.

A room used for dwelling purposes should have walls with a doorway and a roof and should be wide and long enough for a person to sleep in it. It should have a length of not less than 2 meters and a breadth of at least 1.5 meters and a height of 2 meters. A dwelling room would include living room, study room, servant's room and other habitable rooms. Taking these factors into consideration availability of number of dwelling rooms to households has been calculated and is shown in Col.2 of the table.

A specific category of dwelling room namely 'no exclusive room' as shown in Col.2 of the houselist table -48 means a dwelling room shared by more than one household and in situations where there is only one room in a census house, which is used as a shop, or office but the household also stays in it. Thus households having ' no exclusive room' number 4,820 among total households, 982 among the scheduled caste households and 1,365 among scheduled tribe households in total areas of the district.

TABLE 49: PERCENTAGE DISTRIBUTION OF HOUSEHOLDS LIVING IN PERMANENT, SEMI PERMANENT AND TEMPORARY HOUSES, 2001

Data Source: Census of India 2001, H- Series: "Tables on Houses, Household Amenities and Assets."

Note:

Permanent:-1 Permanent houses refer to those houses whose wall & roofs are made of pucca materials i.e., where, burnt bricks, G.I. Sheets or other metal sheets, stone cement concrete is used for wall and tiles slate, shingle, corrugated iron, zinc or other metal sheets asbestos sheets, bricks, lime and stone and RBC/RCC are used for roof.

Semi permanent:-2 Semi-permanent houses refer to those houses made of other types of materials

Temporary:-3 Temporary houses refers to those houses having wall and roofs made of Kutcha materials i.e. where grass, leaves, reeds, bamboo mud, unburnt bricks are used for the construction of walls and grass, leaves reeds, bamboo hatch, mud, unburnt bricks, wood etc. are used for roofs.

Table-49 provides percentage distribution of households living in permanent, semi permanent and temporary houses in total, rural and urban areas at the district and police station levels in Kalahandi district. The definition of permanent, semi permanent and temporary houses is given at the bottom of the table for appreciation of the data users.

In the total areas of the district, households living in permanent houses constitute 29.25 per cent as against 63.01 per cent households in semi permanent houses and 7.73 per cent in temporary houses. The same pattern of distribution of households in permanent, semi permanent anad temporary houses also holds good in the rural areas of the district. But the distribution of households in the urban areas of the district depicts a different picture . Here, 50.23 per cent of households are having permanent houses.

The percentage distribution of households living in permanent, semi permanent and temporary houses in total, rural and urban areas at police station level manifests a different trend. There are 11 police stations in Kalahandi district. Percentage distribution of permanent houses in these police stations varies from 6.84 per cent to 41.81 per cent in the total areas. The same pattern of percentage distribution of households living in permanent, semi permanent and temporary houses is also seen in the rural areas among police stations.

However, in case of the urban areas of all the four police stations in the district percentage of permanent household varies from 32.27 per cent to 71.84 per cent and likewise the percentage of semi-permanent households varies from 13.96 per cent to 60.59 per cent.

Data Source: Census of India 2001, H- Series: "Tables on Houses, Household Amenities and Assets."

* Based on the improved drinking water source, drinking water supply has been classified as `Improved ' or otherwise. If the household has access to drinking water supplied from a tap or a hand pump / tube well or well situated within or outside the premises it is considered as having access to `Improved drinking water source' in Orissa. However, the concept of improved drinking water is state specific and this is to be considered accordingly.

Note: Percentage has been given in brackets after the number of households.

Bathroom means bathroom within the house.

Toilet means toilet within the house.

Drainage means closed and open drainage.

Houselist Table-50 presents the number and percentage distribution of households enjoying improved drinking water facility, electricity, bathroom,toilet and drainage facility in total, rural and urban areas of Kalahandi district and its police stations.

The sources of improved drinking water as mentioned at the bottom of the table include sources like tap, handpump, tubewell, and well. Out of the total 324,771 households in the district 304,029 constituting 93.61 percent enjoy improved drinking water facility in the total areas of the district as against 93.26 percent in the rural areas and 98.98 percent in the urban areas.

Coming to the police station level, it is seen that, similar proportion of households in all the police stations enjoy the improved drinking water facility.

Coming to the availability of electricity in the households it is recorded that only 13.22 % of the households have been provided with electricity facility in the total areas of the district as against 9.78 % in the rural areas and 64.84 % in the urban areas.

At the police station level, the proportion of households having electricity facility is 4.86 % in Kegaon P.S. 2.37 % in Thuamul Rampur P.S. which are quite low in comparison to district average.

In case of other police stations, both in rural and urban, the proportions are nearer to the district standard.

As regards to bathroom, toilet and drainage facility only 5.7 %, 8.29 % and 9.43 % respectively are enjoying in the total area of the district (Col.7, 8 and 9). In rural , the proportion are 3.17 %, 5.11 % and 6.96 % respectively. In urban area, percentage are naturally higher i.e., 43.56 %, 55.96 % and 46.44 % respectively.

Percentage in brackets

Data Source: Census of India 2001, H- Series: "Tables on Houses, Household Amenities and Assets."

Table-51 provides number and percentage of households by type of fuel used for cooking purpose in total, rural and urban areas of the district and police stations. The various types of fuels used by households for cooking purpose are shown in Col.5-13 of the table. Though fuel has got varied uses, fuel in this table refers to materials of fire used for cooking purpose only.

As shown in the tables, there are nine types of fuels, which are used for cooking purpose in the district. Of these fuels, firewood is used by 87.15 per cent of households in total areas of the district as against 88.94 per cent in rural and 60.14 per cent in the urban areas. Cowdung cake is used by 5.02 % households in total area and 5.35 per cent in rural areas of the district for cooking purposes. In urban areas, 25.46 % households use LPG that claims the second position to firewood and 6.09 per cent of household use electricity.

Coming to the police station level more than 90% households use firewood in seven police stations except Kokasara (76.79 %), Dharamgarh (76.58%), Sadar(82.59 %), Kesinga(87.97 %), Junagarh (84.60%) and Jaypatna(88.05 %). In Kesinga town 72.16 households use firewood, followed by cooking gas (15.53 %) and Kerosene (6.70 %). In Sadar town use of firewood is 55.72 % followed by cooking gas 34.70 %. In Jayapatna town firewood use is 29.32% and electricity is 67.77 %.

Data Source: Census of India 2001, H- Series: "Tables on Houses, Household Amenities and Assets."

Table-52 shows only 18.62 per cent households avail banking facility. Among the household assets, bicycle claims the highest proportion i.e., 44.14 per cent in the total area of the district as against 42.96 per cent in rural and 61.83 per cent in urban. Radio/ Transistor claims the second position (18.25 %, 17.24 % and 33.37 % for total, rural and urban respectively). Similarly, Scooter, motor cycle and moped claims 3.69 per cent, 2.65 per cent and 19.28 per cent in total, rural and urban area of the district. Car, jeep and van claims only 0.6 per cent, 0.48 per cent and 2.50 per cent in total, rural and urban area of the district.

Coming to the police station level, 27.65 per cent households of Sadar police station avail banking facility followed by Kesinga(25.67 %), Kegaon (20.29 %) and Madanpur Rampur(19.11%), Kokasara (18.99 %) in the total area. In rural area Kesinga police station has highest (25.04%) and Thuamul Rampur has lowest (9.59 %) number of households availing banking facility. Valuable assets like scooter, motorcycle, moped, car, jeep, van, telephone etc. are possessed by a negligible proportion of households both in total and rural areas.

Apart from this, households not having any household assets as mentioned in Col.6-11 of the table claim considerable proportion in total, rural and urban areas of the district.

(xii) Scope of Village Directory :

The publication of District Census Handbook (DCH) is an excellent venture of the Census network. Information pertaining to quality of life and facilities available in village and urban areas after being collected through perfect articulated schedules, are presented in the form of Village Directory and Town Directory respectively for each district from which a planner envisages to transform the backward society to a modern one Village Directory contains data on each and every village, may be a revenue village or unsurveyed village or notified forest village or forest cluster in the rural areas C.D. Block wise/P.S. wise. The names of village have been arranged in ascending order of the permanent location code of the villages under different Police Station within the jurisdiction of the concerned C.D. Block. It is noteworthy to mention that Census of India 2001 has introduced the assignment of permanent eight digited location code number to all villages in the state for facilitating

easy comparability of data over the period . In order to facilitate the readers & data users, an alphabetical list of villages under each C.D. Block showing the Police station with its location code number has been provided at the beginning of the village directory. In case of village (s) treated as an out growth(s) in an urban agglomeration or treated as a Census town, the code number(s) and the name(s) of village(s) has been provided minus data thereof separately. In case of part village forming a portion of an outgrowth, the corresponding data of the rural portion of the village only have been presented in the village directory. However the land utilization data for such census towns have been made available in Appendix-III.

Maps being the instruments of depicting the location of the places, natural features, roads etc. within the respective administrative boundaries, these have been incorporated accordingly in the volume. All the maps so presented in this volume have been authenticated by the concerned revenue authorities in so far as the boundary, spellings and locations are concerned. In case of the units adjacent to the coast land of the state, such maps have been cleared by the Survey of India through the Office of the Registrar General of India.

The district map showing the Police station boundary have been given at the beginning of the village directory. In addition to this maps, C.D. Block maps depicting the boundaries of various police stations under the C.D. Blocks, location of all the villages, symbolical representation of important amenities etc. have been incorporated in this volume prior to the presentation of data for the concerned C.D.Block.

The information on village directory has been provided in the statement containing 24 columns and these are relating to area of the village in hectares, population and number of households, availability of amenities like educational, medical, drinking water, post/telegraph/telephone facility, commercial & co-operative banks, agricultural/ non-agricultural / other credit societies, recreational and cultural facilities, communications and power supply etc. This also provides information on the mode of approach to village, the name of the nearest town and its distance from the village, whether news paper/magazine is received by the villagers, income & expenditure of local bodies and also the information on the most important commodities that are manufactured in the village. In case of non-availability of any of the amenities in the village, distance in broad ranges of the nearest place where the facility is available has been provided in the directory.

Apart from these, the land use data for different villages in conformity with the pattern of classification of land use as recommended by the Ministry of Agriculture, Government of India have been presented in the said statement.

The Ministry of Agriculture has recommended the maintenance of records of land use pattern under five categories. These are as follows:

1. Forests
2. Not available for cultivation:
   (a) Lands put to non-agricultural uses
   (b) Barren and unculturable lands
3. Other uncultivated lands excluding fallow lands:
   (a) Permanent pastures and other grazing lands
   (b) Lands under miscellaneous tree crops and groves not included in the net area sown
   (c) Culturable wastes
4. Fallow lands:
   (a) Fallow lands other than current fallows
   (b) Current fallows
5. Net area sown

The land-use data in Village Directory are in accordance with the above mentioned classification. Forest is the same as category 1 above. Irrigated (by source) and un-irrigated give break-up of agricultural land which are a combination of categories 4 (a & b) and 5 above. Culturable waste corresponds to category 3 (a+b+c) above. Area not available for cultivation corresponds to category 2 (a+b).

The information on village wise amenities and land-use pattern for the village directory have been collected from the Tahasildars who in turn had utilized

the services of village level workers like Revenue Inspector & Amins working under them. In order to ensure the accuracy and quality of data, these data have further been compared with the data collected from various concerned governmental departments. Information on educational institutions has been collected from Inspector of Schools/D.I of schools/ concerned Block Development Officers. Directorate of Health services of Orissa/respective Chief District Medical Officers/concerned Block Development Officers etc. have supplied information relating to Medical facilities. Information on Posts & telegraphs and telephone facilities has been obtained from the respective authorities of Government of India. Likewise, Reserve Bank of India has supplied information on commercial and co-operative banks. Data on agricultural/non-agricultural/other credit societies have been verified, wherever possible, with the information furnished by the concerned Registrars of Co-operative Societies.

(xiii) Scope of Town Directory :

The town directory abounds in a compendium of information relating to all towns statutorily notified as well as census towns in a district. The towns have been arranged in ascending order of their location code within a district and do not cover strictly the military areas in the district.

The information on amenities and other aspects presented in codes have been explained separately. As regards urban agglomeration, a conventional creation of Census, the names of such agglomerations have been indicated which are similar to the names of the main town of the agglomerations. The particulars of the constituents of the agglomeration have been furnished separately.

The concept of out growths has already been discussed under urban agglomeration. To reiterate, the town directory particulars of outgrowths of the urban units are not available separately, and such particulars of the outgrowths are merged in the core town.

Information on town directory has been collected from concerned Executive Officer of statutorily notified Towns and from Block Development Officer for Census Towns. The details of information on town directory presented in seven statements are briefly explained below.

Statement- I: This statement presents the status and growth history of towns. In Col.1 of the statement serial number of the town and in Col.2 name of the town in alphabetical order along with the class and administrative status have been furnished. In Col.3 location code of the town and in Col.4, the name of the tahasil and police station in which the town is situated are given. Col.5 gives the names of C.D.Blocks of census towns. Area of the town(in square kilometer), number of households including houseless households, population and growth rate of population, density and sex ratio etc. are presented in subsequent columns.

Statement – II: This statement provides information on physical aspects and location of the town. These information include average rain fall, maximum and minimum temperature for the last ten year beginning from 1990-1999, distance of the town from the state, district, sub-division/tahasil/police station headquarters etc., the nearest city with one lakh and above population, nearest city with population of five lakh and more, railway station, bus facility, navigable river/canal (if within 10 kms of the town) are indicated in different columns.

Statement- III: It depicts the picture of the municipal finance of the town for the year 1998-99. The receipts from different sources are indicated under Col.4 to Col.10 where as the expenditure under various items have been shown under Col.11 to Col.17.

Statement- IV: The statement depicts the picture of civic and other amenities available in the town. These include total population, scheduled caste and scheduled tribe populat ion of the town as per 2001 census. Apart from this, the total road length in kms, system of sewerage, number of latrines, method of disposal night soil, source of protected water supply, system of storage of drinking water, fire fighting services, electrification with number of connection for different uses are shown in different columns.

Statement –V: This statement presents information on medical, educational and recreational and cultural facilities available in the town in 1999. The medical institutions cover hospitals/dispensaries/T.B.clinic, etc with number of beds. These institutions may have been owned by Govt./Local bodies, private agencies,

etc. Similarly, the educational institutions cover both general and technical ones and include arts/science/ commerce colleges (of degree level and above), medical colleges, engineering colleges, polytechnics, reconiged shorthand/type writing/vocanational training institutions, higher secondary/intermediate/senior secondary PUC (pre-university college)/junior college level, secondary/matriculation, Junior secondary and middle schools, primary schools, adult literacy centers, working women's hostels with number of seats, stadium,cinema,auditorium/drama/community halls, public libraries including reading rooms etc. available in the town are furnished under different columns.

Statement- VI: Information on three most important commodities exported, three most important commodities manufacture, number of banks, number of agricultural credit societies and number of non-agricultural credit societies pertaining to the respective towns in the district are reflected in this statement.

Statement – VII: Like the village directory, the town directory format has also been modified to some extent. In the 1991 Census, civic amenities available in notified/recognized slums only in urban areas were collected. Contrary to this provision, information/data relating to availability of civic amenities in each slum irrespective of it being recognized/notified was recorded in the 2001 Census with the objective to ascertain the existing civic amenities in slums and to provide necessary information/data required for slum improvement/development. Besides the number of households and population, amenities like paved roads (in kms), system of sewerage, number of latrines (category wise), method of disposal of night soil, number of tap points etc. and electric connection available in the slums are presented in this statement.

PART A : VILLAGE & TOWN DIRECTORY

Section I - Village Directory

(a) Note explaining the abbreviations used in the village directory

The "Village Directory" is one of the traditional compilations of the Census. It gives the list of villages, their location numbers, their area, population, number of households, amenities such as educational, medical, drinking water, post and telegraph, commercial and co-operative banks, agricultural non-agricultural and other credit societies, recreational and cultural facilities, communication, approach to village, nearest town with a distance, power supply availability of newspaper and magazines, most important commodity manufactured and land use of each village.

Village is a statutory recognized unit having a definite boundary and separate land records. In case, a complete village is treated as an outgrowth of urban agglomeration, data on amenities for that village have not been given in the Village Directory but shown along with the urban component. The villages, which are, consider as a Census Town, the amenities data are shown in the Town Directory. For those villages which have partly merged in an outgrowth of U.A., the amenities data are shown in the Village Directory for that particular village.

The 'un-inhabited' villages (villages with no population) have been indicated as such after furnishing details in columns 1 to 3 i.e., Serial number, Name of village & location code number and area of the village against column no. 4 to 18. The land use data for such villages are shown in col. 19 to 23.

.The Village Directory format has 23 columns and the details given under each column are for the village are as follows:-

Columns 1 : Serial Number

Self-explanatory. All the villages within the CD Block are presented serially in the ascending order of their location code number.

Columns 2 : Name and Location Code Number of village.

The name and location code number of the village are shown against these columns. This also includes the forest and uninhabited villages.

Column 3 : Area of the village

The area of the villages in hectares is given. Wherever the area figures was not furnished by the concerned department the column is left blank.

Column 4 : Total population

The total population of the village as per 2001 Census is given against this column.

Column 5 : Number of households

The number of households as per 2001 Census is given in this column.

Amenities :

In column 6 to 23, availability in respect of different amenities such as education, medical, drinking water, post, telegraph, banks, credit societies, communication, power, approach road etc. in each village has been depicted with appropriate codes against the column concerned. Wherever the amenities are not available in the village, a dash (-) is shown in the column and next to it in brackets the distance in broad ranges viz.< 5 kms., 5-10 kms. and 10+ kms of the nearest place where the facility is available is given. Column wise details are given below:

Column 6: Educational

Classes upto class V included in Primary School. This will include nursery school, kindergarten school. Pre-basic school, pre-primary school, junior basic school upto class V.

Classes from VI to VIII are included in the middle school.

Classes from IX and X included in High secondary school. Classes XI and XII are included in senior secondary school.

In case of composite schools like middle school with primary school or secondary school with middle school, these are also included in the number of primary and middle schools, respectively.

Accordingly any of the following types of institutions if exists within the village is shown as per codes given below :

(i)	Primary School	P
(ii)	Middle School	M
(iii)	Secondary School	S
(iv)	Senior Secondary School	PUC
(v)	College	C
(vi)	Industrial School	I
(vii)	Training School	Tr
(viii)	Adult literacy class/centre	AC
(ix)	Others (specify) e.g. Sanskrit Pathshala, Senior basic school, Navodaya Vidyalaya, Makhtab, etc.	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviation, e.g. P(3), M(4), etc.

Column 7 : Medical

Availability of medical facility within the village is indicated by following codes :

(i)	Allopathic Hospital	H
	Ayurvedic Hospital	HA
	Unani Hospital	HU
	Homeopathic Hospital	H Hom
(ii)	Allopathic Dispensary	D
	Ayurvedic Dispensary	DA
	Unani Dispensary	DU
	Homeopathic Dispensary	D Hom
(iii)	Maternity & Child Welfare	MCW
(iv)	Maternity Home	MH
(v)	Child Welfare Centre	CWC
(vi)	Health Centre	HC
(vii)	Primary Health Centre	PHC
(viii)	Primary Health Sub-Centre	PHS
(ix)	Family Welfare Centre	FWC
(x)	T.B. Clinic	TB
(xi)	Nursing Home	NH
(xii)	Registered Private Medical Practitioner	RMP
(xiii)	Subsidised Medical Practitioner	SMP
(xiv)	Community Health Worker	CHW
(xv)	Others	O

More than one institution of a type in the village is indicated by the number within brackets against the abbreviations, e.g. H(3), D(4), etc.

Column 8 : Drinking Water

The type of the drinking water supply sources available within the village are indicated by codes as follows :

(i)	Tap Water	T
(ii)	Well Water	W
(iii)	Tank Water	Tk
(iv)	Tubewell Water	TW
(v)	Handpump	HP
(vi)	River Water	R
(vii)	Canal	C
(viii)	Lake	L
(ix)	Spring	S
(x)	Others	O
(xi)	Summer Sorce	SS-

Column 9 : Post, Telegraph and Telephone

It is indicated by codes as shown below whether within the village exists the following amenities:

(i)	Post Office	PO
(ii)	Telegraph Office	TO
(iii)	Post & Telegraph Office	PTO
(iv)	Telephone Connection	PH

Column 10: Commercial and Co-operative Banks

If the village is served by any banking service, commercial bank, co-operative bank etc. the same is indicated in codes mentioned below along with the number of banks in brackets. If not available the distance of nearest place where the facility exist is given:

(i)	Commercial Bank	CM
(ii)	Co-operative Bank	CP

Column 11: Credit Societies

If the village enjoys the services of Credit Societies i.e. Agricultural Credit Societies, Non Agricultural Credit Society or Other Credit Societies, the same is indicated in codes mentioned below along with the number of such societies in brackets. In case the facility is not available within the village the

distance of the nearest place where such facility exist is given :

(i)	Agricultural Credit Society	ACS
(ii)	Non- Agricultural Credit Society	NCS
(iii)	Other Credit Society	OCS

Column 12 : Recreational and cultural facilities

If facilities such as Cinema/Video hall, Sports Club, Stadium/Auditorium is available in the village. The same is recorded in these columns. If not available the particulars of the nearest place with the facility is recorded. The information is indicated in codes mentioned below along with the number of such facilities in brackets:

(i)	Cinema / Video Hall	CV
(ii)	Sports Club	SP
(iii)	Stadium / Auditorium	ST

Column 13 : Communications

If the village is served by any mode of public/ private transport like Bus, Railway Station or Navigable water ways they are to be mentioned as follows:

(i)	Bus	BS
(ii)	Railway Station	RS
(iii)	Navigable Waterway	NW

Column 14 : Approach to village

Approach to village refers to the state of road leading to village. The approach to the village is indicated in following codes :

(i)	Paved Road	PR
(ii)	Mud road	MR
(iii)	Foot path	FP
(iv)	Navigable River	NR
(v)	Navigable Canal	NC
(vi)	Navigable waterways other than River, Canal	NW

Column 15 : Nearest Town and distance

The distance is given in kilometers in brackets against the name of the town nearest to the village.

Column 16 : Power supply

Availability of Power Supply in the village, whatever may be the form of its use is given by using following codes :

(i)	Electricity for domestic use	ED
(ii)	Electricity for agricultural use	EAG
(iii)	Electricity for other purposes	EO
(iv)	Electricity for all purposes	EA

Column 17 : News Paper / Magazine

If village receives any News Paper/Magazines the same is noted in this column using following codes:

(i)	News Paper	N
(ii)	Magazine	M

Column 18 : Most important commodities manufactured

The name of three most important commodities manufactured in the village is recorded against this column.

Column 19 to 23 : Land use i.e. area under different types of land use

Land use data maintained by the State/ UT Govts. are furnished against these columns. The data concerning area under Forest, Irrigated land (by source), Un-irrigated land, Culturable waste and Area not available for cultivation in the village are shown against these columns. The area figures are given in hectare(s) up to one decimal. Desh '-' is recorded wherever the information is not made available by the concerned department. The codes used for different types of irrigation facilities available in the village are indicated below:

(i)	Government Canal	GC
(ii)	Private Canal	PC
(iii)	Well (without electricity)	W
(iv)	Well (with electricity)	WE
(v)	Tubewell (without electricity)	TW
(vi)	Tubewell (with electricity)	TWE
(vii)	Tank	TK
(viii)	River	R
(ix)	Lake	L
(x)	Waterfall	WF
(xi)	Others	O
(xii)	Total	T

The village directory also carries the following appendices.

Appendix-I It gives the abstract of educational, medical and other amenities available in villages C. D Block-wise of the district.

Appendix-I-A : Indicates number of villages C D Block wise having one or more primary schools.

Appendix-I-B : Indicates number of villages C D Block wise having primary, middle and secondary schools.

Appendix-I-C : Shows number of villages C D Block wise with different sources of drinking water facilities.

Appendix-II : Indicates the list of villages with 5,000 and above population which do not have one or more important amenities.

Appendix-II-A : Indicates list of Census Towns which do not have one or more amenities.

Appendix-III : It gives the land utilization data in respect of Census Towns / non-municipal Towns.

Appendix-IV : C D Block wise list of inhabited villages where no amenity other than drinking water facility is available.

Appendix-V : Summary showing number of villages not having Scheduled Castes population.

Appendix-VI : Summary showing number of villages not having Scheduled Tribes population.

Appendix-VII A, VII B : The appendix shows the list of villages according to proportion of the Scheduled castes and Scheduled Tribes to the total population by ranges.

Appendix-VIII : Indicates C D Block wise number of villages under each Gram Panchayat.

Appendix-IX : Shows number of different types of girls school in a village.

(b) List of villages merged in towns and outgrowths at 2001 Census :

The district Kalahandi was having three statutory towns, namely, Bhawanipatna(M), Kesinga (NAC) and Junagarh (NAC) in 1991 Census.The village Mukhiguda converted into a new CensusTown namely Mukhiguda (CT) in 2001 Census. In the district no outgrowth at 2001 Census has been cropped up.

SECTION II
TOWN DIRECTORY

Section II - Town Directory

NOTE EXPLAINING THE ABBREVIATIONS USED IN THE TOWN DIRECTORY

Town Directory statements (I to VII)

Statement I : Status and Growth History

Column (2) : Class, name and civic administration status of town :

Class has been introduced to facilitate analysis of town directory data at the state and all India levels. It is presented according to 2001 Census Population of the town as follows :

Population	Class
100,000 and above	I
50,000 - 99,999	II
20,000 - 49,999	III
10,000 - 19,999	IV
5,000 - 9,999	V
Below 5,000	VI

Town with a population of one hundred thousand (1,00,000)and above is treated as a city.

The civic administration status of the towns is indicated within bracket against the name of the town. The following abbreviations are used to denote civic status of town.

(I)	Municipal Corporation	M. Corp.
(II)	Municipal Committee	MC
(III)	Municipal Council	M Cl
(IV)	City Municipal Council	CMC
(V)	Town Municipal Council	TMC
(VI)	Municipal Board	MB
(VII)	Municipality	M
(VIII)	Cantonment Board/Cantonment	CB
(IX)	Notified Area	NA
(X)	Notified Town	NT
(XI)	Notified Area Committee/ Notified Area Council	NAC
(XII)	Notified Town Area	NTA
(XIII)	Industrial Notified Area	INA
(XIV)	Industrial Township	ITS
(XV)	Township	TS
(XVI)	Town Panchayat	TP
(XVII)	Nagar Panchayat	NP
(XVIII)	Town Committee/ Town Area Committee	TC
(XIX)	Small Town Committee	ST
(XX)	Estate office	EO
(XXI)	Gram Panchayat	GP
(XXII)	Census Town	CT

Others columns need no comments.

Statement II - Physical Aspects and Location of towns, 1999.

Column 3 to 5 : Physical Aspects

In this columns the Rainfall and Maximum & Minimum Temperature of the town is recorded.

Column 6, 7 and 8 :

Name of the State headquarters, District headquarters and Sub-Divisional headquarters with distance from the referent town in kilometers, is to be recorded respectively. If the names mentioned in these columns are the same as the referent town itself, the distance is recorded as (0) zero.

Column 9& 10 :

Name of the nearest city with one lakh and more and five lakhs and more population are recorded.

Column 11, 12 and 13 :

If referent town enjoys the facility of railway station, bus route facility or navigable river/canal. Its name is to be mentioned. If not available, then the name of nearest place with distance, where such facility exists is to be mentioned.

Statement III : Municipal Finance 1998 – 1999

Item-wise amount of receipt and expenditure in thousand rupees, relating to municipal finance of the town for the year 1998-99 is to be recorded.

Statement IV : Civic and Other amenities, 1999

Column (1 to 5) : Self explanatory.

Column (6) : Road length (in kms.)

Information about kutcha/pucca road is to be recorded separately for the roads within the limits of the referent town.

(i)	Pucca Road	PR
(ii)	Kutcha Road	KR

Column (7) : System of Sewerage

Generally, by sewerage system is implied the network of mains and branches of underground conduits for the conveyance of sewerage to the point of disposal. Sewers that carry only household and industrial wastes are called separate sewers, those that carry storm water from roofs, streets and other surface are known as storm water drains, while those carrying both sewage and storm water are called combined sewers.

The codes used for different types of drainage system are as follows :

(i)	Sewer	S
(ii)	Open Surface Drains	OSD
(iii)	Box Surface Drains	BSD
(iv)	Sylk Drains	SD
(v)	Cesspool method	CP
(vi)	Pit System	Pt
(vii)	Others	O

Column 8 to 11 : Number of latrines

Number of various types of latrines both Public and Private are given in these columns.

Column 12 : Method of disposal of night soil

The various prevalent method of disposal of night soil are given below with codes :

Head Loads	HL
Basket	B
Wheel Barrows	WB
Septic Tank	ST
Pit System	Pt
Sewerage	S
Others	O

Column 13 and 14 : Water supply

Sources and capacity of storage system. The following codes are used in these columns:

Column 13:

(i)	Tap water	T
(ii)	Tube-well water	TW
(iii)	Tank Water	TK
(iv)	Well water	W

Column 14:

(v)	Over Head Tank	OHT
(vi)	Service Reservoir	SR
(vii)	River Infiltration Gallery	RIG
(viii)	Bore Well Pumping System	BWP
(ix)	Pressure Tank	PT

The information on major source of water supply are given in column 14 and the storage capacity against each in kilo-litres (in bracket) are presented in column 15.

Column 15 : Fire Fighting Service

In case the fire fighting service is available in the referent town 'yes' is recorded. If the facility is not available within the town. The name of the nearest place having this facility with its distance from the referent town has been recorded.

Column 16 to 20 : Electrification (Number of connections)

Different types of electric connections have been shown in these columns, i.e. Domestic, Industrial, Commercial, Road lighting (points) & others.

Statement V : Medical, Educational, Recreational and Cultural Facilities, 1999

Column 1 to 3 : Self explanatory.

Column 4 & 5 :

The data covers all such medical institutions run by or aided by Government/Semi Government/Local bodies and Charitable institutions or Social agencies like the Missionaries. Where the family planning centres are attached to hospitals or maternity and child welfare centres or Primary Health Centres, may be treated as independent units and counted separately using following codes :

(i)	Hospital	H
(ii)	Dispensary	D
(iii)	Health Centre	HC
(iv)	Family Welfare Centre	FWC
(v)	T.B. Clinic	TB
(vi)	Nursing Home	NH
(vii)	Others	O

In case of more than one institutions of any type, it is indicated within brackets the number of such institution (s) e.g. D(3), NH(8), etc. The institutions have further been distinguished by providing additional codes within the bracket as given below :

Ayurvedic	A
Unani	U
Homoeopathic	Hom.

Column 6 to 9 :

The codes used for these columns are as follows:

(i)	Arts only	A
(ii)	Science only	S
(iii)	Commerce only	C
(iv)	Arts & Science only	AS
(v)	Arts & Commerce only	AC
(vi)	Combined for all categories-Arts, Science and Commerce	ASC
(vii)	Law	L
(viii)	University	U
(ix)	Others	O

Column 10 : Recognized shorthand, typewriting and vocational training institutes

"Recognised" should mean recognised by some statutory authority, like education department, commerce department, labour department etc. of the government or semi government or autonomous bodies, public sector undertakings etc.

The following codes are used :

(i)	Vocational Training Institute	VT
(ii)	Shorthand	SH
(iii)	Typewriting	Type
(iv)	Shorthand & Typewriting	SH Type
(v)	Others	O

The vocational institutions like - Applied Art/ Painting college, Pharmacy college, B. Ed. College, Teacher's Training Institute, Music / Dance School, Nursing School etc. are covered under 'Others'.

Column 11 to 14 :

Higher Secondary/Intermediate/Senior Secondary/ PUC/Junior College level, Secondary/Matriculation, Middle Schools/ Junior Secondary and Primary Schools.

School up to class V are treated as Primary or elementary schools. These include Nursery schools, Kindergarten schools, Pre-Primary schools, Junior Basic schools upto class V and Primary schools upto class IV.

Schools upto VIII are considered as Middle school or Junior Secondary.

Schools upto class X are considered as Matriculation or Secondary schools.

Schools upto XI or XII classes are considered as Higher Secondary / Intermediate / Pre University / Junior College etc. This would cover 10+2 classes whether held in schools or college.

If there are composite schools like middle schools with primary classes or Secondary schools with Middle classes, these are also included in the number of Primary and Middle schools, respectively. For example, if in a town, there are two Primary Schools and one Middle school with Primary classes, the number of Primary schools in the town is given as three and that of Middle schools as one though there are only three educational institutions.

If there are more institutions of a type in the town, the number is indicated within bracket along with the abbreviation, e.g. P(4), M(3).

Column 15 : Adult literacy class/centres

This column has been introduced keeping in view the Minimum Needs Programme of the Planning Commission. There are number of Adult Education Centres which are included in these columns.

If an educational facility is not available in the town, the name of the nearest place and its distance in kilometres from the town where the facility is available is mentioned.

Column 16 : Working Women's hostels with number of seats

The number of working women's hostel if available in the referent town is mentioned with number of seats. If the facility is not available in the town the name of nearest place with distance where the facility is available is recorded.

Column 17 to 19 : Recreational and Cultural Facilities

Stadium, Cinema, Auditorium/Drama/Community Hall are covered under recreational & cultural facilities. The particulars of permanent recreational facilities are considered for these columns.

Column 20 : Public Libraries, Reading Rooms

Number of public libraries and reading rooms available in the referent town are recorded in codes as follows :

(i) Public Library PL
(ii) Reading room RR

Statement VI : Trade, Commerce, Industry and Banking, 1999

Column 3 to 8 : Name of three most important commodities exported and names of three most important commodities manufactured in the town are recorded.

Column 9 : Number of Banks

Number of Banks available in the referent town both Commercial and Co-operative banks are recorded against this column.

Column 10 & 11 : **Number of Agricultural Credit Societies and Non Agricultural Credit Societies**

The total number of Agricultural Credit Societies and Non Agricultural Credit Societies in the referent town are recorded against these columns.

Statement VII : Civic and other Amenities in Slums, 1999

This is the statement on civic and other amenities in all slums whether notified or not and for all towns having statutory bodies, like municipality, Municipal Corporation, Town area committee etc.

ANNEXURES

ANNEXURE-I

Number of villages under each Gram Panchayat

Gram Panchayat plays a pivotal role in the Panchyati Raj System. It entrusts the people with the power to manage the local affairs of villages for the development and better governance of their locality. In the rural areas, Gram Panchayat works for the development of road, sanitation, education, drinking water facilities, minor irrigation and supply of power etc.to the villages.The overall progress of the villages coming under the Gram Panchayat lies with the participation of people in these activities. Keeping this in view, the data on Gram Panchayat and the number of villages coming under each with their population have been presented in the table below.

The analysis of the data of Kalahandi district shows that among 13 nos. of C.D. Block in the district, Bhawanipatna C.D. Blocks has the highest number (23 nos.) of Gram Panchayats and Kalampur C.D Block is at the least with only 7 nos. of Gram Panchayats.

ANNEXURE-II

Fertility and Mortality, 1991 Census

The district Kalahandi located at the western part of Orissa was split up into two districts namely Nuapada and Kalahandi after the 1991 Census. The estimates for 1991 Census had been calculated for the undivided district of Kalahandi and the same crude birth rate, fertility rate and other tables and statements presented and discussed herein after will be applicable for the newly formed district of Nuapada as the same for each of the districts is not available separately for the 1991 Census.

Table- II provide details of child mortality by q (1), q (2), q (3) and q (5) for persons, males and females. Here q (1), q (2), q (3) and q (5) refer to probability of dying between birth and age one, two, three and five respectively. The table shows a sharp decline of child mortality in age one, two, three and five in 1991 both in persons and females in the state and the district in comparison to 1981. In 1981 the child mortality rate was much higher in the state as well as in the district. A notable feature that emerges out of the study of the annexure is that the female child mortality in all the ages is lower than the male child both in the district and in the state in 1981 and 1991.

Table -II
Estimates of child mortality indicators by sex at state and district

ANNEXURE-III

Various measures of Fertility and Mean Age at marriage, 1991 Census

Fertility and mortality are natural processes and contribute substantially to the growth of population. The 1991 Census also records information relating to fertility namely age at marriage, number of surviving children, number of children ever born alive and children born alive during the last year. The first three questions were asked to all ever-married women and the last question related to currently married women only. The measures of fertility worked out are based on F-Series tables of 1991 Census pertaining to Orissa and these measures have been defined under Non-Census Concepts.

Data on various measures of fertility and mean age at marriage for erstwhile 13 districts of Orissa and that of the state on the basis of 1991 Census results are presented in the Table given below.

As shown in Table- III the fertility rate for the state is 4.27 and for the district is 3.82 per 1,000 population and the crude birth rate of the state is

Table -III

Various measures of fertility and mean age at marriage, 1991 Census

Sl. No.	State/District	GFR	GMFR	TFR	TMFR	CBR	Number of Children ever born per woman in age group 45-49	Child woman Ratio (0-4) Ages	Mean age at marriage of currently married women

13	.Puri	123	164	3.96	5.38	29.92	4.28	41.9	18.00

Col.8 CWR (0-4) No. of children of age 0-4 years per 100 women aged 45-49 years (District profile, 91).

higher than the rate recorded for the district. Among all the districts of the state Phulabani district records highest fertility rate of 5.0 whereas Kalahandi district claims 12th position with 3.82 per thousand population.

Child-woman ratio:

The ratio between the child and woman is a very useful and simple form of fertility measurement. Child-woman ratio is the ratio of children under five years of age (0-4 year) and women from 45-49 years of age. As per the 1991 Census, the child-woman ratio was 46.5 at the state level. At the district level it is seen that seven districts namely Kendujhar, Mayurbhanj, Baleshwar, Phulabani, Koraput, Ganjam and Dhenkanal have recorded higher child-woman ratio than the state and the rest six districts have recorded lower child-woman ratio.

Number of children ever born per woman in 45-49 age group, 1991

As shown in this table, the number of children ever born per married women in the 45-49 age group was 4.22 at the state level and at the district level, highest number of children ever born to women in this age group was recorded in Baleshwar district followed by Cuttack, Kendujhar, Dhenkanal and Puri district. The lowest number of 3.63 children per ever-married women in this age group is noticed in Koraput district.

Mean age at marriage of currently married women:

Mean age or in other words, the average age at marriage of currently married women in the state is 17.96 years as per the 1991 Census.

As far as the average age of currently married women at the districts is concerned, it is observed that six districts namely Sundargarh, Koraput, Phulabani, Kendujhar, Cutttack and Puri have recorded higher average than the state. However, among these districts, Koraput, Phulabani, Sundargarh and Kendujhar are mainly inhabited by scheduled tribe population. The average age at marriage of currently married women of Kalahandi district is 17.57 which is below the state average.

ANNEXURE-IV

Percentage distributation of migrants by place of birth/place of last residence, 2001 Census

Migration is a fact of life. It contributes substantially to the growth of population. Even in those economies where mobility is almost absent the female population migrate after marriage. Internal migration may be between two places. It may be inter district, inter-regional and inter state migration. In the event of internal migration, the population of the country remains unaffected whereas only sub-national or regional population is affected.

The internal migration of population has not only demographic but also socio-economic implications and its effect are more serious. Such migration tends to affect age, sex ratio and demographic behaviour such as fertility, mortality, and above all the population structure as a whole.

There are 68,218 migrants in the un-divided district of Kalahandi of which 20,613 are males and 47,605 are females. The composition of migrants in the district

Table- IV

Inmigrants classified by place of birth, 2001

State/	Total			From other districts of the State			From other States/UTs			From other Countries		
District	Person	Male	Female	Person	Male	Female	Person	Male	Female	Person	Male	Female
1	2	3	4	5	6	7	8	9	10	11	12	13
ORISSA	3,189,242	1,159,780	2,029,462	2,472,336	868,127	1,604,209	658,984	260,729	398,255	57,922	30,924	26,998
				(77.52)	(74.85)	(79.05)	(20.66)	(22.48)	(19.62)	(1.82)	(2.67)	(1.33)
Kalahandi	68,218	20,613	47,605	58,832	17,265	41,567	9,258	3,277	5,981	128	71	57
				(86.24)	(83.76)	(87.32)	(13.57)	(15.90)	(12.56)	(0.19)	(0.34)	(0.12)

shows that 86.24 per cent have migrated from different districts of the state. Inmigrants from other states of India constitute 13.57 per cent. Inmigrants from other countries form 0.19 per cent only.

Coming to the sex-wise distribution of migrants in the district it is seen that the proportion of male migrants in the district is higher than their female counterparts. But in state level the female migrants are more than their male counterparts in the district. The proportion of female migrants from other states/ UTS to the district is higher than the males. Similarly male immigrants from other countries constitute 0.34 percent as against 0.12 per cent of female. Above all, the inmigrants from other districts of the state constitute the majority followed by other states/UT and other countries.

Table- V

Migrants classified by place of last residence with duration of residence 0-9 years, 2001Census

State/	Total			From other districts of the State			From other States/UTs			From other Countries		
District	Person	Male	Female	Person	Male	Female	Person	Male	Female	Person	Male	Female
1	2	3	4	5	6	7	8	9	10	11	12	13
ORISSA	1,176,547	494,822	681,725	942,929	388,565	554,364	229,687	103,986	125,701	3,931	2,271	1,660
				(80.14)	(78.53)	(81.32)	(19.52)	(21.01)	(18.44)	(0.33)	(0.46)	(0.24)
Kalahandi	25,474	9,479	15,995	21,729	7,782	13,947	3,714	1,677	2,037	31	20	11
				(85.30)	(82.10)	(87.20)	(14.58)	(17.69)	(12.74)	(0.12)	(0.21)	(0.07)

Table-V presents data on inmigrants by place of last residence as per 2001 Census. Migration from the place of last residence other than the place of birth may be termed as last residence migration. Such migrants number 1,176,547 persons in the state and 25,474 persons in the district. Among 25,474 migrants into the district of Kalahandi, 82.10 per cent males and 87.20 per cent females have migrated from other districts of the state. Inmigration from other states constitutes 17.69 per cent males and 12.74 per cent females. Inmigrants from other countries form a very negligible proportion of 0.12 per cent persons.

ANNEXURE - V

Brief account of main religions in the district as per 2001 Census

Religion is one the important characteristics of population. It not only influences the socio-cultural life of the people but also binds the whole population belonging to a specific religion in the bonds of unity and brotherhood. The information on religion collected by Census is of great interest to the public in general and anthropologists, administrators, sociologists, demographers and planners in particular.

At the 2001 Census, six numerically major religions of the State and the Kalahandi District along with their population are shown in Table-VI. But in 2001 Census other religions and religions not stated have been taken into account and are shown in Table-VI.

As noticed in Table-VI, followers of Hindu religion constitute more than 90 per cent in the State and Kalahandi district. In the district the followers of Hindu religion constitute 99.02 per cent. Although Christian population stands second with 0.52 per cent, Muslim population with 0.27 per cent ranks third position in the district. The followers of Sikh, Buddhist and Jain religions claim a very negligible proportion.

Table - VI

Religions arranged in decending order for the State and District, 2001 Census

State/ District	Religion	No. of followers	Percentage to total Population	Percentage of Population	
				Rural	Urban
1	2	3	4	5	6
ORISSA	All Religions	36,804,660	100.00	85.01	14.99
	Hindus	34,726,129	94.35	85.51	14.49
	Christians	897,861	2.44	85.00	15.00
	Muslims	761,985	2.07	58.33	41.67
	Others	361,981	0.98	98.03	1.97
	Religion not stated	20,195	0.05	89.17	10.83
	Sikhs	17,492	0.05	11.96	88.04
	Buddhists	9,863	0.03	85.93	14.07
	Jains	9,154	0.02	34.04	65.96
Kalahandi	All Religions	1,335,494	100.00	92.50	7.50
	Hindus	1,322,363	99.02	92.78	7.22
	Christians	6,923	0.52	86.64	13.36
	Muslims	3,592	0.27	35.02	64.98
	Jains	1,248	0.09	31.97	68.03
	Religion not stated	680	0.05	96.76	3.24
	Sikhs	612	0.05	6.86	93.14
	Buddhists	47	0.00	63.83	36.17
	Others	29	0.00	72.41	27.59

The religion not stated and other religions are also very meagre.

A look at the rural urban distribution of followers of these religions reveals that 92.78 per cent followers of Hindu and 86.64 per cent of Christian are reported from rural areas of the district and concentration of followers of Jain and Sikh religions is found in urban areas of the district.Muslim also constitute 35.02 per cent of population in urban areas whereas 64.98 per cent live in urban places of the district.

In the 1991 Census, the total number of followers of all Religions in undivided Kalahandi district was 1,600,385 of which the highest number of followers was claimed by Hindus (99.15 per cent) followed by Muslims (0.37 per cent) and Christians (0.32 per cent).

ANNEXURE-VI

Marital Status of population as per 2001 Census

Marital status is one of the important demographic characteristics of the population. The composition of population on the basis of marital status is defined in Indian population census as i) never married ii) married iii) widowed iv) divorced and separated for the state and the district and is presented in Table VII.

Table- VII reveals that the married category claims 48.07 per cent of the total population closely followed by never married category in the district. The widowed category forms 4.99 per cent and the divorced and separated constitutes a very negligible proportion. Coming to the sex-wise distribution of population under different marital category, it is seen

Table -VII
Sex-wise distribution of Population by Marital Status, 2001 Census

State / District	Marital Status	Persons	Males	Females
1	2	3	4	5
ORISSA	Total	36,804,660	18,660,570	18,144,090

		(48.07)	(47.63)	(48.51)
	Widowed	66,599	11,830	54,769
		(4.99)	(1.77)	(8.20)
	Divorced/Separated	5,835	2,149	3,686
		(0.44)	(0.32)	(0.55)

that 50.28 per cent males belong to never married as against 42.74 per cent among females. Similarly 47.63 per cent males and 48.51 per cent females belong to married category, 1.77 per cent of males and 8.20 per cent of females belong to widowed category while divorced and separated marital status claim a very negligible proportion both among males and females. The same pattern of distribution of persons, males and females in different marital status holds good at the state level.

In the undivided district of Kalahandi,the percentage of married persons was 47.55, whereas the percentage of never married persons was 47.00. The percentage of widowed and divorced /separated persons constituted 4.96 and 0.47 respectively in the 1991 Census.

ANNEXURE-VII

Age, Sex and Education in the district, 2001 Census

Educational qualification according to age and sex is depicted in various tables of Census. Certain concepts associated with literacy have been defined in the earlier paragraphs under "Census Concepts".

Distribution of literate persons in different Educational levels in the State : 2001

Distribution of literate persons in different educational levels at the state level is shown below.

Table - VIII

Distribution of Literate and educated persons in different educational levels in the State, 2001

Name of State/ District	Educational Level	Persons	Males	Females
1	2	3	4	5
ORISSA	Total Population	36,804,660	18,660,570	18,144,090
	Literate	19,837,055	11,992,333	7,844,722
	i) Literate without any formal schooling	428,001	279,304	148,697
	including educational level unclassified	(2.16)	(2.33)	(1.90)
	ii) Below Primary	5,755,797	3,328,385	2,427,412
		(29.02)	(27.75)	(30.94)
	iii) Primary	5,798,954	3,280,957	2,517,997
		(29.23)	(27.36)	(32.10)
	iv) Middle	2,875,760	1,783,236	1,092,524
		(14.50)	(14.87)	(13.93)
	v) Matric/Secondary	2,616,294	1,665,245	951,049
		(13.19)	(13.89)	(12.12)
	vi) Higher secondary/Intermediate	1,021,802	664,408	357,394
	Pre-University/Senior secondary	(5.15)	(5.54)	(4.56)
	vii) Non-technical diploma or	8,944	7,495	1,449
	certificate not equal to degree	(0.05)	(0.06)	(0.02)
	viii) Technical diploma or certificate	145,863	116,593	29,270
	not equal to degree	(0.74)	(0.97)	(0.37)
	ix) Graduate & above	1,185,640	866,710	318,930
		(5.98)	(7.23)	(4.07)

The proportion of literate persons in different educational levels does not provide an encouraging picture since more than 50 per cent (58.25 per cent) among literate persons, males and females have attained only primary and below primary level of education followed by middle standard with 14.50 per cent persons, 14.87 per cent males and 13.93 per cent females.

As far as technical education is concerned, it may be mentioned here that the proportion of such persons to total literate persons is abysmally low. It is only 0.74 per cent.

Among the higher educational levels graduate and above educational level claims 5.98 per cent followed by higher secondary/ intermediate with only 5.15 per cent.

Table - IX

Distribution of Literate and educated persons in different educational levels in the District, 2001

Name of State/ District	Educational Level	Persons	Males	Females
1	2	3	4	5
Kalahandi	Total Population	1,335,494	667,526	667,968
	Literate	513,383	349,473	163,910
	i) Literate without any formal schooling including educational level unclassified	21,295 (4.15)	15,851 (4.54)	5,444 (3.32)
	ii) Below Primary	174,170 (33.93)	114,167 (32.67)	60,003 (36.61)
	iii) Primary	156,321 (30.45)	100,434 (28.74)	55,887 (34.10)
	iv) Middle	67,866 (13.22)	48,145 (13.78)	19,721 (12.03)
	v) Matric/Secondary	53,411 (10.40)	39,248 (11.23)	14,163 (8.64)
	vi) Higher secondary/Intermediate Pre-University/Senior secondary	19,098 (3.72)	14,279 (4.09)	4,819 (2.94)
	vii) Non-technical diploma or certificate not equal to degree	98 (0.02)	75 (0.02)	23 (0.01)
	viii) Technical diploma or certificate not equal to degree	3,220 (0.63)	2,642 (0.76)	578 (0.35)
	ix) Graduate & above	17,904 (3.49)	14,632 (4.19)	3,272 (2.00)

As per the 2001 Census the population of Kalahandi district was 1,335,494 of which 513,383 are literate and educated persons. Among the literate persons 349,473 are males and 163,910 are females. The literate persons constitute 45.94 per cent of the total population of the district. The literacy has been calculated after excluding the population in the age group 0-6 who are considered as illiterates. Distribution of literates is shown in the above Table-IX for the district.

The educational attainment of the population has been classified into different educational levels. Among these educational levels, middle educational level claims 13.22 percent followed by primary level with 30.45 percent and below primary level with 33.93 per cent. Matriculation and secondary level claims 10.40 per cent among higher educational level, graduate and above educational levels claims 3.49 per cent followed by higher secondary/senior secondary with 3.72 per cent.The highest number of literates are available in the category of literate but below middle class closely followed by below matric. Graduates and above are very few in the district.

In the 1991 Census the total literate persons of the undivded Kalahandi district was 401,298 of which the highest percentage was recorded under Below primary educational level i.e. 41.38 and the lowest percentage was 0.18 in the educational level of Non-technical diploma not equal to degree. The percentage of Graduate and above persons was 0.52 only whereas Middle standard and Matriculation/Secondary claimed 21.89 and 7.50 per cent respectively to total literate persons of the district.

Table - X

Distribution of females in the age group 15-44 years by educational level, 2001

State/District	Total Rural Urban	No. of Women aged 15-44 Years	Percentage of Women aged 15-44 years by educational level					
			Total	Illiterate	Literate but below middle	Middle but below Matric	Matric but below Graduate	Graduate & above
1	2	3	4	5	6	7	8	9
ORISSA	Total	8,589,378	100	46.29	26.39	9.06	14.78	3.48
	Rural	7,224,698	100	50.62	27.07	8.72	11.74	1.85
	Urban	1,364,680	100	23.39	22.76	10.89	30.84	12.12
Kalahandi	Total	304,031	100	70.85	17.4	4.49	6.22	1.04
	Rural	279,706	100	74.14	17.03	4.01	4.35	0.48
	Urban	24,325	100	33.03	21.71	10.08	27.76	7.42

Table- X given above provides distribution of women in age group 15-44 in different educational levels in the state and the district. The proportion of females in all the educational levels is significantly lower both in total, rural and urban areas of the district as compared to the state average. The percentage of illiterate in the district is 70.85. The percentage of literate but below middle is higher than the other categories of educational level of this particular age group of women.

During the Census 1991, in the undivided district of Kalahandi the percentage of illiterate in the female age group of 15-44 was 86.35. On the literary group, the highest percentage with 7.73 was claimed by literate but below middle followed by middle but below matric with 3.62 percent, matric but below graduate with 1.94 percent and lastly graduate and above was claimed with 0.35 percent. The percentage of urban literacy was more than the rural literacy rate in almost all of the educational levels.

Table -XI

Children in the age group 0-14 years with number of children attending school, 2001 Census

Name of the State/ District	Description	Total			Rural			Urban		
		Persons	Males	Females	Persons	Males	Females	Persons	Males	Females
1	2	3	4	5	6	7	8	9	10	11
ORISSA	Total Population in the age group 0-14 years	12,207,872	6,235,873	5,971,999	10,592,499	5,402,181	5,190,318	1,615,373	833,692	781,681
	No. of Children attending School	5,618,880	3,042,840	2,576,040	4,721,148	2,569,809	2,151,339	897,732	473,031	424,701
	Percentage	(46.03)	(48.80)	(43.14)	(44.57)	(47.57)	(41.45)	(55.57)	(56.74)	(54.33)
Kalahandi	Total Population in the age group 0-14 years	456,417	230,477	225,940	425,175	214,670	210,505	31,242	15,807	15,435
	No. of Children attending School	179,416	103,739	75,677	162,243	94,785	67,458	17,173	8,954	8,219
	Percentage	(39.31)	(45.01)	(33.49)	(38.16)	(44.15)	(32.05)	(54.97)	(56.65)	(53.25)

Table-XI depicts the children in the age group of 10-14 years with number of children attending school as per 2001 Census. From the above table it is evident that 39.31 per cent of children are attending school in the district which is of course lower than the state average of 46.03 per cent. Male children outnumber the females in this category as the percentage of male is 45.01 whereas the percentage of female is only 33.49. Similarly, children in this age group in urban areas attending school are more than the rural area as the total percentage of pupil attending school is 53.25 per cent in urban areas and it is only 38.16 per cent in rual areas which is also less than the state average.

ANNEXURE- VIII

Mother tongue, 2001 Census

Language is an important attribute of population and has great relevance and significance in multi ethnic and multi lingual social structure like Orissa. The definition of mother tongue is given under "Census Concept"

The Census of India is the richest source of language data and has thrown much light on the ethnic and linguistic characteristics of the population. Like the previous census the mother tongue as returned by individual was collected and were classified and grouped under appropriate languages according to their linguistic characteristics. Details of mother tongue returns as recorded in 2001 Census are given in Table- XII for the State.

At the State level, the major languages returned as mother tongue are Oriya (81.22 per cent) followed by Kui (2.48 %), Telugu (1.94 %), Santali (1.82 %) and other languages. Oriya language being the language of the State holds the highest percentage followed by languages mainly spoken by the tribal people of the State. The scheduled languages which have been returned as mother tongue and have a prominent place are Telugu (1.94 %), Urdu (1.66 %), Bengali (1.33%) and Hindi (1.02%).

Table - XII

Table - XIII

Major Languages returned as Mother Tongue in Kalahandi District, 2001 Census

Sl.No.	Mother tongue	No. of persons who returned the language as their mother tongue, 2001					
		TOTAL	Percentage to total population	RURAL	URBAN	Proportion	
						Rural	Urban
	KALAHANDI	1,335,494	100.00	1,235,275	100,219	92.50	7.50
1	ORIYA	1,235,011	92.48	1,144,296	90,715	92.65	7.35
2	KUI	73,810	5.53	73,724	86	99.88	0.12
3	HINDI	7,884	0.59	3,145	4,739	39.89	60.11
4	TELUGU	6,009	0.45	4,425	1,584	73.64	26.36
5	SAVARA	3,099	0.23	3,048	51	98.35	1.65
6	CHHATTISGARHI	2,485	0.19	2,097	388	84.39	15.61
7	BANJARI	1,745	0.13	1,743	2	99.89	0.11
8	URDU	1,247	0.09	146	1,101	11.71	88.29
9	BENGALI	684	0.05	440	244	64.33	35.67
10	PUNJABI	438	0.03	19	419	4.34	95.66
11	Total of Other Mother Tongues	3,082	0.23	2,192	890	71.12	28.88

The total population of the district has been divided into different mother tongues like Oriya, Kui, Hindi, Telugu, Savara, Chhattisgarhi, Urdu, Bengali, Punjabi etc. In this district Oriya mother tongue is most dominant having 92.48 per cent of the total population followed by Kui mother tongue covering 5.53 per cent and the balance 1.99 per cent of the population are distributed in Hindi, Telugu, Savara, Chhattisgarhi, Banjari, Urdu, Bengali and Punjabi mother tongue.

It is worth mentioning that the percentage of people having different mother tongues are invariably more in rural area as compared to urban area. For instance, about 92.65 per cent of people belonging to Oriya mother tongue live in rural area whereas only 7.35 per cent people belong to urban places. Similarly 99.88 per cent of people of Kui mother tongue live in rural areas and remaining 0.12 per cent speakers of Kui mother tongue live in urban areas.

MOTIF

Daringbadi, a vast area at the height of about 3000ft above sea level is an ideal summer resort which is popularly named as Kashmir of Odisha. The place is gifted with natural bounties such as pine jungles, coffee gardens and beautiful valleys. . It is the only place in Odisha which experiences snow fall during Winter. The journey from the plains to the hills of Daringbadi is an experience in itself . This pretty hill station is 100 kms from Phulabani and 50 kms from Baliguda.

FOREWORD

The District Census Handbook (DCHB) is an important publication of the Census Organization since 1951. It contains both Census and non Census data of urban and rural areas for each District. The Census data provide information on demographic and socio-economic characteristics of population at the lowest administrative unit i.e. of each Village, Town and Ward of the District. The Primary Census Abstract (PCA) part of this publication contains Census data including data on household amenities collected during 1stphase of the Census i.e. House Listing and Housing Census. The non Census data presented in the DCHB is in the form of Village Directory and Town Directory contain information on various infrastructure facilities available in the village and town viz; education, medical, drinking water, communication and transport, post and telegraph, electricity, banking, and other miscellaneous facilities. Later on, the Telegraph Services were closed by the Government of India on 15th July, 2013. The data of DCHB are of considerable importance in the context of planning and development at the grass-root level.

2. In the 1961 Census, DCHB provided a descriptive account of the District, administrative statistics, Census tables and Village and Town Directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to Village and Town Directory, Part-B to Village and Town PCA and Part-C comprised analytical report, administrative statistics, District Census tables and certain analytical tables based on PCA and amenity data in respect of Villages. The 1981 Census DCHB was published in two parts: Part-A contained Village and Town Directory and Part-B the PCA of Village and Town including the SCs and STs PCA up to Tahsil/Town levels. New features along with restructuring of the formats of Village and Town Directory were added. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent Village, the distance in broad ranges from the nearest place having such an amenity, was given.

3. The pattern of 1981 Census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 Census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 Census. One of the important innovations in the 1991 Census was the Community Development Block (CD Block) level presentation of Village Directory and PCA data instead of the traditional Tahsil/Taluk/PS level presentation.

4. As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and `most important commodity' manufactured in a Village in addition to prescribed facilities of earlier Censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

5. The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. These newly

added amenities are: Pre-Primary School, Engineering College, Medical College, Management Institute, Polytechnic, Non-formal Training Centre, Special School for Disabled, Community Health Centre, Veterinary Hospital, Mobile Health Clinic, Medical Practitioner with MBBS Degree, Medical Practitioner with no degree, Traditional Practitioner and faith Healer, Medicine Shop, Community Toilet, Rural Sanitary Mart or Sanitary Hardware Outlet in the Village, Community Bio- gas, Sub Post Office, Village Pin Code, Public Call Office, Mobile Phone Coverage, Internet Cafes/ Common Service Centre, Private Courier Facility, Auto/Modified Autos, Taxis and Vans, Tractors, Cycle-pulled Rickshaws, Carts driven by Animals, Village connected to National Highway, State Highway, Major District Road, and Other District Road, Availability of Water Bounded Macadam Roads in Village, ATM, Self-Help Group, Public Distribution System(PDS) Shop, Mandis/Regular Market, Weekly Haat, Agricultural Marketing Society, Nutritional Centers (ICDS), Anganwadi Centre, ASHA (Accredited Social Health Activist), Sports Field, Public Library, Public Reading Room, Assembly Polling station, Birth & Death Registration Office. In the Town Directory, seven Statements containing the details and the data of each Town have been presented viz.; (i) Status and Growth History of Towns, (ii) Physical Aspects and Location of Towns, (iii) Civic and other Amenities (iv) Medical Facilities, (v) Educational, Recreational & Cultural Facilities, (vi) Industry & Banking, and (vii) Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 Census as presented in earlier Census.

6. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and TownDirectory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

7.The Village and Town level amenities data have been collected, compiled and computerized under the supervision of Shri Bishnupada Sethi, IAS, Directorate of Census Operations, Odisha. The task of Planning, Designing and Co-ordination of this publication was carried out by Dr. Pratibha Kumari, Assistant Registrar General (SS) under the guidance & supervision of Dr. R.C.Sethi, Ex-Addl. RGI and Shri Deepak Rastogi present Addl.RGI. Shri A.P. Singh, Deputy Registrar General, (Map) provided the technical guidance in the preparation of maps. Shri A.K. Arora, Joint Director of Data Processing Division under the overall supervision of Shri M.S.Thapa, Addl. Director (EDP) provided full cooperation in preparation of record structure for digitization and validity checking of Village and Town Directory data and the programme for the generation of Village Directory and Town Directory including various analytical inset tables as well as Primary Census Abstract (PCA). The work of preparation of DCHB, 2011 Census has been monitored in the Social Studies Division**.** I am thankful to all of them and others who have contributed to bring out this publication in time.

PREFACE

The District Census Handbook (DCHB) compiled by the Census Organization is one of the most valuable publications of the Census. The demographic data presentedwill serve the interests of the data users. 2011 Census has been completed successfully through a vast army of trained enumerators. It is to mention here that modern census is no more confined to mere counting of heads, itis,as it were, a kind of stock-taking of the nation's human resources.Information of every individual besides a host of other activities has been collected. Thus, it has become an indispensable instrument of making policy for developmentand planning often referred to by the planners, data users, scholars and people from different disciplines and aims at presenting a complete picture of socio-economic and cultural settings.

The District Census Handbook was first introduced as an auxiliary to 1951 Census and appeared as a State Government publication in more comprehensive and ambitious form. As per the instructions, the Director of Census had the responsibility of providing the Census data on PCA as well as non-Census socio-economic and administrative statistics and village and Town Directory for this publication which was the responsibility of the state Government. In 1951 and 1961 it was published in one volume. During 1971 the DCHB series were planned in three parts. Part A related to Village and Town Directory, Part B to Village and Town PCA and Part C comprised of analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages.

During 1981 census DCHB was published in two parts. Part A related to village and Town Directory whereas Part B was containing Village and Town wise PCA.Some new features along with the restructuring of the formats of village and Town Directory were introduced in the DCHBs.

The manner of presentation of DCHB of 1991 Census was by and large the same as followed during 1981 Census.However the format of PCA was restructured slightly for the benefit of data users. Nine-fold industrial classification of main workers was presented instead of four-fold industrial classification as was done during 1981 census. In addition to this, the population in the age group 0-6 with sex break-up was included in PCA for the first time with a view to enabling data users to compute more realistic literacy rate as all children below 7 years of age were treated as illiterate.

The most important changes during 1991 census were the presentation of data at the Community Development Block level instead of traditionalpattern of Police Station level.

The DCHB presentation during 2001 census was almost in same manner as was during 1991 census. It was more informative and exhaustive in terms of coverage and content. Some more information was collected through Village Directory. Again the PCA was restructured during 2001 Census. Four-fold industrial classification of both main workers and marginal workers were presented separately instead of nine-fold industrial classification of main workers, which was done only during 1991 census. The eight digits permanent location codes (PLCN) were assigned to all the villages and towns keeping in view of the future needs. The DCHBs were not published by State Govt. from 2001 census. It was brought out by Government of India and wasavailable in electronic format for the first time during 2001 census.

During 2011 census the coverage of village Directory has been widened by inclusion of a number of new amenities. The information for the village directory was collected from the Tahasildars and for the town directory it was collected from the Municipal Commissioners of Municipal Corporations and Executive Officers of Municipalities and NACs.

All steps have been taken to remove the discrepancies but the existence of some errors cannot be ruled out. The presentation of DCHBs is almost in the same pattern as was during 2001 Census. It is presented CD Block wise in two parts in two separate volumes. Part A contains Village and Town directory & Part B containsVillage andTown wise Primary Census Abstract. One of the most important inclusions in the presentation of data in PCA is the data for marginal workers which has been presented in two separate categories i.e. persons worked for a period of 3-6 months and less than 3 months.

In 2011 Census, MDDS (Meta Data and Data Standard) code assigning a continuous code number to all the districts, sub-districts, Towns and Villages of the country has been introduced.

It is hoped that this publication will help the data users, planners, administrators in preparation of micro-level planning.

I must express my deep gratitude to Dr. C. Chandramouli, IAS, Registrar General and Census Commissioner, India for his timely guidance and support for bringing out this publication. I am also thankful to Shri R. C. Sethi, Ex- Addl. Registrar General, ShriDeepakRastogi, present Addl. Registrar General and officers and staff of Census Division, D. P. Division, S. S. Division, Map Division and Printing Division for their able assistance and support in completing this publication.

I am grateful to ShriB.K. Pattnaik, IAS, Ex Chief Secretary and Shri J. K. Mohapatra, IAS, Present Chief Secretary to Govt. of Odisha, Dr. Taradatt, IAS, Additional Chief Secretary, R & DM Department and Shri R. K. Sharma, IAS, Ex Commissioner-Cum-Secretary,R & DM Department, Govt. of Odisha for their timely guidance and help in conduct of 2011 Census.

I must place on record my deep appreciation and thanks to the Departments of Govt. of Odisha, Heads of Departments, Collectors, Municipal Commissioners, District level officers, Tahasildars, Block Development Officers, Executive Officers of Municipalities and Notified Area Councils for their active co-operations and help for which this voluminous work could be possible.

In my office, I am thankful to all the Officers and the staffs, particularly ShriChittaranjanMohanty, Consultant for diligence and zeal shown by them in this important assignment. Its expeditious preparation has placed a heavy burden on all of them. I am deeply obliged to each of them.

HISTORY AND SCOPE OF THE DISTRICT CENSUS HANDBOOK

The need of data at the grass root level for the administrative and planning purposes at sub micro level as well as academic studies prompted the innovation of District Census Handbook. District Census Handbook is a unique publication from the Census organization which provides most authentic details of census and non-census information from village and town level to district level. The District Census Handbook was firstly introduced during the 1951 Census. It contains both census and non census data of urban as well as rural areas for each district. The census data contain several demographic and socio-economic characteristics of the lowest administrative unit i.e. of each village and town and ward of the district. The non census data comprise of data on availability of various civic amenities and infrastructural facilities etc. at the town and village level which constitute Village Directory and Town Directory part of the DCHB. The data of DCHB are of considerable importance in the context of planning and development at grass-root level.

In 1961 census DCHB provided a descriptive account of the district, administrative statistics, census tables and village and town directory including Primary Census Abstract. This pattern was changed in 1971 Census and the DCHB was published in three parts: Part-A related to village and town directory, Part-B to village and town PCA and Part-C comprised analytical report, administrative statistics, district census tables and certain analytical tables based on PCA and amenity data in respect of villages. The 1981 census DCHB was published in two parts: Part-A contained village and town directory and Part-B the PCA of village and town including the SCs and STs PCA up to tahsil/town levels. New features along with restructuring of the formats of village and town directory were added into it. In Village Directory, all amenities except electricity were brought together and if any amenity was not available in the referent village, the distance in broad ranges from the nearest place having such an amenity, was given.

The pattern of 1981 census was followed by and large for the DCHB of 1991 Census except the format of PCA. It was restructured. Nine-fold industrial classification of main workers was given against the four-fold industrial classification presented in the 1981 census. In addition, sex wise population in 0-6 age group was included in the PCA for the first time with a view to enable the data users to compile more realistic literacy rate as all children below 7 years of age had been treated as illiterate at the time of 1991 census. One of the important innovations in the 1991 census was the Community Development Block (CD Block) level presentation of village directory and PCA data instead of the traditional tahsil/taluk/PS level presentation.

As regards DCHB of 2001 Census, the scope of Village Directory was improved by including some other amenities like banking, recreational and cultural facilities, newspapers & magazines and `most important commodity' manufactured in a village in addition to prescribed facilities of earlier censuses. In Town Directory, the statement on Slums was modified and its coverage was enlarged by including details on all slums instead of 'notified slums'.

The scope and coverage of Village Directory of 2011 DCHB has been widened by including a number of new amenities in addition to those of 2001. In the Town Directory, seven Statements containing the details and the data of each town have been presented viz.; (i)-Status and Growth History of towns,(ii)- Physical Aspects and Location of Towns, (iii)-Civic and other Amenities, (iv)-Medical Facilities, (v)-Educational, Recreational & Cultural Facilities, (vi)- Industry & Banking, and (vii)- Civic & other amenities in Slums respectively. CD Block wise data of Village Directory and Village PCA have been presented in DCHB of 2011 census as presented in earlier census. The data of DCHB 2011 Census have been presented in two parts, Part-A contains Village and Town Directory and Part-B contains Village and Town wise Primary Census Abstract. Both the Parts have been published in separate volumes in 2011 Census.

Brief History of the District

Kandhamal district, bestowed with the beauty of nature came into existence on 1st January 1994 vide Govt. of Odisha Notification No. DRC-218/93/56413/R on Dt. 22/12/1993, after Phulabani district was divided into two districts viz. Baudh and Kandhamal. The district is bounded by Baudh district in North, Rayagada district in South, Ganjam and Nayagarh districts in the East and Kalahandi distirict in the West. Physiographically, the entire district lies in high altitude zone with inter-spreading inaccessible terrain of hill ranges and narrow valley tracts which guides the socio-economic conditions of the people and development of the district.

The untamed tract which forms on endless series of valleys of Kandhamal district owes its significant importance from the past history which dates back to 3rd century B.C. At that time the district was considered as an unconquered Atavika country. The name of the district Kandhamal is named after the vigorous Kandhas who are the major dwellers of the land. From the history of the district it reveals that Kandhamal district was under the Maurya reign. The mountainous Atavika country in later years was identified as Kandhamal.

The present district of Kandhamal is made up of the fragments of the three erstwhile principalities of Baudh, Ghumsar and Khemundi, which were formed during the reign of the Gangas, the last indigenous ruler of the throne of Orissa.

Marahattas occupied Boudh-Khondmals regions in 1800 A.D. and it remained under the rule of the Bhonsala Raja of Nagpur. But in the middle of 19th century when Khonds rose in rebellion under Chakra Bisoi, the Raja failed to enforce law and order in that territory.

The contemporary history of Kandhamal district is documented with the arrival of British in the 19th century. As far as the history of Kandhamal is concerned, British were not successful enough to find their way out without confronting any resistance. Bhanjas occupied the state and continued to rule over it till 1835. The present Sub-division of Baliguda region was under the Gangas of Kandhamal and the dynasty ruled over these hilly tracts, till the British captured the area between 1830 and 1880 by subduing the hilly chiefs who were the supporter of the Gangas. Kandhamal has experienced a chequered history during the same period.

The undivided district of Baudh-Phulabani was created in the year 1948 with two Sub-divisions i.e. Baudh and Kandhamal. The Kandhamal experiences Sub-tropical hot and dry climate in summer, dry and cold climate in winter. Daringibadi, a vast area at a height of 3000 ft above sea level is an ideal summer resort and is popularly known as the 'Kashmir of Odisha' which experiences snow fall during winter.

Administrative set up

The Collector and District Magistrate is the administrative head of the district. The collector excises Supervision over other district level officers also. For effective administration he is assisted by ADM, Deputy Collectors, Sub Collectors, BDOs and Tahasildars. There are two subdivisions namely, Kandhamal and Baliguda in the district. For convenience of revenue administration the district is divided into twelve tahasils, viz., Kandhamal, Phiringia, Khajuripada , G Udayagiri, Tikabali, Raikia, Chakapada, Baliguda, Tumudibandha, Kotagarh, K. Nuagaon and Daringbadi. Each tahasil is kept in charge of a Tahasildar. Similarly for carrying on developmental activities smoothly the district is divided into twelve CD Blocks, viz., Khajuripada, Phulabani, Phiringia, Baliguda, Tumudibandha, Kotagarh, Daringbadi, K.Nuagaon, Raikia, G.Udayagiri, Tikabali and Chakapada. Each CD Block is kept under administrative control of a Block Development Officer. The number of Gram Panchayats and the number of villages under each Community Development Block is given below:

Sl. No.	Name of CD Block	No. Gram Panchayats	No. of Villages	No. of C.T. & OG under CD Block
1	Khajuripada	13	249	
2	Phulabani	11	225	
3	Phiringia	20	436	
4	Baliguda	14	256	1C.T.
5	Tumudibandha	9	222	
6	Kotagarh	11	146	
7	Daringbadi	24	294	1 C.T.
8	K.Nuagaon	11	213	
9	Raikia	10	150	
10	G.Udayagiri	8	83	
11	Tikabali	12	144	
12	Chakapada	153	171	
	Total	**153**	**2589**	

For maintenance of law and order, the district is divided into 17 Police Stations i.e., Gochhapada,Phulabani, Phulbani Town PS, Phiringia, Khajuripada, G.Udayagiri, Tikabali, Raikia, Sarangagarh, Daringbadi, Chakapada, Baliguda, Tumudibandha, Belaghar, Kotagarh, Nuagaon and Bramhanigaon.

In order to look after the developmental activities of the urban areas in the district there are only two statutory towns i.e, Phulabani (M) and G. Udayagiri (NAC). Besides, two villages, namely, Baliguda and Daringbadi are declared as non statutory town i.e., Census Towns during 2011 Census.

Jurisdictional Changes

As per 2001 Census there were four tahasils, fifteen Police Stations, twelve CD Blocks having 2546 villages. During 2001 - 2011 Census eight new tahasils and two new Police Stations were formed. As per govt. notification No. DRC-11/08-33533/R&D.M dated 6th August, 2008, all the eight new tahasils viz., Phiringia, Khajuripada, Tikabali, Raikia, Chakapada, Tumudibandha, Kotagarh & K.Nuagaon were formed taking local limits of respective Panchayat Samiti areas only. Two new Police Stations viz. Chakapada and Nuagaon Police Staions were also created during the decades.

During 2001 to 2011 census 44 new villages have been created, among which maximum 17 villages are in Gochhapada Police station, 8 villages in Chakapada Police Station, 7 villages in Bramhanigaon Police Station, 3 villages in Phiringia Police Station, 2 villages each in Phulabani Police Station, Tikabali Police Station and Tumudibandha Police Station and one village each in Baliguda Police Station, Raikia Police Station and K.Nuagaon Police Station. One village Baikunpa is merged with Nedipada village of Phulabani Town P.S. Besides, two villages i.e, Baliguda & Daringbadi have also been treated as Census Towns. As a result of which the total number of villages of the district during 2011 Census comes to 2587, out of which 170 villages are uninhabited.

District Highlights 2011 Census

- Kandhamal is the 6th district in terms of size and 23rd in terms of population.
- Kandhamal is the 18th urbanised district in state having 9.86 percent of its population live in urban areas as against 16.69 percent of state's population living in urban areas.
- In terms of population per Sq. Km Kandhamal is 30th densely populated district in the state.
- Kandhamal has 3rd rank in terms of sex ratio in the state.
- There are 170 uninhabited villages in the district whereas 1 village is having a population of more than 5000 each.
- Raikia is the most populated village having 7809 populations in the district.
- Baliguda police station is having highest number of villages (348) in the district and Phulabani Town police station is having the lowest number of villages (5) in the district.

Section - I

Primary Census Abstract (PCA)

Brief Note on Primary Census Abstract

Introduction:

The Indian Census has the reputation of being one of the best in the world. The first Census in India was conducted in the year 1872. This was conducted at different points of time in different parts of the country. In 1881 a Census was taken for the entire country simultaneously. Since then, Census has been conducted every ten years, without a break. Thus, the Census of India 2011 was the fifteenth in this unbroken series since 1872, the seventh after independence and the second census of the third millennium and twenty first century. The census has been uninterruptedly continued despite of several adversities like wars, epidemics, natural calamities, political unrest, etc.

The Census of India is conducted under the provisions of the Census Act 1948 and the Census Rules, 1990. In Censuses until 1931, a synchronous de-facto method was adopted wherein the Census was conducted throughout the country on a single night. This being a very costly affair and involved the deployment of very large force at one point of time was given up in 1941. Since then the same methodology has been followed in all the Censuses. It is a gigantic operation and considered to be the single largest, complex, peace time administrative exercise in the world.

The Census Operation in India is carried out in two distinct but inter connected phases - the House listing and Housing Census followed by the Population Enumeration. During the first phase of Census 2011 i.e., House listing and Housing Census, the buildings, census houses and households were identified and systematically listed in the House Listing and Housing Census Schedule during the period April to September, 2010 in different States/Union Territories. Apart from listing of houses, some useful data on the amenities available to the households was also collected for assessing condition of human settlements, housing deficits etc.

Censuses prior to Census 2001 had the system of collecting the information through Individual Slip which was a key schedule for every individual. The information collected through slip was then compiled for a household. Some information was also collected in addition to this for the household. During 2001 Census a comprehensive Household Schedule was adopted replacing the individual slip concept. In 2011 Census also similar household schedule was used for canvassing. The scope of demographic, socio-economic parameters has been widened in every census.

2. Population Enumeration - Census 2011:

The field work of the second phase i.e. Population Enumeration was carried out during February-March, 2011. One of the essential features of Population Enumeration in the second phase was that each person was enumerated and her/his individual particulars were collected at a well-defined point of time.

The Census moment and the reference date for the Census of India 2011 was 00:00 hours of 1st March, 2011. The enumeration was conducted from 9th February to 28th February, 2011 along with a revisional round from 1st March, 2011 to 5th March, 2011 synchronously all over the country except for few specific areas of the Jammu & Kashmir, Himachal Pradesh and Uttarakhand states that remain snowbound in February. In these locations the population enumeration was done from 11th September, 2010 to 30th September, 2010 along with a revisional round from 1st October, 2010 to 5th October, 2010. The reference date for the census in snow bound non-synchronous areas of these states was 00.00 hours of the first day of October, 2010. In addition to the coverage during House listing & Housing Census, the enumeration of the Houseless population was carried out on the night of 28th February, 2011, as has been the usual practice. For the purpose of Census, certain areas where the access of the civilian enumerators was not permissible due to security reasons termed as 'Special Charges' such as the Defence and strictly Military/Para-Military areas, including operational areas were also covered. Such areas were not covered during the House listing & Housing Census. In addition to the defence/para-military areas, Special Charges also included certain factory areas, certain colonies, sensitive areas, scientific establishments, etc. These also formed Special Charges as these were not accessible by the usual census enumerator.

3. Quality Assurance:

A Task Force for Quality Assurance (TFQA) functioned under the chairmanship of the RG & CCI. Experienced officers of the different divisions of the organization i.e. Heads and senior officers of the Census Division, Data Processing Division, Map Division, Demography Division and Social Studies Division comprised the TFQA. The Directors of Census Operations were co-opted as members whenever the TFQA discussed the data for their States/Union territories. The main objective of constituting the TFQA was to subject the data to stringent validation checks and ensure its quality before release as it was expedient to be satisfied itself about the quality of data before putting the same in public domain.

The Directors and their senior officers were involved at all levels with respect to the quality and the coverage of their states/Uts. The TFQA intensively scrutinized coverage and content parameters including edit and imputation logic. The most important aspect of the data quality was to ensure complete coverage of all geographical areas especially for the population enumeration phase where the data is disseminated right up to the village level in the rural areas and the ward level in the urban areas. Thus ensuring the complete coverage and correct geographical linkage of each enumeration block was one of the major planks of the quality control, especially for small area population statistics. The content was scrutinized mainly through the process of internal consistency, comparison with similar data in the past and also through validation with likewise data if available, from external sources. Quite often the local knowledge and perception was looked at to understand both the existing and the new emerging trends of

population distribution and characteristics. A very comprehensive check and edit mechanism was put in place to objectively examine the preliminary Census 2011 Population Enumeration results and finally clear them for use. The population data was cleared only after the full possible satisfaction of the TFQA.

The entire work relating to the data validation and scrutiny was completed by all the States/Union territories under the overall supervision and monitoring of the Census Division of the Office of the Registrar General, India with active cooperation and support of the Social Studies Division, Data Processing Division, Data Dissemination Division and Map Division.

4. Primary Census Abstract:

The Primary Census Abstract which is important publication of 2011 Census gives basic information on Area, Total Number of Households, Total Population, Scheduled Castes, Scheduled Tribes Population, Population in the age group 0-6, Literates, Main Workers and Marginal Workers classified by the four broad industrial categories, namely, (i) Cultivators, (ii) Agricultural Labourers, (iii) Household Industry Workers, and (iv) Other Workers and also Non-Workers. The characteristics of the Total Population include Scheduled Castes, Scheduled Tribes, Institutional and Houseless Population and are presented by sex and rural-urban residence.

In 1981 census main workers were presented into four categories. As regards 1991 Census, the nine-fold industrial classification of main workers has been given in the Primary Census Abstract. One of the important features of the Primary Census Abstract of 1991 Census was the presentation of population of the age group 0-6 which is continued in 2001 and 2011 Census. All the children of age 6 years or less have been treated as illiterate even if the child is going to a school and may have picked up reading and writing. This will help the data users in better analysis and understanding of the literacy data as the literacy rate is calculated with 7 years and above population and it is referred as effective literacy rate. In 2001 and 2011 census four categories of main workers have been given in the Primary Census Abstract.

5. Level of Presentation of PCA data in District Census Handbooks:

The format of Primary Census Abstract (PCA) adopted in the DCHB of 2001 Census has been continued for 2011 Census as the data on four categories of works have been presented similar to 2001 census. The Primary Census Abstract data in different PCAs are presented at different levels. The level of presentation of Primary Census Abstracts in DCHB is as under:

1. District Primary Census Abstract -District/C.D. Block/Town.
2. Primary Census Abstract for Scheduled Castes- District/C.D. Block/Town.
3. Primary Census Abstract for Scheduled Tribes -District/C.D. Block/Town.
4. Village Primary Census Abstract -C.D. Block/Village wise.
5. Urban Primary Census Abstract- Town/Ward level.

The PCA Data for villages was presented C.D. Block wise for the first time in 1991 Census. This practice is continued in 2001 and 2011 Census. The term 'Total Population' includes the Scheduled Castes, the Scheduled Tribes, the Institutional and the Houseless populations. An appendix to District Primary Census Abstract has also been furnished showing urban enumeration block-wise particulars on Total Population, the Scheduled Castes Population and the Scheduled Tribes Population for each town.

6. Area Figures:

The area figures supplied by local revenue authorities of the district in respect of tahsils, Police Stations and by the local bodies in respect of towns are given in square kilometers. The area figures of the villages supplied by the Tahsildars in acres have been converted and shown in hectares. The area figures of the C.D. Block are the total of the village areas coming under each C.D. Block. The area figures for the district are the same as adopted by the Surveyor General of India to maintain uniformity at the national level.
